The Patient Hoyle Leigh, 2013-03-08 The old fashioned doctor whose departure from the modern medical scene is so greatly lamented was amply aware of each patient's personality family work and way of life Today we often blame a doctor's absence of that awareness on moral or ethical deficiency either in medical education or in the character of people who become physicians An alternative explanation however is that doctors are just as moral ethical and concerned as ever before but that a vast amount of additional new information has won the competition for attention The data available to the old

fashioned doctor were a patient's history, physical examination and personal profile together with a limited number of generally ineffectual therapeutic agents. A doctor today deals with an enormous array of additional new information which comes from X-rays, biopsies, cytology, electrographic tracings and the phantasmagoria of contemporary laboratory tests and the doctor must also be aware of a list of therapeutic possibilities that are both far more effective and far more extensive than ever before.
