wonder what went on at the Army Chemical Center during the 1960s It was a decade in which thousands of Army enlisted men served as volunteers for the secret testing of chemical agents The actual historical record however has until now remained disturbingly incomplete What chemicals was the Army studying Why was the program never fully documented in books available to the public Who planned and carried out the tests and what was their purpose How and by whom were the volunteers recruited How adequately were they instructed before giving their informed consent What long range effects if any have been found in follow up studies Written by the physician who played a pivotal role in psychoactive drug testing of hundreds of volunteers the story breaks an official silence that has lasted almost fifty years Dr James Ketchum may be the only scientist still equal to the task His book goes a long way toward revealing the contents of once classified documents that still reside in restricted archives The author spent most of a decade testing over a dozen potential incapacitating agents including LSD BZ and marijuana derivatives His 380 page narrative loaded with both old and recent photographs derives from technical reports memoranda films notes and memories Written primarily for the general reader but supplemented by a voluminous appendix of graphs and tables for the technically inclined Dr Ketchum s book combines a subjective diary with an objective report of the external events that shaped and eventually terminated the program Informal and autobiographical in style it includes numerous amusing anecdotes and personality portraits that make it simultaneously intriguing and informative

**Synthetic Panics** Philip Jenkins, 1999-07 America has a long history of drug panics in which countless social problems have been blamed on the devastating effects of some harmful substance In the last forty years such panics have often focused on synthetic or designer drugs like methamphetamine PCP Ecstasy methcathinone and rave drugs like ketamine and GHB Fear of these substances has provided

critical justification for the continuing war on drugs Synthetic Panics traces the history of these anti drug movements demonstrating that designer chemicals inspire so much fear not because they are uniquely dangerous but because they bring into focus deeply rooted public concerns about social and cultural upheaval Jenkins highlights the role of the mass media in spreading anti drug hysteria and shows how proponents of the war on drugs use synthetic panics to scapegoat society's others and exacerbate racial class and intergenerational conflict

Department of Justice,1975 How Soon is Now Daniel Pinchbeck,2017-02-21 We are on the brink of an ecological mega crisis threatening the future of life on earth and our actions over the next few years may well determine the destiny of our descendants Between a manifesto and a tactical plan of action How Soon is Now by radical futurist and philosopher Daniel Pinchbeck outlines a vision for a mass social movement that will address this crisis Drawing on a huge range of resources and references Daniel Pinchbeck presents a compelling argument for the need for change on a global basis it is only when we see ourselves as one planetary tribe that this change can occur The central thesis is that humanity has self willed the ecological crisis in order to bring about the necessary conditions for transcendence of our current state of being by undergoing an initiatory ordeal on a planetary scale This collective ordeal is necessary for us to evolve from one state of being our current level of consciousness to the next By passing through this initiation we realize ourselves as one unified being a planetary super organism in a symbiotic relationship with the Earth s ecology and the entire web of life Covering everything from energy and agriculture to culture politics media and ideology Pinchbeck s book is ultimately about the nature of the human soul and the future of our current world He calls for an intentional and consciously designed metamorphosis of our current systems which transform capitalist and exclusive structures into participatory democratic and inclusive ones based on an integration of Eastern metaphysics social ecology and radical political thought How Soon is Now gives us the context we need to understand the chaos and turbulence of our times Sting *How Soon is Now? asserts that voluntary death in literature is not always a matter of tragedy In this study Drew Daniel identifies a surprisingly common aesthetic attitude that he calls joy of the worm after Cleopatra s embrace of the deadly asp in Shakespeare s play a pattern where voluntary death is imagined as an occasion for humor mirth ecstatic pleasure even joy and celebration Daniel draws both a historical and a conceptual distinction between self killing and suicide Standard intellectual histories of suicide in the early modern period have understandably emphasized attitudes of abhorrence scorn and severity toward voluntary death Daniel reads an archive of literary scenes and passages dating from 1534 to 1713 that complicate this picture In their own distinct responses to the surrounding attitude of censure writers including Shakespeare Donne Milton and Addison imagine death not as sin or sickness but instead as a heroic gift sexual release elemental return amorous fusion or political self rescue Joy of the worm emerges here as an aesthetic mode that shades into schadenfreude sadistic cruelty and deliberate trolling but can also underwrite powerful feelings of belonging devotion and love     *Library Book Catalog*
