*The Failure of National Rural Policy* William Paul Browne, 2001 Modern farm policy emerged in the United States in 1862 leading to an industrialized agriculture that made the farm sector collectively more successful even as many individual farmers failed Ever since a healthy farm economy has been seen as the key to flourishing rural communities and the problems of rural nonfarmers former farmers nonfarm residents and unfarmed regions were ignored by policymakers In *The Failure of National Rural Policy* William P Browne blends history politics and economics to show that federal government emphasis on farm productivity has failed to meet broader rural needs and actually has increased rural poverty He explains how strong public institutions which developed agrarianism led to narrowed concepts of the public interest Reviewing past efforts to expand farm policy benefits to other rural residents Browne documents the fragmentation of farm policy within the agricultural establishment as farm services grew the evolution of political turf protection and the resultant difficulties of rural advocacy Arguing for an integrated theory of governing institutions and related political interests he maintains that nonfarm rural society can make a realistic claim for public policy assistance Written informally each chapter is followed by comments on the implications of its topics and summaries of key points The book will serve as a stimulating text for students of public policy national affairs rural sociology and community development as well as anyone concerned with the future of agrarian America
