knowledge of the animals plants and other organisms that live in the marine world we cannot hope to support or implement successful conservation and management measures nor truly appreciate the incredible wealth and variety of marine life The Marine World is the product of a lifetime spent by Frances Dipper happily observing and studying marine organisms the world over It has been brought to colourful life by a myriad of enthusiastic underwater photographers and by Marc Dando the renowned natural history illustrator An Illustrated Pocket Guide to the Sharks of the World David A. Ebert, Sarah Fowler, Sarah L. Fowler, 2014-06-16 Sharks are probably the most misunderstood animals on the planet We all still have a lot to learn about these fascinating creatures which are sadly more seriously threatened with extinction and in greater need of conservation and management action than any other major group of vertebrates We have produced this guide not just because we and so many other people love sharks It is also because their identification whether of living animals fishery catches or body parts sold at markets is an essential tool to support shark conservation fisheries management and international trade regulation prevent further depletion of stocks and enable their recovery the first pocket guide to all 501 shark species all species illustrated and described handy compact format with concise text a six page guide to shark teeth identification an eight page guide to the identification of the shark fins most commonly encountered in the fin trade Colour plates are by Marc Dando from the hugely acclaimed Sharks of the World A Fully Illustrated Guide , **A study of shark and ray non-fin commodities in Indonesia** Muttaqin, E., Simeon, B., Dharmadi, M.I., Prasetyo, A.P., Booth, H., Yulianto, I., 2024-07-16 The work presented here summarizes published research from Indonesia also linked to an FAO summary plus studies from India Indonesia and Peru In collaboration with various country programmes and local research groups the Food and Agriculture Organization of the United Nations FAO examined shark and ray value chains The goal was to provide valuable information for fisheries and environmental agencies shedding light on the role of non fin commodities derived from sharks and rays in fisheries and trade To effectively conserve shark and ray resources we must adopt a more holistic understanding of their fisheries and markets Historically the focus has primarily centred on regulating the export of shark fins often overlooking traditional and emerging fishing practices and markets related to other elasmobranch products such as meat skin cartilage liver oil and gill plates Due to limited examination of non fin commodities we lack clarity on their sources the extent of exploitation and their significance as drivers of elasmobranch utilization This report aims to shift attention towards non fin commodities in shark and ray management By doing so we hope to expand the range of potential interventions that can be employed to achieve sustainable elasmobranch fisheries a critical source of food security nutrition and livelihoods for coastal communities worldwide **NOAA Technical Report NMFS.** , 1984
