Running With The Caribou:

Running with the Caribou Pete Sarsfield, 1997 **Wolves on the Hunt** L. David Mech, 2015-05-22 The interactions between apex predators and their prey are some of the most awesome and meaningful in nature displays of strength endurance and a deep coevolutionary history And there is perhaps no apex predator more impressive and important in its hunting or more infamous more misjudged than the wolf Because of wolves habitat speed and general success at evading humans researchers have faced great obstacles in studying their natural hunting behaviors The first book to focus explicitly on wolf hunting of wild prey *Wolves on the Hunt* seeks to fill these gaps in our knowledge and understanding Combining behavioral data thousands of hours of original field observations research in the literature a wealth of illustrations and in the e book edition and online video segments from cinematographer Robert K Landis the authors create a compelling and complex picture of these hunters The wolf is indeed an adept killer able to take down prey much larger than itself While adapted to hunt primarily hoofed animals a wolf or especially a pack of wolves can kill individuals of just about any species But even as wolves help drive the underlying rhythms of the ecosystems they inhabit their evolutionary prowess comes at a cost wolves spend one third of their time hunting the most time consuming of all wolf activities and success at the hunt only comes through traveling long distances persisting in the face of regular failure detecting and taking advantage of deficiencies in the physical condition of individual prey and through ceaseless trial and error all while risking injury or death By describing and analyzing the behaviors wolves use to hunt and kill various wild prey including deer moose caribou elk Dall sheep mountain goats bison musk oxen arctic hares beavers and others *Wolves on the Hunt* provides a revelatory portrait of one of nature s greatest hunters **Anthropological Papers of the American Museum of Natural History** , 1917

Western Field , 1902 *The Wolves of Mount McKinley* Adolph Murie, 2011-12-01 In the time of Lewis and Clark wolves were abundant throughout North America from the Arctic regions to Mexico But man declared war on this cunning and powerful animal when cattle replaced the buffalo on the western plains reducing the wolf s range to those few areas in the Far North where economic necessity did not call for its extinction Between 1939 and 1941 Adolph Murie one of North America s greatest naturalists made a field study of the relationship between wolves and Dall sheep in Mount McKinley National Park since renamed Denali National Park which has come to be respected as a classic work of natural history In this study Murie not only described the life cycle of Alaskan wolves in greater detail than has ever been done but he discovered a great deal about the entire ecological network of predator and prey The issues surrounding the survival of the wolf and its prey are more important today than ever and Murie helps us understand the careful balance that must be maintained to ensure that these magnificent animals prosper Originally available only in government publications which are long out of print this account of a much maligned animal is now available in its first popular edition **The Wolves of Mount McKinley** Adolph Murie, 1944 Based on a field study of the ecological relationship between the timber wolf *Canis lupus*

pambasileus and the Dall sheep *Ovis dalli dalli* 1934 41 includes sections on the ecology of the caribou moose grizzly bear red fox *Vulpes kenaiensis* and golden eagle

A Preliminary Survey of Faunal Relations in National Parks George Melendez Wright, Joseph Scattergood Dixon, Benjamin Hunter Thompson, 1933

Visual Perception Vicki Bruce, Mark A. Georgeson, Patrick R. Green, 2014-08-27 This comprehensively updated and expanded revision of the successful second edition continues to provide detailed coverage of the ever growing range of research topics in vision In Part I the treatment of visual physiology has been extensively revised with an updated account of retinal processing a new section explaining the principles of spatial and temporal filtering which underlie discussions in later chapters and an up to date account of the primate visual pathway Part II contains four largely new chapters which cover recent psychophysical evidence and computational model of early vision edge detection perceptual grouping depth perception and motion perception The models discussed are extensively integrated with physiological evidence All other chapters in Parts II III and IV have also been thoroughly updated

Shopping for Porcupine Seth Kantner, 2008 His story begins with the arrival of his father Howard Kantner to the remote Arctic of the 1950s and ends with him as a grown man settled in the same landscape Through a series of moving essays and vivid photographs ranging in subject from family histories to hunting stories celebrations of people and places to a lament over a majestic wilderness rapidly disappearing Shopping for Porcupine provides a compelling intimate view of America's last frontier the same place that captivated so many readers of *Ordinary Wolves*

Ecology and Literatures in English Françoise Besson, 2018-12-14 In all latitudes writers hold out a mirror leading the reader to awareness by telling real or imaginary stories about people of good will who try to save what can be saved and about animals showing humans the way to follow Such tales argue that in spite of all destructions and tragedies if we are just aware of and connected to the real world around us to the blade of grass at our feet and the star above our heads there is hope in a reconciliation with the Earth This may start with the emergence or rather the return of a nonverbal language restoring the connection between human beings and the nonhuman world through a form of communication beyond verbalization Through a journey in Anglophone literature with examples taken from Aboriginal African American English Canadian and Indian works this book shows the role played by literature in the protection of the planet It argues that literature reveals the fundamental idea that everything is connected and that it is only when most people are aware of this connection that the world will change Exactly as a tree is connected with all the animal life in and around it texts show that nothing should be separated From Shakespeare's theatre to ecopoetics from travel writing to detective novels from children's books to novels all literary genres show that literature responds to the violence destroying lands men and nonhuman creatures whose voices can be heard through texts

Ethical Encounters Janne

Korkka,2013-09-01 The problems of knowing and representing the other are acute every time we encounter a text as writers or readers *Ethical Encounters* engages with the representation of encounters with alterity in the writings of the Canadian author Rudy Wiebe Drawing on Emmanuel Levinas's philosophy on the ethics of encountering the other the book argues that Wiebe's writings show that the self's knowledge offers an inadequate basis for ethically valid representations of those encounters In the search for ethical ways of engaging with alterity Wiebe's writings offer new ways of employing silence and the presence of the unknowable as means to explore encounters with alterity *Ethical Encounters* shows that dividing Wiebe's work into two sharply distinct categories of Mennonite and First Nations writings overlooks important connections between the author's central works and may seriously hinder the interrogation of narrative engagement with alterity While such human encounters resonate against ethical strategies of representation the greatest challenge for the ethics of encounter in Wiebe's texts arises in encounters with the alterity of space *Ethical Encounters* engages with both physical and narrative spaces which are not permanently fixed in landscape or geography or in human perceptions of place arguing that the most radical expressions of alterity in Wiebe's writings emerge in encounters with the spaces of the Canadian North The study raises questions about the relationship between the self and the other as they concern knowing what does the self know when it claims to know another person or space How does the narrating self negotiate the seeming collapse of its own knowledge when it encounters others whose stories cannot be known *Ethical Encounters* casts new light not just on Wiebe's writings but also on how we as authors and readers engage with expressions of alterity which refuse to be transformed into familiar knowable forms Janne Korkka is post doctoral researcher and coordinator of the North American Studies programme in the Department of English University of Turku Finland His main research interests lie in the problems of representing space and encountering alterity in Canadian writing He is co editor of *Seeking the Self Encountering the Other Diasporic Narrative and the Ethics of Representation* 2008 He teaches Canadian and postcolonial literatures and North American Studies and publishes mainly on Canadian writing *Surviving 50 Below* Wendell Amisimak Stalker,2019-12-20 A collection of 5 historical fiction short stories about living a subsistence lifestyle Written in the Inupiat Eskimo style you can enjoy hunting fishing general living in a remote community above the Arctic Circle in Alaska *Harper's Magazine* Henry Mills Alden,Frederick Lewis Allen, Lee Foster Hartman,Thomas Bucklin Wells,1896 *Heart of the Bison* Glen R. Stott,2002-08-13 As the lambent light from the slumbering fire dances across the roof of the cave a young girl wakes from a dream Kec's dream tells her that her clan is in jeopardy and that Mother Earth expects her to do something to save her people A magic child will be sent to help her Far away Strong Branch a powerful Shaman of his people has his own dream The Great Spirit sends him a warning about a future of conflict and killing Kec's people are very simple but they are strong and powerful enough to have survived the ice ages of Pleistocene Europe by force for over one hundred thousand years Strong Branch's people are late comers from an alien world far to the South They bring an advanced technology that allows them to utilize the

environment in ways Kecs people never could As the population of the aliens has grown over a period of more than twenty thousand years the stress on the environment has become critical Kecs and Strong Branch must play their parts in a microcosm of the greater struggle for survival The conclusion of their struggle will establish a new story and a new history for each of their peoples **Canadian Journal of Zoology** ,1990 **Outing** ,1898
