Chinese Daigou: An Ethnography of Brokerage Practices and Mobility Politics in Globalized China Zhuoxiao Xie,2024-12-02 This book is an ethnography of Chinese daigou cross border shopping on the behalf of mainland Chinese customers and their mobilities practices Daigou practitioners predominantly women engage in selling purchasing and delivering goods between mainland China and overseas regions With the rise of the platform economy and mobile technologies daigou has evolved into a niche market contributing to the her economy and consumerism in China This ethnography provides a comprehensive exploration of the gendered technological practices of mobile communication and mobility politics between mainland China and Hong Kong depicting micro entrepreneurship place making and border crossing activities in three intersecting scenes Theoretically this book synthesizes the literature on mobilities science and technological studies service labor and mobile communication It offers a fresh perspective by focusing on the mobile communication that both produces and is produced by mobilities of people data objects and technologies The study expands theories of mobility politics by developing a heuristic model of brokerage theorizing the communication processes through which daigou as brokers influence manage or facilitate multiple forms and meanings of mobilities in globalized China From a feminist science and technology perspective the book examines how daigou scenarios embed gender specific concepts into technological practices reinforcing entrenched unequal gender relations in service labor and family contexts It interrogates the mechanisms of unequal mobilities associated with the logic of brokerage which strengthens the differentiation of gender technology and labor among different parties These brokerage processes multiply the discrepancies in mobilities exacerbating gaps in structural relationships and becoming significant mechanisms of inequality

Practitioner's Guide to the CISG Camilla Baasch Andersen, Bruno Zeller, 2010-11-01 With the growing complexity of international trade practitioners in commercial law increasingly need access to scholarly sources and foreign case law A goal of the United Nations Convention on the International Sale of Goods CISG has been the standard of a global jurisconsultorium where judges and arbitrators would share resources and consult what has been done in foreign jurisdictions However without the prior work of material collecting proper translation into English and organization of the resulting abundance of material compliance with this goal would be impossible The Practitioner's Guide to the CISG is a direct answer to that need and a decisive step toward fulfilling that goal Written by three scholars from six different countries the book represents the best analyses of CISG cases available anywhere The chapters that follow provide legal counsel with easy organized access to key legal case abstracts drawn from multiple jurisdictions and valuable summary comments on each article of the CISG *A Practitioner's Guide to European Patent Law* Paul England, 2025-08-21 This new edition offers a comprehensive and practical guide to European patent law This book uniquely addresses European patent law using a thematic approach assessing the national and EPO approaches together rather than in nation by nation chapters Each chapter therefore enables the common ground and differences between approaches to be assessed The most influential European patent law jurisdictions are covered in the book including the leading cases from the European Patent Office England and Wales France Germany and the Netherlands The book also draws insights from further afield with contributions from other very active patent jurisdictions including Italy Sweden Denmark and Switzerland In addition to featuring completely revised content on the fast moving subject areas of FRAND and plausibility and updates in all other areas of patent law the third edition includes for the first time fully integrated coverage of every substantive decision of the Unified Patent Court A must read for anyone working in the field of European patent law Veterinary Medicine, 1915 *The Law on Medicines* H.S. Harrison, 2012-12-06 The Medicines Act 1968 together with its delegated legislation comprehensively controls the manufacture packaging labelling distribution and promotion of medicines for both human and animal use in the United Kingdom It also controls the import and export of such medicines It replaced a patchwork of controls which evolved over a century Since its enactment more than 150 items of delegated legislation orders and regulations have been made under its provisions and about 130 are still operative The sheer physical bulk of this mass of material causes difficulty not only in comprehension but also in finding the detail so often required The situation is exacerbated by the fact that some pieces of legislation have been amended several times My principal aim is to provide a reference book which contains all of the provisions of the Act and its various orders regulations as amended to date The material is arranged to facilitate the

search for detail In order to assist the reader in finding his way through this maze Chapter 1 consists of a survey of the situation which existed before the Act came into being together with a synopsis of the present controls This should enable the reader to appreciate the changes which have occurred and how the system works
