Archetype, Culture, and the Individual in Education Clifford Mayes, 2020-03-16 In *Archetype Culture and the Individual in Education* The Three Pedagogical Narratives Clifford Mayes presents a unique approach to understanding how Jungian principles can inform pedagogical theory and practice In a time when what the educational historian Lawrence Cremin called the military industrial educational complex and its standardized education are running roughshod over the psyche and spirit of students Mayes deploys depth psychology especially the work of Jung to advance an archetypal approach to teaching and learning Mayes demonstrates how catastrophic it is to students when the classroom is governed by forces that objectify the individual in a paralyzing stranglehold He argues that one's life narrative is significantly impacted by one's narrative as a learner thus schooling that commodifies learning and turns the student into an object has neuroticizing effects that will spread throughout that student's entire life In Part I Mayes explores the interaction between archetypes and various types of time ultimately focusing on the

individual but always mediated by the cultural unconscious In Parts II and III he brings together education with post Jungian and post Freudian psychology examining transference countertransference in the classroom the Jungian idea of the shadow applied to educational processes Jung s unique vision of the symbol and its importance for educational theory and Jung s transcendent function as a prime educational modality Mayes concludes by looking to the future of archetypal pedagogy This groundbreaking work in the emerging field of Jungian pedagogy is invaluable reading in Jungian Studies depth psychological theory educational theory and for teachers and psychotherapists

Psychology as the Discipline of Interiority Jennifer M. Sandoval,John C. Knapp,2017-02-03 Psychology as the Discipline of Interiority is the first collection of essays dedicated to the study and application of Psychology as the Discipline of Interiority a new wave within Analytical Psychology which pushes off from the work of C G Jung and James Hillman The book reflects upon the notion of psychology developed by German psychoanalyst Wolfgang Giegerich whose Hegelian turn sheds light on the notion of soul or psyche and its inner logic and thought forming a radical new basis from which to ground a modern psychology with soul The book s theme the psychological difference is applied to topics including analytical theory clinical practice and contemporary issues ranging from C G Jung s Mysterium to case studies to the nuclear bomb and the Shoah Psychology as the Discipline of Interiority expounds upon the complexity

depth and innovativeness of Giegerich's thought reflecting the various ways in which international scholars have creatively explored a speculative psychology founded upon the notion of soul. The contributors here include clinical psychologists, Jungian analysts and international scholars. With a new chapter by Wolfgang Giegerich and a foreword by David Miller, *Psychology as the Discipline of Interiority* will be essential reading for depth and clinical psychologists, Jungian psychoanalysts in practice and in training, and academics and students of post-Jungian studies. It is also relevant reading for all those interested in the history of philosophical thought and what it means to think in the highly sophisticated and technological world of the twenty-first century. Anger, Madness, and the Daimonic Stephen A. Diamond, 1996-01-01

Explores the links between anger, rage, violence, evil, and creativity and describes a dynamic therapeutic approach that can help channel anger and violent impulses into constructive and creative activity. *Mental Health Research Institute Staff Publications*, University of Michigan. Slattery, 2014-01-15. This collection of essays written over a period of years entertains the shared place of psyche and poetics. Dr. Slattery has explored the manner in which the psyche is poetic and how poetry is deeply psycho-mythical. Influenced in part by the archetypal psychologist James Hillman's idea of the poetic basis of mind that comprises the soul's foundation, Slattery's writing moves into the interactive field in which myth is the ground for both psyche and poetry. The essays develop a further understanding of what has been called mythopoiesis, the fundamental myth-making and shaping capacity of the soul.

Martha Graham in Love and War Mark Franko, 2012-06-05. Often called the Picasso, Stravinsky, or Frank Lloyd Wright of the dance world, Martha Graham revolutionized ballet stages across the globe. Here Franko reframes Graham's most famous creations by showing how she wove together strands of love, passion, politics, and myth to create an American school of choreography and dance. Developing the Whole Student Clifford Mayes, 2019-12-31. This book proposes a new way of categorizing curricula in the holistic educational tradition. This is an idea that goes back in the Western tradition at least as far as Plato and Lao Tzu in the Eastern tradition. It is certainly present in Spinoza and Schopenhauer. It is called a holarchy. The idea of a holarchy gives rise to Integrative Curriculum Theory, which with major modifications draws on Ken Wilber's in his evolutionary model of the development of consciousness at personal, cultural, and ontological realms. Integrative Curriculum Theory will 1. Prove a useful addition to the holistic repertoire of systematic and above all humane terminologies and technologies for making and evaluating specific curricula as well as for theorizing the curriculum at a time when scientific, technist, and profit-driven views of education have commandeered the podium; policy and praxis; and 2. address some areas of concern that with certain holistic models of education; and 3. address some problems in Wilber's integral model of psychological, cultural, and spiritual evolution. *A Guided Tour of the Collected Works of C. G. Jung* Robert H. Hopcke, 2013-02-05. The writings of C. G. Jung himself are the best place to read about all his main ideas, but where to start when Jung's Collected Works run to more than eighteen volumes? Robert H. Hopcke's guide to Jung's voluminous writings

shows exactly the best place to begin for getting a handle on each of Jung's key concepts and ideas from archetypal symbols to analytical psychology to UFOs. Each chapter explains one of Jung's principal concerns then directs the reader where to read about it in depth in the Collected Works. Each chapter includes a list of secondary sources to approach for further study which the author has updated for this edition to include books published in the ten years since the Guided Tour's first appearance.

The Mind-Brain Continuum Susan Gordon, 2023-01-01. This insightful book proposes a holistic theory of the development of self drawing on interdisciplinary literature in existential phenomenology, neurophenomenology, intracrinology, endocrinology, and naturopathic medicine. The psychoneurointracrine hypothesis bridges the gap between the mind and brain providing a framework to explain the complex system that facilitates development of one's sense of self and well-being. The book challenges assumptions in present-day neuroscience and psychiatry placing the mind and brain on a continuum of health and growth rather than reducing the study of human consciousness to neurobiological terms and pathological classifications. In this landmark book Susan Gordon presents a bold hypothesis one that underscores the importance of psychoneurointracrine activity and links it to female neurology and the development of one's sense of self. She brilliantly places this activity which serves as a mind-body bridge within the frameworks of neurophenomenology and non-linear dynamics. Her psychoneurointracrine hypothesis is a tour de force one that is holistic integrating intracrinology with psychology and neurology. This hypothesis undercuts the current assumption that the mind is an epiphenomenon of the brain creating a paradigm that impacts science's understanding of behavior, experience, consciousness, and human agency. Stanley Krippner PhD, Affiliated Distinguished Faculty, California Institute of Integral Studies, San Francisco, CA. In her fascinating book Susan Gordon develops a novel theory about the biological connection between mind, brain, and organism. Drawing on empirical research on the role of the female hormonal system in basal states of self and mood, she shows that the biochemistry of the endocrine system must be viewed as an indispensable foundation for the emergence of embodied self-awareness. The homeostasis and hormonal balance of the organism is integral to the sense of well-being and the development of meaning but it is also continually modulated and influenced by the subject's experience of his or her world. In this way she makes a decisive contribution to a theory of embodiment that goes far beyond a computational theory of the brain to focus on the biochemical, organismic processes at the root of the mind.

The Self in Transformation Hester McFarland Solomon, 2018-04-24. This book brings together into one volume a number of articles that the author has written over the past 20 years and includes a new extended essay written especially for this volume. The chapters organized into sections explore theoretical and clinical matters within a Jungian analytical framework making carefully considered links to a number of psychoanalytical themes and concepts. The book also includes a section on ethics in the consulting room. In her new essay the author discusses pivotal themes in depth: psychology, psychic transformation, synchronicity, and the emergence of complex adaptive systems in relation

to the evolution of Jungs theory of the psychoid She draws from fields of study such as anthropology neuropsychology the arts and religion to develop her themes This is a reasoned integration and demonstration of the developing thought and clinical practice of an established Jungian analyst
