An Introduction to Jacob Boehme Ariel Hessayon, Sarah Apetrei, 2013-08-29 This volume brings together for the first time some of the world's leading authorities on the German mystic Jacob Boehme to illuminate his thought and its reception over four centuries for the benefit of students and advanced scholars alike Boehme's theosophical works have influenced Western culture in profound ways since their dissemination in the early 17th Century and these interdisciplinary

essays trace the social and cultural networks as well as the intellectual pathways involved in Boehme's enduring impact. The chapters range from situating Boehme in the 16th Century Radical Reformation to discussions of his significance in modern theology. They explore the major contexts for Boehme's reception including the Pietist movement, Russian religious thought and Western esotericism as well as focusing more closely on important readers: the religious radicals of the English Civil Wars and the later English Behmenists; literary figures such as Goethe and Blake; and great philosophers of the modern age among them Schelling and Hegel. Together the chapters illustrate the depth and variety of Boehme's influence and a concluding chapter addresses directly an underlying theme of the volume asking why Boehme matters today and how readers in the present might be enriched by a fresh engagement with his apparently opaque and complex writings.

What Is Happening? a Mystical Dialogue N. E. Boddy, 2008-01-21 All the so called higher religions are having a hard time coming to terms with modernism especially with the truths discovered by the scientific method. This applies even to Christianity which in some ways has been both the initiator and the long term opponent of modernism with which it has been battling for longer than the other religions. I believe that the central problem is a failure to recognise that science and religion use language in very different ways. Science and to some extent philosophy also attempts to arrive at the truth about the world by vigorously logical methods founded upon experimental testing a step by step procedure that hopefully approaches truth evermore closely. Religion on the other hand though it may have some very specific material and historical aspects is ultimately concerned to express and come to terms with truths that probably lie beyond the horizons of human understanding. Even where there may be some sort of divine revelation of religious truth this is inevitably expressed in the form of finite metaphor, poetry and myth. Above all I think that this means that religious language has to use a mythological method for conveying its ultimate truths. This is especially obvious in those areas of human concern which the theologians call eschatological that is the supposed truths about life after death and the final End and Destiny of Everything. If religions make the mistake of trying to reply to the challenges of science using prosaic matter of fact language they end up compromising their deepest truths which cannot be expressed in this way. What is needed instead is a readiness to use insightful imaginative and even speculative language the vehicle of mythopoeic thought in fact. This little book is just an attempt to suggest some outlines of a possible way of expressing the classical truths of the Christian faith in a contemporary mythological manner. I do not claim divine revelation for these ideas but I do hope that many will be encouraged to engage in a dynamic dialogue over them even believers in other religions. Reality is ultimately Unitary.

Aristotelians and Platonists Luigi Morelli, 2015-11-25 At the heart of this book is Rudolf Steiner's culmination in the twentieth century or the convergence of the working of Aristotelians and Platonists for the renewal of culture. And questions arise. Where is the whole of the School of Michael at present? How can we characterize and honor one and the other stream and avoid stereotypes and misunderstandings? This work approaches the matter in its historical unfolding in three successive steps in which Steiner

Aristotles and Plato Schrrers incarnations form a thread The first tableau opens up in the previous Age of Michael in Greece when Plato and Aristotle inaugurated the work of the two Michaelic streams The second addresses the Middle Ages and centers around the contrast between Alain de Lille and Thomas Aquinas between the School of Chartres and Scholasticism Steiners and Schrrers life tasks in the nineteenth century form the prelude to the present The heart of the book and its longest section looks at the present It contrasts the working of Aristotelians and Platonists in the natural sciences in psychology and in the social sciences From the ground of extensive observation and characterization it then turns to pressing questions What can Platonists learn from Aristotelians And how about the reverse Starting from the example of individuals meeting across the streams how can we extend this understanding so that it becomes an ongoing practice and a cultural concern How can Michaelic individuals and institutions work in ways that honor the whole of the Michaelic movement

Masters, and Teachers Rom Landau, 2011-03-23 Since I was a boy I have always been attracted by those regions of truth that the official religions and sciences are shy of exploring The men who claim to have penetrated them have always had for me the same fascination that famous artists explorers or statesmen have for others and such men are the subject of this book Some of them come from the East some from Europe and America some give us a glimpse of truth by the mere flicker of an eyelid while others speak of heaven and hell with the precision of mathematicians I have met them all and some I have watched in their daily lives For years now I have sought their company questioned them and watched them closely at work I have tried to dissociate the personality from the teaching and then to reconcile the two I have included some of those whom now I cannot view without mistrust Since thousands of other people believe in them they are at any rate most interesting figures in contemporary spiritual life however little of ultimate value their teaching may possess There are people who know the heroes of this book more intimately than I but my aim has never been to identify myself with any one teacher On the contrary I have always been anxious to discover for myself through what powers they have influenced so many people This attitude will warn the reader not to expect an impersonal survey of contemporary spiritual doctrines I have limited myself to writing of those men with whom I have been in personal contact I approach them not as the scholar but as the ordinary man who tries to find God in daily life

The Mystery of the Resurrection in the Light of Anthroposophy Sergei O. Prokofieff, 2010 We live today at a time when the full mystery of the Resurrection body can become manifest to human beings out of the inspirations of Michael This was accomplished by Rudolf Steiner not just in a theoretical sense but also practically and came about through the establishing of a path accessible to all human beings which leads to a union with the forces of the Resurrection body Sergei Prokofieff approaches the deepest mysteries of the Turning Point of Time the Christ event through Rudolf Steiner's spiritual research At its heart stands the question of the restoration of the phantom of the physical body and its transformation into the resurrected body of Christ through the Mystery of Golgotha The author draws a broad and differentiated picture of the tasks and possibilities that the Easter event as well as Ascension and Pentecost present both for the individual and humanity The final chapter considers the mystery of Easter Saturday through which the two polar aspects of the Mystery of Golgotha death and resurrection interconnect also explaining the relationship between the Earth Spirit and the interior of the Earth An appendix tackles the phenomenon of stigmatization from a spiritual scientific perspective

A Secret History of Consciousness Gary Lachman,2003-07 For the last four centuries science has tried to account for everything in terms of atoms and molecules and the physical laws they adhere to Recently this effort was extended to try to include the inner world of human beings Gary Lachman argues that this view of consciousness is misguided and unfounded He points to another approach to the study and exploration of consciousness that erupted into public awareness in the late 1800s In this secret history of consciousness consciousness is seen not as a result of neurons and molecules but as responsible for them meaning is not imported from the outer world but rather creates it In this view consciousness is a living evolving presence whose development can be traced through different historical periods and which evolves along a path to a broader more expansive state What that consciousness may be like and how it may be achieved is a major concern of this book Lachman concentrates on the period since the late 1800s when Madame Blavatsky first brought the secret history out into the open As this history unfolds we encounter the ideas of many modern thinkers from esotericists like P D Ouspensky Rudolf Steiner and Colin Wilson to more mainstream philosophers like Henri Bergson William James Owen Barfield and the psychologist Andreas Mavromatis Two little known but important thinkers play a major role in his synthesis Jurij Moskvitin who showed how our consciousness relates to the mechanisms of perception and to the external world and Jean Gebser who presented perhaps the most impressive case for the evolution of consciousness An important contribution to the study of consciousness a must read

Weird Mysticism Brad Baumgartner,2020-11-17 Weird Mysticism identifies and evaluates a new category of theoretical inquiry by showing the influence of speculative writing on three intersecting critical categories horror fiction apophatic mysticism and philosophical pessimism Exploring the work of Thomas Ligotti Georges Bataille and E M Cioran Baumgartner argues that these weird mystics employ an innovative mode of negative writing that seeks to merge new conceptions of reality While exploring perennial questions about the absolute the Outside and other philosophical concepts these authors push the limits of representation experimenting with literary form genre bending and aphoristic discourse As their works reveal the category of weird mysticism both conjoins and obscures the link between traditional mysticism and philosophical horror fiction with weirdness itself being the central magnet that draws the seemingly disparate realms of horror fiction philosophy and mysticism together Highlighting the theoretical stakes of the horror genre Baumgartner s study reveals how the mystical
