Psychiatric Experiences Of The Eighth:

Cream of the Crop Allan Douglas English,1996-07-20 English describes the development of a uniquely Canadian selection system that attempted to match the aptitudes of aircrew candidates to the duties they would perform and the evolution of the RCAF's training program from a haphazard system with enormous attrition to one that became the model for many modern systems He traces the development of aviation psychology and the treatment of psychological casualties of air combat English pays particular attention to the LMF controversy and the RCAF's response as well as the effect of morale and leadership on the psychological well being of and casualty rates among Royal Air Force and RCAF bomber squadrons In exploring the human dimension of air warfare an issue that has been widely overlooked in military literature English demonstrates that personnel considerations have at least as much influence on the effectiveness of air forces as material and technological factors

THE PHYSIOLOGICAL AND PSYCHOLOGICAL EFFECTS OF COMBAT STRESS EXPERIENCED BY THE HEAVY BOMBARDMENT CREWS OF THE EIGHTH AIR FORCE DURING WWII Anthony Cardo,2025-02-21 The Physiological and Psychological Effects of Combat Stress Experienced by the Heavy Bombardment Crews of the Eighth Air Force during WWII offers a unique window into the effects of combat stress as experienced by a select number of men in a select moment of time and one that is unlikely to be experienced again by mankind This is not to say that future combat aviators will not experience the unique effects of combat stress as this is nearly a given as the record of man's wartime experiences shows but that the unique environment the men of the Eighth Air Force experienced will likely not be repeated to the same degree going forward With that being the most likely case author and military historian Anthony Cardo seeks to also explore what the experiences of the heavy bombardment crews of the Eighth Air Force with the physiological and psychological effects of combat stress have to offer posterity and aims to inspire the reader to ask for themselves what these experiences have to offer posterity What this work is not is a clinical study on the bomber crewmen nor is it meant to be an exhaustive study on the subject Instead it is meant to add to the historical discussion by categorizing some of the various physiological and psychological symptoms of combat induced fear and providing commentary on its significance and relation to the wider literature on the effects of combat stress on human beings If the work succeeds in fueling your interest or curiosity on the topic and propels you into further research then it has at least succeeded in its overall goal to both raise awareness and the discussion on the topic I hope you enjoy it as I enjoyed both researching and drafting this work

With the Possum and the Eagle Ralph H.

Nutter,2005 As told by ace navigator Ralph Nutter this is the story of two of our country s leading airmen during World War II Haywood Possum Hansell and Curtis the Eagle LeMay 24 photos 2 maps *Project Report* USAF School of Aerospace Medicine,1952 **Psychiatric Casualties** Mark Russell,Charles Figley,2021-06-15 The psychological toll of war is vast and the social costs of war s psychiatric casualties extend even further Yet military mental health care suffers from extensive waiting lists organizational scandals spikes in veteran suicide narcotic overprescription shortages of mental health professionals and inadequate treatment The prevalence of conditions such as post traumatic stress disorder is often underestimated and there remains entrenched stigma and fear of being diagnosed Even more alarming is how the military dismisses or conceals the significance and extent of the mental health crisis The trauma experts Mark C Russell and Charles Figley offer an impassioned and meticulous critique of the systemic failures in military mental health care in the United States They examine the persistent disconnect between war culture which valorizes an appearance of strength and seeks to purge weakness and the science and treatment of trauma Instead of reckoning with the mental health crisis the military has neglected the needs of service members It has discharged prosecuted and incarcerated a large number of people struggling with the psychological realities of war and it has inflicted humiliation ridicule and shame on many more Through a far reaching historical account Russell and Figley detail how the military has perpetuated a self inflicted crisis The book concludes with actionable prescriptions for change and a comprehensive approach to significantly improving military mental health **Flak** Edward B. Westermann,2001 Air raid sirens wail searchlight beams flash across the sky and the night is aflame with tracer fire and aerial explosions as Allied bombers and German anti aircraft units duel in the thundering darkness Such cinematic scenes played out with increasing frequency as World War II ground to a close were more than mere stock material for movie melodramas As Edward Westermann reveals they point to a key but largely unappreciated aspect of the German war effort that has yet to get its full due Long the neglected stepchild in studies of World War II air campaigns German flak or anti aircraft units have been frequently dismissed by American British and German historians and by veterans of the European air war as ineffective weapons that wasted valuable materiel and personnel resources desperately needed elsewhere by the Third Reich Westermann emphatically disagrees with that view and makes a convincing case for the significant contributions made by the entire range of German anti aircraft defenses During the Allied air campaigns against the Third Reich well over a million tons of bombs were dropped upon the German homeland killing nearly 300 000 civilians wounding another 780 000 and destroying more than 3 500 000 industrial and residential structures Not surprisingly that aerial Armageddon has inspired countless studies of both the victorious Allied bombing offensive and the ultimately doomed Luftwaffe defense of its own skies By contrast flak units have virtually been ignored despite the fact that they employed more than a million men and women were responsible for more than half of all Allied aircraft losses forced Allied bombers to fly far abovehigh accuracy altitudes and thus allowed Germany to hold out far longer than it might have

otherwise Westermann's definitive study sheds new light on every facet of the development and organization of this vital defense arm including *War Psychiatry* Franklin D. Jones, 1995 This volume of the Textbook of Military Medicine addresses the delivery of mental health services during wartime The foreseeable future of the U S military includes the potential for involvement in a variety of conflicts ranging from peace keeping missions to massive deployments of personnel and materiel and possible nuclear biological and chemical threats as was seen in the Persian Gulf War The medical role in wartime is critical to success of the mission For the mental health disciplines this role encompasses identification and elimination of unfit personnel improvement of marginal personnel to standards of acceptability prevention of psychiatric casualties and their treatment when prevention fails All of these efforts must be guided by past experience and sound principles of human behavior

Dismantling Glory Lorrie Goldensohn, 2003 Dismantling Glory deals with the poetry written about the honors and horrors of battle by the very soldiers who put their lives on the line Focusing on American and English poetry from World Wars I and II and the Vietnam War Lorrie Goldensohn presents the move from a poetry largely bound to trench warfare to a global war poetry dominated by air power invasion and occupation Civilians prisoners and children enter this poetry in new and compelling ways as do issues of race and gender changing and complicating the representation of war and expanding the scope of antiwar thinking

Flying against Fate S. P. MacKenzie, 2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in *Flying against Fate* a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II Mining a wealth of documents as well as a trove of published and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers' superstitions assumed from jinxes to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew

members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers Flying against Fate expands our understanding of a major aspect of the psychology of war in the air and of World War II *A War of Nerves* Ben Shephard,2001 This is a history of military psychiatry in the twentieth century Both absorbing historical narrative and intellectual detective story it weaves literary medical and military lore to give us a fascinating history of war neuroses and their treatment from the World Wars through Vietnam and up to the Gulf War Mental Health: Psycho-Social Perspectives (Volume 8: Mental Health at Workplace) Anubhuti Dubey,Aradhana Shukla,2026-01-01 It has been observed that most of the adult population around the globe is working in any form of organised labour whether physical or cognitive As every person wants to be fit and healthy in such a way people working in all organisations want to maintain their psycho physical health Although many health organisations like World Health Organisation WHO have provided comprehensive mental health action plans and they were followed by organisations but after COVID 19 the entire scenario was changed and people working there have felt a lot of constraints pertaining to their psychological and physical health status It has caused dissatisfaction from the organizational climate and degradation in work skills is being watched regularly In order to improve the organisational climate and increase the mental health status of the people working there this volume is planned This is the eighth volume of our series Mental Health Psychosocial Perspective Twenty Five thought provoking research papers are included here and they open the various doors of causes and cures related to mental health we are quite sure that this volume will help the researchers teachers mental health professionals and the people who want to increase their mental in work place **New York Court of Appeals.
