Psychiatry: Education and Image American College of Psychiatrists, 1973 **Images of Spanish Psychiatry** Carmen Leal Cercós, Carlos Carbonell Masiá, 2005* **The Education of a Psychiatrist** Sheila Harms, 2025-09-01 Rethinks the status of bodies in a field that is meant to heal the mind and how institutions can shape the drama of psychiatric education The Education of a Psychiatrist offers a fresh engagement with the challenges of learning a profession and building a practice in hospital settings often resistant to care With astute analysis of works by both clinicians and critics of the field such as Oliver Sacks and Michel Foucault Sheila Harms reflects on the role of myths of endurance in education and the more promising possibilities of an ethical turn toward personal transformation precisely as an educator Working across the humanities and medical education and drawing on her own experiences in Canada and Uganda Harms shows why relations of concern vulnerability and dependency must become urgent grounds for psychiatric practice **The Human Image in Helmuth Plessner, Pierre Bourdieu, and Psychocentric Culture** Isaac E. Catt, 2023-02-06 In The Human Image in Helmuth Plessner Pierre Bourdieu and Psychocentric Culture Isaac E Catt offers a unique criticism of naturalistic reductions of humans to animals to neuro substrates and to DNA Catt explores a new interpretation of Plessner and Bourdieu revealing the combinatory logic of semiotic phenomenology in both and their common problematic of communication Through an emergent synthesis of philosophical anthropology and communicology this book provides a basis for criticism of the failed mechanistic medical model in psychiatry a fresh argument for reconceptualizing psychiatry as a human science and for construction of a new ecological image of communicative being Throughout the book alternative attempts to transcend dualisms such as cybernetics anti anthropocentrism and biosemiotics are revealed to risk reification of the very objects of their analysis Scholars of communication semiotics philosophy psychiatry cultural studies mental distress and psychology will find this book of particular interest *American Psychiatry After World War II (1944-1994)* Roy W. Menninger, John C. Nemiah, 2008-11-01 The history of psychiatry is complex reflecting diverse origins in mythology cult beliefs astrology early medicine law religion philosophy and politics This complexity has generated considerable debate and an increasing outflow of historical scholarship ranging from the enthusiastic meliorism of pre World War II histories to the iconoclastic revisionism of the 1960s to more focused studies such as the history of asylums and the validity and efficacy of Freudian theory This volume intended as a successor to the centennial history of American psychiatry published by the American Psychiatric Association in 1944 summarizes the significant events and processes of the half century following World War II Most of this history is written by clinicians who were central figures in it In broad terms the history of psychiatry after the war can be viewed as the story of a cycling sequence shifting from a predominantly biological to a psychodynamic perspective and back again all presumably en route to an ultimate view that is truly integrated and interacting all the while with public perceptions expectations exasperations and disappointments In six sections Drs Roy Menninger and John Nemiah and their colleagues

cover both the continuities and the dramatic changes of this period The first four sections of the book are roughly chronological The first section focuses on the war and its impact on psychiatry the second reviews postwar growth of the field psychoanalysis and psychotherapy psychiatric education and psychosomatic medicine the third recounts the rise of scientific empiricism biological psychiatry and nosology and the fourth discusses public attitudes and perceptions of public mental health policy deinstitutionalization antipsychiatry the consumer movement and managed care The fifth section examines the development of specialization and differentiation exemplified by child and adolescent psychiatry geriatric psychiatry addiction psychiatry and forensic psychiatry The concluding section examines ethics and women and minorities in psychiatry Anyone interested in psychiatry will find this book a fascinating read *Brain-image Based Computation for Supporting Clinical Decision in Neurological and Psychiatric Disorders* Lin Shi,Feng Feng,Weidong Cai,2021-04-07
