Krippner, Harris L. Friedman, 2010-09-02 This book presents a provocative debate between parapsychological advocates who claim that Western science's worldview is incomplete and counteradvocates who insist that parapsychological data is either spurious or can be explained by standard scientific principles. Despite ongoing and repeated attempts to prove or disprove the existence of parapsychological events there are still no conclusive findings and certainly no consensus across the worldwide community of scholars scientists and proponents of psychic phenomena. Still there is no shortage of information about this fascinating topic to allow everyone to draw their own conclusions. This book has been expressly written to make each chapter and topic accessible to a general audience despite containing a vast amount of theoretical material. The book is organized into two parts in the first section proponents of the validity of parapsychological data and critics who reject that validity state their respective positions. In the second part each group responds to each others statements in the form of a debate. Other experts from the United States as well as from Australia and Great Britain provide overviews and conclusions.

The Metaphysical Magazine ,1898 Science and the Paranormal

Arthur J. Ellison, 2020-01-07 Ellison was a dedicated paranormal researcher who believed the science was too narrow to account for things like out of body experiences. In fact, not fiction, this book presents the case for the paranormal. Changing the way we look at the universe is not easy and requires a true openness to exploration and experiment. Professor Ellison suggests that most of us are conditioned by our Western science-based education to think that the universe is much simpler and material than it really is. He argues that we should recognize the limits of the current scientific worldview that fails to account for genuine paranormal experiences including phenomena such as out of body experiences. OBE reliably reported by thousands of people. Science and the Paranormal is part of The Paranormal, a series that resurrects rare titles, classic publications and out of print texts as well as publishes new supernatural and otherworldly ebooks for the digital age. The series includes a range of paranormal subjects from angels, fairies and UFOs to near death experiences, vampires, ghosts and witchcraft. A most valuable work and a lasting testimony to the author's remarkable contribution to the field. Bernard Carr, Scientific and Medical Network Review. Written for the lay person in down to earth language, this book is for those who want a broad brush of matters like the evidence for telepathy, near death experiences, survival research, etc. without having to plough through a century-high stack of scientific papers. A welcome introduction to human nature's further reaches. Christian Parapsychologist. Handbook of Emergency Psychiatry Hani R. Khouzam, Doris Tiu Tan, Tirath S. Gill, 2007-03-01 This user-friendly resource presents a patient-centered approach to managing the growing incidence of major psychiatric emergencies in the outpatient setting. Abundant illustrations, tables, and algorithms guide you through the wide range of disorders discussed, and a color-coded outline format facilitates rapid access to essential information necessary for making a proper diagnosis for optimal management outcomes. Organizes information by patient presentation to help you distinguish among conditions that present with similar symptoms. Discusses medical conditions presenting with psychiatric symptoms where appropriate. Highlights critical information in Hazard Signs boxes for quick at-a-glance review. Uses acronyms and memory aids to enhance recall of information in moments of crisis. Features a chapter discussing the psychiatric effects of bioterrorism. Offers an Improved Suicide Risk Scale with criteria on impulsivity, plan, and lethal level of attempt. Provides valuable tips on interviewing and interacting with patients in various situations as techniques will vary from depressed suicidal patients to manic and potentially assaultive individuals. Includes appendixes that discuss common psychiatric medications used and important lab values in the ER. **Quarterly Transactions of the British College of Psychic Science**, 1927.
