Psychiatry Rounds Practical Solutions To Clinical Challenges:

Psychiatry Rounds Nutan Atre Vaidya, Michael Alan Taylor, 2004 180 classic cases in clinical psychiatry and neuropsychiatry A step by step approach to diagnosis and treatment A tool for psychiatrists and non psychiatrists

Hippocrates Cried Michael A Taylor, 2013-04-01 Hippocrates Cried offers an eye witness account of the decline of American psychiatry by an experienced psychiatrist and researcher Arguing that patients with mental disorders are no longer receiving the care they need Dr Taylor suggests that modern psychiatrists in the U S rely too heavily on the DSM a diagnostic tool that fails to properly diagnose many cases of mental disorder and often neglects important conditions or symptoms American psychiatry has come to reflect simplistic algorithms forged by pharmaceutical companies rather than true scientific methodology Few professionals have a working knowledge of psychopathology outside of what is outlined in the DSM and more mental health patients are being treated by primary care physicians than ever before Dr Taylor creates a passionate yet scholarly account of this issue For psychiatrists and researchers this book is a plea for help Combining personal vignettes and informative data it creates a powerful illustration of a medical field in turmoil For the general reader Hippocrates Cried will provide a fresh perspective on an issue that rarely receives the attention it requires This book strips American psychiatry of its modern misconceptions and seeks to save a form of medicine no longer rooted in science

Handbook of Clinical Psychology in Medical Settings Ronald H. Rozensky, Jerry J. Sweet, Steven M. Tovar, 2013-06-29 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the

beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book
