these is applied to the same population of households to identify the poor in rural Wuding County Yunnan Province The analysis shows that there is in fact very little overlap of households identified as poor by the various means and that choice of approach does matter in the outcome of who is identified as poor This has implications at the theoretical methodological and policy levels Lu discusses these in detail concluding that at present there is a need to shift away from poverty reduction strategies that narrowly emphasize income generation activities as these are often short term efforts Instead the focus should move towards a broader combination of short term and long term strategies to break poverty's inter linked structural causes
