this book began with a course I created and taught called Animal Behavior I always knew that there was a strong magnetic bond between people and animals but it wasn't until I began working on my curriculum that I truly found out how strong this bond really was Millions of people young and old will visit zoos and aquariums each year People stand in front of the animals hypnotized by the every movement of the animal People seemed to be looking not just at the animal but almost as if they were looking inside these animals wondering and questioning about the lives of some of our most distant animal relatives In my classroom I found the exact same kinds of responses The discussions and questions of my students motivated me to share with you the lives and abilities of some of the most amazing living creatures in the world People realize that humans are also animals but the belief that we have superior intelligence and problem solving abilities makes us think we are far superior to all of the rest of our Animal World As I began to learn more and lead my student discussions I soon realized that maybe our intelligence was the only thing that we really did have in our superiority over the rest of our animal relatives I began to look into the idea of comparing humans to animals in a wide variety of behaviors and activities and soon a brand new window into the REAL world of animals began to open up I soon realized that even the most insignificant animals in our world were really superstars when compared to humans By using math we are able to truly get a comparison of animals and how they relate to our own human abilities As I began to create the problems and do the math it became very evident that I began to get the responses that I had hoped for I soon began to call these responses the Wow factor A number of times the teachers that have worked on the problems would actually go back and do the problems a second time because there has to be a mistake or no way that this can be true There were no mistakes and the math did not lie The math allowed us to look at the animals in a totally different way I hope that you too will be amazed and wowed by some of these amazing animals that we share our world with

**Surface Diffusion** Grazyna Antczak, Gert Ehrlich, 2010-06-10 For the first time this book unites the theory experimental techniques and computational tools used to describe the diffusion of atoms molecules and nanoparticles across metal surfaces Starting with an outline of the formalism that describes diffusion on surfaces the authors guide the reader through the principles of atomic movement before moving on to diffusion under special circumstances such as the presence of defects or foreign species With an initial focus on the behaviour of single entities on a surface later chapters address the movement of clusters of atoms and the interactions between adatoms While there is a special emphasis on experimental work attention is paid to the increasingly valuable contributions theoretical work has made in this field This book has wide interdisciplinary appeal and is ideal for researchers in solid state physics chemistry as well as materials science and engineering

Fifty Years from the Basement to the Second Floor Tom Colbert, 2023-10-06 In Fifty Years from the Basement to the Second Floor Tom Colbert former chief of justice of the Oklahoma Supreme Court shares his extraordinary life story a story of resilience determination and hope From his great great grandmother who though born into

slavery lived to be over 100 years old to his great grandfather who fought to be enrolled as a member of Creek Tribal Nation to his grandfather who walked over a mile home after being shot in the chest never giving up no matter how hard the journey was instilled into Tom at a very young age Born on December 30 1949 Tom was raised by his mother and grandparents in Sapulpa Oklahoma when segregation laws were in effect In fact a few days after Tom was born Ada Lois Sipuel Fisher had just started her second semester as a law student at the University of Oklahoma Law School after fighting for three years to be admitted there refusing to attend the makeshift Black only law school set up in the basement of the State Capitol Though racial segregation was deemed unconstitutional in 1954 integration was intentionally delayed in Tom s town and he didn t attend an integrated school until the fall of 1965 Although some teachers at his high school were welcoming many staff and students were not and Tom and his friends experienced racism bigotry and hatred despite being star athletes and diligent students Though he grew up in poverty and a world entrenched in systemic racism as well as dealt with family tragedies Tom beat impossible odds proving the naysayers of his youth wrong He not only worked hard and became an outstanding lawyer but reached the pinnacle of judiciary and became the first Black man in Oklahoma to do so Just like Ada Lois Sipuel Fisher Tom refused the basement and that noble resistance led him all the way to the second floor of the Oklahoma State Capitol
