Prisons, Punishment, and the Family Rachel Condry, Peter Scharff Smith, 2018 Every year millions of families are affected by the imprisonment of a family member Children of imprisoned parents alone can be counted in millions in the USA and in Europe It is a bewildering fact that while we have had prisons for centuries and the deprivation of liberty has been a central pillar in the Western mode of punishment since the early nineteenth century we have only relatively recently embarked upon a serious discussion of the severe effects of imprisonment for the families and relatives of offenders and the implications this has for society This book draws together some of the excellent research that addresses the impact of criminal justice and incarceration in particular upon the families of offenders It assembles examples of recent and ongoing studies from eight different countries in order to not only learn about the secondary effects and collateral consequences of imprisonment but also to understand what the experiences and lived realities of prisoners families

means for the sociology of punishment and our broader understanding of criminal justice systems While punishment and society scholarship has gained significant ground in recent years it has often remained silent on the ways in which the families of prisoners are affected by our practices of punishment This book provides evidence of the importance of including families within this scholarship and explores themes of legitimacy citizenship human rights marginalization exclusion and inequality

Handbook on Prisons Yvonne Jewkes, Ben Crewe, Jamie Bennett, 2016-02-23 The second edition of the Handbook on Prisons provides a completely revised and updated collection of essays on a wide range of topics concerning prisons and imprisonment. Bringing together three of the leading prison scholars in the UK as editors, this new volume builds on the success of the first edition and reveals the range and depth of prison scholarship around the world. The Handbook contains chapters written not only by those who have established and developed prison research but also features contributions from ex-prisoners, prison governors, and ex-governors, prison inspectors, and others who have worked with prisoners in a wide range of professional capacities. This second edition includes several completely new chapters on topics as diverse as prison design, technology in prisons, the high security estate, therapeutic communities, prisons and desistance, supermax and solitary confinement, plus a brand new section on international perspectives. The Handbook aims to convey the reality of imprisonment and to reflect the main issues and debates surrounding prisons and prisoners while also providing novel ways of thinking about familiar penal problems and enhancing our theoretical understanding of imprisonment. The Handbook on Prisons, Second edition, is a key text for students taking courses in prisons, penology, criminal justice, criminology, and related subjects and is also an essential reference for academics and practitioners working in the prison service or in related agencies who need up-to-date knowledge of thinking on prisons and imprisonment.

On the Alternative Punishment to the Death Penalty in China Gui Huang, 2024-04-17 This book presents a study of alternative penalties to the death penalty in China, aiming to promote theoretical exploration of death penalty reform in China as well as long-term penal reform. Currently, China is endeavouring to control the use of the death penalty and is gradually moving towards its abolition. The factors influencing the choice of the punishment option to replace the death penalty are complex and varied and include the traditional punishment culture, penalty concepts, the political system, the punishment system, public opinion, and human rights, etc. Given the differences between China and developed Western democratic states, when we examine these influencing factors, we cannot ignore the culture of the punishment and the special political and legislative system in China. In this light, this work examined and analysed the factors that influence the choice of punishment option to replace the death penalty in this special political system with its clearly Chinese characteristics. Criminal policy and public opinion are two significant and typical factors involving obvious political considerations in China. The former normally reflects and carries out the will of the Government as expressed to the national management; the latter responds to the majority of citizens' view on the current legal system and it is to a great extent the basis for national leadership's running of the country. Even though life imprisonment without release hereinafter (LWOR) has been stipulated by the Ninth Amendment for the crime of corruption, it should not be the preferable option as the alternative sanction to the death penalty because it is a kind of cruel torture and violates the constitutional principle of human rights protection. On the contrary, life imprisonment with possibility of release hereinafter (LWPR) would be an option, but the termination mechanisms for inmates should be set out in accordance with the principle of

proportional justice aggravated life imprisonment can be chosen to replace the death penalty in China. In addition, there needs to be improvements made to the relevant criminal systems. By examining China's death penalty reform and long-term imprisonment reform, this book not only explains the methodology of the reform theoretically but also pays attention to the issues of legislation and judicial practice. This book is of interest to scholars and researchers in the fields of criminal justice, penal reform, issues, and crime control in China.
