Curtis, 2011-10-20 This is the third in an essential series of Springer handbooks that explore key aspects of the nexus between demography and social science With an inclusive international perspective and founded on the principles of social demography this handbook shows how the rural population which recently dropped below 50 per cent of the world total remains a vital segment of society living in proximity to much needed developmental and amenity resources The rich diversity of rural areas shapes the capacity of resident communities to address far reaching social environmental and economic challenges Some will survive become sustainable and even thrive while others will suffer rapid depopulation This handbook demonstrates how these future development trajectories will vary according to local characteristics including but not limited to population composition The growing complexity of rural society is in part a product of significant international variations in population trends making this comparative and comprehensive study of rural demography all the more relevant Collating the latest research on international rural demography the handbook will be an invaluable aid to policy makers as they try to understand how demographic dynamics depend on the economic social and environmental characteristics of rural areas It will also aid researchers assessing the unique factors at play in the rural context and endeavoring to produce meaningful results that will advance policy and scholarship Finally the handbook is an ideal text for graduate students in a spread of disciplines from sociology to international development

Ochoa, 2018-09-18 Mexico Beyond 1968 examines the revolutionary organizing and state repression that characterized Mexico during the 1960s and 1970s The massacre of students in Mexico City in October 1968 is often considered the defining moment of this period The authors in this volume challenge the centrality of that moment by looking at the broader story of struggle and repression across Mexico during this time Mexico Beyond 1968 complicates traditional narratives of youth radicalism and places urban and rural rebellions within the political context of the nation's Dirty Wars during this period The book illustrates how expressions of resistance developed from the ground up in different regions of Mexico including Chihuahua Guerrero Jalisco Mexico City Puebla and Nuevo León Movements in these regions took on a variety of forms including militant strikes land invasions cross country marches independent forums popular organizing and urban and rural guerrilla uprisings Mexico Beyond 1968 brings together leading scholars of Mexican studies today They share their original research from Mexican archives partially opened after 2000 and now closed again to scholars and they offer analysis of this rich primary source material including interviews political manifestos newspapers and human rights reports By centering on movements throughout Mexico Mexico Beyond 1968 underscores the deep rooted histories of inequality and the frustrations with a regime that monopolized power for decades It challenges the conception of the Mexican state as exceptional and underscores and refocuses the centrality of the 1968 student movement It brings to light the documents and voices of those who fought repression with revolution and asks us to rethink Mexico's place in tumultuous times Contributors Alexander Aviá Adela Cedillo A. Gender and the Life Course Alice S. Rossi, 1985-01-01 Gender and the Life Course is an interdisciplinary collection of essays on the lives of women and men as they are affected by history culture demography economic and political stratification and the biopsychological processes that attend maturation and aging The book covers three major topics Part I which examines gender and the life course in broad historical perspective includes a summary of recent work in biological ecology and primatology and an analysis of the

persistence of cultural and gender differences in role organization in societies undergoing the transition from agrarianism to industrialism Other essays trace the changes in sources of household income of industrial workers over the life span and review temporal and gender differences in life span transitions Part II examines gender differentiation in a variety of contexts psychological psychobiological and sociological Alice Rossi's ASA Presidential Address reviews recent work on fathering and mothering and argues that sociological explanations of such gender differences need supplementation by concepts from evolutionary theory and the neurosciences Three essays deal with gender and economy one shows how gender stratification took hold in the early stages of industrialization in France another demonstrates the persistence of gender stratification in modern economies the third focuses on ideology in relation to gender and political power Part III examines various aspects of the aged in contemporary society including an argument for an interpretive social science that uses diverse methods to improve our ability to describe and interpret many facets of the lives of elderly men and women a review of the methodology used to study changes in the aged population over time and an overview of existing data sets that permit further cohort and longitudinal analyses of the aged The final essays review social policies as they affect the elderly with particular attention to the fact that most very old people are women and the impact of the greatly expanded life course for family and kin relations

Gender and the Life Course is a state of the art assessment of the best work currently being done on gender and age as maturational factors and is essential reading for anyone interested in adult development and gender roles Reforming Mexico's Agrarian Reform Laura Randall, 2016-09-16 This work provides a survey and analysis of Mexico's agrarian reform covering topics such as the agricultural provisions of NAFTA The book also discusses the events in Chiapas that are crucial to Mexico's current political situation and the implications of reform for US Mexican trade *The National System of Education in Mexico* Cameron Duncan Ebaugh, 1931 Mexico's Political Stability Roderic Ai Camp, 2019-08-28 Mexico is undergoing its worst economic crisis since the world depression of the 1930s In this volume contributors analyze significant patterns that might affect political stability and legitimacy economic viability and social change over the next several years often reaching controversial conclusions They argue for example that the military is not likely to change its present civil military role that political opposition rather than political violence or pressure from foreign governments will have the most profound influence on the changing pattern of political legitimacy and system stability and that decision making in the private sector may have the greatest potential to resolve or exacerbate the current crisis Finally they suggest that because economic conditions have been altered so dramatically in the recent period Mexican policymakers will need to develop a new range of political alternatives to stabilize the economy and redirect the country's future **México Between Feast and Famine** Enrique C. Ochoa, 2025 As debates around food sovereignty globalization and sustainable development intensify globally *Mexico Between Feast and Famine* provides timely analysis that counters conventional narratives about Mexican cuisine Historian Enrique C Ochoa examines the rise of Mexico's corporate food system contextualized by the long history of

colonialism Ochoa also looks to the future offering a vision of more equitable and sustainable food systems that prioritize social justice and community well being

The Population of Mexico Francisco Alba, Providing a concise comprehensive overview of Mexico s population its history current demographic features and future growth potential Alba establishes the bases of Mexico s ongoing population boom placing it in its social context He also considers repercussions of past and present demographic trends and evaluates current population policies as set by the Mexican government Presented in a readily accessible format and highlighted by a generous number of tables and charts available to an English speaking audience for the first time Alba s critical data on contributory demographic phenomena a sustained high fertility rate steadily declining mortality rate migratory movements urbanization and economically active population segments illuminate the basic trends of Mexico s population since the 1910 Revolution Alba offers the first authoritative account of the population of Mexico a country that has experienced not only a population explosion but a simultaneous urban explosion Combining demographic data with an analysis of future trends in the economy culture and social health of Mexican society The Population of Mexico is not only a landmark achievement in its own right but also a model for how population explosions will affect the general development of the Third World Alba believes that family planning as a tool of demographic policy may not have the expected societal results Its choice is due to reluctance to define population policies and set target levels and rates for demographic variables Attainment of a demographic objective does not necessarily mean that the only or even the most appropriate tools are demographic Entry by increasing numbers of women into the work force and participation of all population sectors in the benefits options and accomplishments of development can be more effective in reducing birth rates than any measures of inducement or coercion Family planning should be incorporated into other economic and social programs
