Koerner, 1975-01-01 This volume reflects the fact that the possibilities in theory construction allow for a much wider spectrum than students of linguistics have perhaps been led to believe It consists of articles by scholars of differing generations and widely varying academic persuasions some have received their initiation to the trade within the framework of transformational generative grammar some in one or the other structuralist mould yet

others in the philology and linguistics of particular languages and language families They all share however some doubts concerning characteristic attitudes and procedures of present day mainstream linguistics All want not a uniformity of ideological stance but a union of individualists working towards the advancement of theory and empirical accountability

Pronouns □ Grammar and Representation Horst J. Simon, Heike Wiese, 2002-09-27 The contributions of this thematic collection center around the typology of pronominal paradigms the generation of syntactic and semantic representations for constructions containing pronouns and the neurological underpinnings for linguistic distinctions that are relevant for the production and interpretation of these constructions They come from different theoretical approaches and methodological backgrounds and take into account data from a wide range of Indoeuropean and non Indoeuropean languages Bringing together a cross section of recent research on the grammar and representation of pronouns the volume offers a kaleidoscope of studies united by the common topic of pronouns as a domain of language that exemplarily shows the interaction of different components responsible for computational syntactic and semantic lexical and discourse pragmatic processes **A**
