British Weapons Acquisition Policy and the Futility of Reform Warren A. Chin,2019-09-17 Originally published in 2004 This incisive work reveals the causes of escalating costs and delays in British defence procurement from 1945 to the present Tackling a complex subject in a straightforward and readable manner it considers how successive British governments reacted to this problem why they adopted the reforms they did and why these reforms failed to have any meaningful effect on the operation of this process The study draws upon a number of disciplines such as economics politics and science and engineering to provide a broad synthesis that allows the reader to understand the technicalities of the process The conclusion reached is that there is no apparent solution to the problem of intergenerational costs of weapons but that a key to controlling the growing cost of projects during their development lies in the construction of a more effective research and development strategy a path followed by Margaret Thatcher s predecessors and one that is also being advocated today
