Reduplication Doubling In Morphology:

Reduplication Sharon Inkelas, Cheryl Zoll, 2005-02-24 This groundbreaking new study takes a novel approach to reduplication a phenomenon whereby languages use repetition to create new words Sharon Inkelas and Cheryl Zoll argue that the driving force in reduplication is identity at the morphosyntactic not the phonological level and present a new model of reduplication Morphological Doubling Theory that derives the full range of reduplication patterns This approach shifts the focus away from the relatively small number of cases of phonological overapplication and underapplication which have played a major role in earlier studies to the larger class of cases where base and reduplicant diverge phonologically The authors conclude by arguing for a theoretical shift in phonology which entails more attention to word structure As well as presenting the authors pioneering work this book also provides a much needed overview of reduplication the study of which has become one of the most contentious in modern phonological theory

Morphology and Meaning Franz Rainer, Francesco Gardani, Hans Christian Luschützky, Wolfgang U. Dressler, 2014-02-15 The problem of form and meaning in morphology has produced an impressive amount of scholarly work over the last hundred years Nevertheless many issues continue to be in need of clarification The present volume assembles 18 selected papers from the 15th International Morphology Meeting Vienna 9 12 February 2012 relating to this vast field of research The introduction provides a detailed overview of the state of the art in the field It is followed by three articles derived from the plenaries that are dedicated to fundamental issues such as the

relationship between morphological meaning and concepts between word formation and meaning change as well as indirect coding The section papers tackle a wide array of issues including affixal polysemy pathways of grammaticalization the processing of compounds mismatches between form and meaning synonymy avoidance or the semantics of specific patterns of noun incorporation compounding reduplication and mimetic verbs

Canonical Forms in Prosodic Morphology Laura J. Downing, 2006 Prosodic morphology concerns the interaction of morphological and phonological determinants of linguistic form and the degree to which one determines the other This is the first book devoted to understanding the definition and operation of canonical forms the invariant syllabic shapes of morphemes which are the defining characteristic of prosodic morphology Dr Downing discusses past research in the field and provides a critical evaluation of the current leading theory which she shows is empirically inadequate

BOOK JACKET **The Morphosyntax of Reiteration in Creole and Non-Creole Languages** Enoch O. Aboh, Norval Smith, Anne Zribi-Hertz, 2012-06-27 This is a new contribution to a theory of reiteration in natural languages with a special focus on creoles Reiteration is meant to denote any situation where the same form occurs at least twice within the boundaries of some linguistic domain By including two case studies bearing on Hebrew and Breton alongside five chapters on creole languages Surinam creole Haitian Mauritian S o Tom and Pichi this volume brings counter evidence to the claim that reiteration phenomena are particularly typical of creoles And by exploring the syntax of reiteration alongside its morphology the authors are led to challenge the iconic theory of reduplication proposed in several other studies of similar phenomena This volume will be relevant for creole studies but also for readers more generally interested in language universals and the architecture of grammars

Morphological Length and Prosodically Defective Morphemes Eva Zimmermann, 2017 This work examines specific sound changes that cannot be explained by phonological means alone but crucially rely on morphological information It offers a unified theoretical account of these phenomena as well as a rich database of attested patterns in the world s languages

Word Knowledge and Word Usage Vito Pirrelli, Ingo Plag, Wolfgang U. Dressler, 2020-04-20 Word storage and processing define a multi factorial domain of scientific inquiry whose thorough investigation goes well beyond the boundaries of traditional disciplinary taxonomies to require synergic integration of a wide range of methods techniques and empirical and experimental findings The present book intends to approach a few central issues concerning the organization structure and functioning of the Mental Lexicon by asking domain experts to look at common central topics from complementary standpoints and discuss the advantages of developing converging perspectives The book will explore the connections between computational and algorithmic models of the mental lexicon word frequency distributions and information theoretical measures of word families statistical correlations across psycho linguistic and cognitive evidence principles of machine learning and integrative brain models of word storage and processing Main goal of the book will be to map out the landscape of future research in this area to foster the development of interdisciplinary curricula and help single domain specialists understand and address issues and questions as they are raised
