Karl Leyser, 1982-01-01 The inner workings of early medieval societies cannot be understood without also studying their links religious cultural economic and political with their neighbours In this collection Karl Leyser shows how Ottonian and Salian Germany both influenced and was influenced by the societies with which it came into contact While the author's central interest is in Germany his work is of value for the study of medieval European society as a whole Topographies of Power in the Early Middle Ages Frans Theuvs, Mayke B. de Jong, Carine Van Rhijn, 2001 Saint Maurice d'Agaune Gudme Vistula Francia Maastricht Aachen Gaul Cordoba

Unpredictability and Presence Hans Jacob Orning, 2008 This book applies a legal anthropological framework to high medieval Norwegian history It formulates the question of state formation in a new and challenging way by showing how the king a substantial degree based his dominion on unpredictability and presence

Carolingian Europe Stuart Airlie, 2018-02-06 A key theme in this collection of thirteen essays is the creative tension between the Carolingian dynasty and its aristocratic followers across 250 years The first section explores the rising dynasty's attempts to consolidate its power through war and rewards The second section focuses on the exercise of authority through a complex system of governance and representation and the pivotal role played by the courts of Charlemagne and his successors In the third section we see the Carolingian system undergoing a crisis of legitimacy challenged by civil war royal divorce and aristocratic encroachment on dynastic exclusivity These essays anatomise the dynamics of power relations in the greatest empire of the early medieval west

Memory and Gender in Medieval Europe, 900-1200 Elisabeth Van

Houts, 2016-07-27 Remembering the past in the Middle Ages is a subject that is usually perceived as a study of chronicles and annals written by monks in monasteries Following in the footsteps of early Christian historians such as Eusebius and St Augustine the medieval chroniclers are thought of as men isolated in their monastic institutions writing about the world around them As the sole members of their society versed in literacy they had a monopoly on the knowledge of the past as preserved in learned histories which they themselves updated and continued A self-perpetuating cycle of monks writing chronicles which were read updated and continued by the next generation so the argument goes remained the vehicle for a narrative tradition of historical writing for the rest of the Middle Ages Elisabeth van Houts forcefully challenges this view and emphasises the collaboration between men and women in the memorial tradition of the Middle Ages through both narrative sources chronicles saints' lives and miracles and material culture objects such as jewellery memorial stones and sacred vessels Men may have dominated the pages of literature from the period but they would not have had half the stories to write about if women had not told them thus the remembrance of the past was a human experience shared equally between men and women

Feudal Society Marc Bloch, 2002-11 Feudal Society discusses the social and economic conditions in which feudalism developed providing a deep understanding of the processes at work in medieval Europe

Feudal Society Marc Bloch, 2014-04-16 Marc Bloch said that his goal in writing Feudal Society was to go beyond the technical study a medievalist would typically write and dismantle a social structure In this outstanding and monumental work which has introduced generations of students and historians to the feudal period Bloch treats feudalism as a living breathing force in Western Europe from the ninth to the thirteenth century At its heart lies a magisterial account of relations of lord and vassal and the origins of the nature of the fief brought to life through compelling accounts of the nobility knighthood and chivalry family relations political and legal institutions and the church For Bloch history was a process of constant movement

and evolution and he describes throughout the slow process by which feudal societies turned into what would become nation states A tour de force of historical writing Feudal Society is essential reading for anyone interested in both Western Europe s past and present With a new foreword by Geoffrey Koziol *Encyclopedia of Historians and Historical Writing* Kelly Boyd,2019-10-09 The Encyclopedia of Historians and Historical Writing contains over 800 entries ranging from Lord Acton and Anna Comnena to Howard Zinn and from Herodotus to Simon Schama Over 300 contributors from around the world have composed critical assessments of historians from the beginning of historical writing to the present day including individuals from related disciplines like J rgen Habermas and Clifford Geertz whose theoretical contributions have informed historical debate Additionally the Encyclopedia includes some 200 essays treating the development of national regional and topical historiographies from the Ancient Near East to the history of sexuality In addition to the Western tradition it includes substantial assessments of African Asian and Latin American historians and debates on gender and subaltern studies

Medieval Politics and Modern Mentalities Timothy Reuter,2006-11-02 This is a collection of influential and challenging essays by British medievalist Timothy Reuter a perceptive and original thinker with extraordinary range who was equally at home in the Anglophone or German scholarly worlds The book addresses three interconnected themes in the study of the history of the early and high Middle Ages Firstly historiography the development of the modern study of the medieval past How do our contemporary and inherited preconceptions and pre occupations determine our view of history Secondly the importance of symbolic action and communication in the politics and polities of the Middle Ages Finally the need to avoid anachronism in our consideration of medieval politics Throwing light both on modern mentalities and on the values and conduct of medieval people themselves and containing articles at time of publication never previously been available in English this book is essential reading for any serious scholar of medieval Europe *A Companion to the Medieval World* Carol Lansing,Edward D. English,2012-12-26 Drawing on the expertise of 26 distinguished scholars this important volume covers the major issues in the study of medieval Europe highlighting the significant impact the time period had on cultural forms and institutions central to European identity Examines changing approaches to the study of medieval Europe its periodization and central themes Includes coverage of important questions such as identity and the self sexuality and gender emotionality and ethnicity as well as more traditional topics such as economic and demographic expansion kingship and the rise of the West Explores Europe s understanding of the wider world to place the study of the medieval society in a global context Authority in Byzantine Provincial Society, 950-1100 Leonora Neville,2004-08-19 The imperial government over the central provinces of the Byzantine Empire was sovereign and at the same time apathetic dealing effectively with a narrow set of objectives chiefly collecting revenue and maintaining imperial sovereignty Outside of these spheres action needed to be solicited from imperial officials leaving vast opportunities for local people to act independently without legal stricture or fear of imperial involvement In the absence of imperial intervention provincial households competed with each other for

control over community decisions The emperors exercised just enough strength at the right times to prevent the leaders of important households in the core provinces from becoming rulers themselves Membership in a successful household wealth capacity for effective violence and access to the imperial court were key factors that allowed one to act with authority This book examines in detail the mechanisms provincial households used to acquire and dispute authority A History of Medieval Political Thought Joseph Canning,2002-11-01 Incorporating research previously unavailable in English this clear guide gives a synthesis of the latest scholarship providing the historical and intellectual context for political ideas This accessible and lucid guide to medieval political thought gives a synthesis of the latest scholarship incorporates the results of research until now unavailable in English focuses on the crucial primary source material provides the historical and intellectual context for political ideas The book covers four periods each with a different focus 300 750 Christian ideas of rulership 750 1050 the Carolingian period and its aftermath 1050 1290 the relationship between temporal and spiritual power and the revived legacy of antiquity 1290 1450 the confrontation with political reality in ideas of church and of state and in juristic thought Canning has produced an ideal introductory text for undergraduate and postgraduate students of the period Europe in the High Middle Ages William Chester Jordan,2002-08-01 The most accessible up to date introduction to its subject does full justice to the multifarious forces at work in high gothic Europe Daily Telegraph The years from AD 1000 to the beginning of the fourteenth century were the most formative period in European history a time of intense social political cultural and religious change In this definitive work one of the world s leading medievalists explores a confident dynamic age far removed from our own Jordan writes elegantly and ironically giving the reader a broad but not dumbed down view of medieval society and its complexities A splendid start to Penguin s History of Europe series and a first rate work in its own right Kirkus Reviews The Penguin History of Europe series is one of contemporary publishing s great projects New Statesman **The Birth of the West** Paul Collins,2013-02-12 The tenth century dawned in violence and disorder Charlemagne s empire was in ruins most of Spain had been claimed by Moorish invaders and even the papacy in Rome was embroiled in petty provincial conflicts To many historians it was a prime example of the ignorance and uncertainty of the Dark Ages Yet according to historian Paul Collins the story of the tenth century is the story of our culture s birth of the emergence of our civilization into the light of day The Birth of the West tells the story of a transformation from chaos to order exploring the alien landscape of Europe in transition It is a fascinating narrative that thoroughly renovates older conceptions of feudalism and what medieval life was actually like The result is a wholly new vision of how civilization sprang from the unlikeliest of origins and proof that our tenth century ancestors are not as remote as we might think *Barbarian Queens and the Conversion of Europe* Burnam W. Reynolds,2024-11-19 The conversion of the Roman Empire to Christianity occurring in the golden glint of the sunset of the Ancient World was not a concluding chapter but an opening one The sequential conversion of the barbarian tribal invaders of the Empire and the subsequent conversion of those beyond the old

imperial times was the making of European culture a prototypical Christendom. The process has been well studied from the perspective of kings, popes and missionaries by some of the finest historians of our era. But the missing component in this civilizational change is that of the decisive influence of barbarian queens, Christian women who led their royal husbands in the dangerous journey from one religion to another. In recent years much has been done to illuminate queenship in general but a study focusing specifically on the queen's role in conversion is lacking. This book seeks to remedy that and provide a missing piece in women's history.

The Formation of the English Kingdom in the Tenth Century George Molyneux, 2017-11-03. The central argument of *The Formation of the English Kingdom in the Tenth Century* is that the English kingdom which existed at the time of the Norman Conquest was defined by the geographical parameters of a set of administrative reforms implemented in the mid to late tenth century and not by a vision of English unity going back to Alfred the Great 871-899. In the first half of the tenth century successive members of the Cerdicing dynasty established a loose domination over the other great potentates in Britain. They were celebrated as kings of the whole island but even in their Wessex heartlands they probably had few means to regulate routinely the conduct of the general populace. Detailed analysis of coins, shires, hundreds and wapentakes suggests that it was only around the time of Edgar 957-997 that the Cerdicing kings developed the relatively standardised administrative apparatus of the so-called Anglo-Saxon state. This substantially increased their ability to impinge upon the lives of ordinary people living between the Channel and the Tees and served to mark that area off from the rest of the island. The resultant cleft undermined the idea of a pan-British realm and demarcated the early English kingdom as a distinct and coherent political unit. In this volume George Molyneux places the formation of the English kingdom in a European perspective and challenges the notion that its development was exceptional. The Cerdicings were only one of several ruling dynasties around the fringes of the former Carolingian Empire for which the late ninth, tenth and eleventh centuries were a time of territorial expansion and consolidation.
