Long March To Power:

From People's War to People's Rule Timothy J. Lomperis, 2000-11-09 Timothy Lomperis persuasively argues the ironic point that the lessons of American involvement in Vietnam are not to be found in any analysis of the war by itself. Rather, he proposes a comparison of the Vietnam experience with seven other cases of Western intervention in communist insurgencies during the Cold War era: China, Indochina, Greece, the Philippines, Malaya, Cambodia, and Laos. Lomperis maintains that popular insurgencies are manifestations of crises in political legitimacy which occur as a result of the societal stresses caused by modernization. Therefore, he argues, any intervention in a people's war will succeed or fail depending on how it affects this crisis. The unifying theme in the cases Lomperis discusses is the power of land reform and electoral democracy to cement political legitimacy and therefore deflect revolutionary movements. Applying this theory to the ongoing Sendero Luminoso insurgency in Peru, Lomperis makes a qualified prediction of that conflict's outcome. He concludes that a global trend toward democratization has produced a new era of people's rule.

Women and Gender in Chinese Studies Nicola Spakowski, Cecilia Nathansen Milwertz, 2006 The State of the World's Girls report has tackled many topics: girls in the global economy, education, girls affected by conflict and by disaster, the new digital world and its implications, both negative and positive for girls' lives, the challenges and risks of increasing urbanisation, working with men and boys, and looked at attitudinal, structural, and institutional barriers to gender equality.

Politics and Purges in China Frederick C. Teiwes, 1993 Drawing upon released documents, memoirs, and party history works, the process and impact of the political campaigns in China between 1950 and 1965 is documented. Complete with extensive interviews with Chinese scholars and former officials, the book reviews the findings of the first edition.

China in Transformation Colin Mackerras, 2014-06-11 In the first half of the twentieth century, China moved from a millennium of imperial rule to the Communist Party-led People's Republic of China, which remains today. *China in Transformation* argues that this enormously significant period in Chinese history saw wrenching change throughout Chinese society, amounting to a social, cultural, and political transformation. This new, fully revised and updated edition takes full advantage of new research and formerly unavailable material to analyse the fascinating processes of revolution, reform, reaction, and change in China during the period. Mackerras discusses the wars, occupations, and uprisings that marked the period, including the Boxer Rebellion and the Japanese occupation, and includes a new chapter on postwar China and the Civil War. Examines nation building and revolutions, including the successful communist movement that has led to the rise of today's state. Acknowledges the prevalence of poverty and famine in the period but also gives space to the areas in which there was progress: the introduction of mass secular education, improvements in the status of women, and in a new chapter, details significant developments in culture, literature, and theatre. Written in an accessible style with a rich collection of documents, chronology, glossary, a guide to further reading, and a Who's Who summarising the careers and contributions of the main figures, this new edition is essential for all those interested in

understanding China's modern history *The Militarization and Weaponization of Space* Matthew Mowthorpe, 2004-01-01

The militarization of space began as a rivalry between the United States and the Soviet Union and grew to enormous proportions during the height of the Cold War. Satellite reconnaissance, navigation and weapons guidance and electronic intelligence comprise only a few of the efforts taken to militarize and dominate space. Today, as the prominence of information technology, computing and telecommunications advances, so does the concept of space as a battlefield. In *The Militarization and Weaponization of Space*, Matthew Mowthorpe diligently analyzes the military space policies of the United States, the Soviet Union, Russia and the People's Republic of China from the Cold War period to the present day. Mowthorpe focuses on the development of the ballistic missile defense and other anti-satellite systems and aptly assesses to what degree space will become armed. This work cogently addresses an issue of increasing urgency to scholars of international politics. **John Adams's *Nixon in China*** Professor Timothy A. Johnson, 2013-01-28

John Adams's opera *Nixon in China* is one of the most frequently performed operas in the contemporary literature. Timothy A. Johnson illuminates the opera and enhances listeners and scholars' appreciation for this landmark work. This music analytical guide presents a detailed in-depth analysis of the music tied to historical and political contexts. The opera captures an important moment in history and in international relations and a close study of it from an interdisciplinary perspective provides fresh, compelling insights about the opera. The music analysis takes a neo-Riemannian approach to harmony and to large-scale harmonic connections. Musical metaphors drawn between harmonies and their dramatic contexts enrich this approach. Motivic analysis reveals interweaving associations between the characters based on melodic content. Analysis of rhythm and meter focuses on Adams's frequent use of grouping and displacement, dissonances to propel the music forward or to illustrate the libretto. The book shows how the historical depiction in the opera is accurate yet enriched by this operatic adaptation. The language of the opera is true to its source but more evocative than the words spoken in 1972 due to Alice Goodman's marvelous poetic libretto. And the music transcends its repetitive shell to become a hierarchically rich and musically compelling achievement. **China's Emergence as a Defense Technological Power** Tai Ming Cheung, 2013-10-31

China is flexing its growing military and strategic clout in the pursuit of broadening national security interests. At the same time, the country's economic and technology policies have also become more nationalistic, state-centered and ambitious. China's defense economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities, although this is presently in the form of incremental and sustaining types of activities. More high-end disruptive forms of innovation that would lead to major breakthroughs are likely to be beyond China's reach in the near to medium term. This volume provides a wide-ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance. This collection of articles has three main goals: 1) to locate China's defense innovation dynamics within broader historical, technological and methodological frameworks of

analysis 2 to assess the performance of the Chinese defense economy's six principal subsectors and 3 to compare China's approach to defense industrialization with major counterparts in the Asia Pacific region. This book was originally published as a special issue of the Journal of Strategic Studies. *The Proceedings of 2023 International Conference on Wireless Power Transfer (ICWPT2023)* Chunwei Cai, Xiaohui Qu, Ruikun Mai, Pengcheng Zhang, Wenping Chai, Shuai Wu, 2024-03-12. This book includes original peer-reviewed research papers from the 2023 International Conference on Wireless Power Transfer ICWPT2023 held in Weihai, China. The topics covered include but are not limited to wireless power transfer technology and systems coupling mechanism and electromagnetic field of wireless power transfer systems, latest developments in wireless power transfer system and wide applications. The papers share the latest findings in the field of wireless power transfer, making the book a valuable asset for researchers, engineers, university students, etc.

Space, Politics, and Cultural Representation in Modern China Enhua Zhang, 2016-12-08. Regarding revolution as a spatial practice, this book explores modes of spatial construction in modern China through a panoramic overview of major Chinese revolutionary events and nuanced analysis of cultural representations. Examining the relationship between revolution, space, and culture in modern China, the author takes five spatially significant revolutionary events as case studies: the territorial dispute between Russia and the Qing dynasty in 1892, the Land Reform in the 1920s, the Long March 1934-36, the mainland-Taiwan split in 1949, and the Cultural Revolution 1966-76, and analyses how revolution constructs, conceives, and transforms space. Using materials associated with these events, including primarily literature as well as maps, political treatises, historiography, plays, film, and art, the book argues that, in addition to redirecting the flow of Chinese history, revolutionary movements operate in and on space in three main ways: maintaining territorial sovereignty, redefining social relations, and governing an imaginary realm. Arguing for reconsideration of revolution as a reorganization of space as much as time, this book will appeal to students and scholars of Chinese culture, society, history, and literature.

China and the World David Shambaugh, 2020-01-02. As the world evolves in increasingly unpredictable directions, one of the key determinants of the future global order will surely be the impact of China. No country and no society can escape China's reach; indeed, many seek its embrace. China brings benefits to many, but it's also a problematic interlocutor for others. In *China and the World*, one of the world's leading China specialists, David Shambaugh, has assembled fifteen leading international authorities on China to create the most comprehensive and up-to-date scholarly assessment of China's foreign relations and roles in international affairs. The volume covers China's contemporary position in all regions of the world, with all major powers, and across multiple arenas of China's international interactions. It also explores the sources of China's grand strategy, how the past shapes the present, and the impact of domestic factors that shape China's external behavior. *China and the World* is a uniquely focused and well-organized volume that provides many insights into China's calculations and behavior and identifies a number of challenges China will face in the future.

Wind Power in China Julia Kirch Kirkegaard, 2018-11-12. Whilst China's growing economy is widely regarded as

being responsible for severe environmental degradation and a high reliance on energy from fossil fuels China is emerging as a potential leader in new green energy technologies Outlining the extraordinary growth in China's wind power capacity since 2005 this book explores the deliberate creation of a whole industry and the strategy of transitioning the power sector to renewable energy by accelerated experimentation and through literally pushing the emerging wind power sector to its limits Investigating how wind power may not always be considered as sustainable in a wider Chinese developmental context the book traces the struggle China has had in getting this high technology sector to qualify as truly Chinese scientific development whilst often being opaquely at the mercy of foreign expertise technology and certification The book furthermore exposes the surprising nuances dynamics and potency of unexpected players in Chinese wind power marketisation Complex interplays are revealed between wind turbine control systems algorithms in critical software technology relationships between suppliers wind farm developers financiers the electrical grid itself the coal lobby the broader Chinese state and much more The book has important implications far beyond wind power and contemporary China studies highlighting the much wider story of China's fragmented and experimental style of innovating upgrading and greening

A Treatise on the Art of Weaving, with Calculations and Tables for the Use of Manufacturers ... Fourth Edition, Revised and Enlarged John Murphy (Writer on weaving), 1835

Experimental Beijing Sasha Su-Ling Welland, 2018-03-29 During the lead up to the 2008 Beijing Olympics the censorious attitude that characterized China's post 1989 official response to contemporary art gave way to a new market driven culture industry valuation of art Experimental artists who once struggled against state regulation of artistic expression found themselves being courted to advance China's international image In *Experimental Beijing* Sasha Su Ling Welland examines the interlocking power dynamics in this transformational moment and rapid rise of Chinese contemporary art into a global phenomenon Drawing on ethnographic fieldwork and experience as a videographer and curator Welland analyzes encounters between artists curators officials and urban planners as they negotiated the social role of art and built new cultural institutions Focusing on the contradictions and exclusions that emerged Welland traces the complex gender politics involved and shows that feminist forms of art practice hold the potential to reshape consciousness produce a nonnormative history of Chinese contemporary art and imagine other more just worlds

Revolution and Dictatorship Steven Levitsky, Lucan Way, 2024-10-29 Why the world's most resilient dictatorships are products of violent revolution *Revolution and Dictatorship* explores why dictatorships born of social revolution such as those in China Cuba Iran the Soviet Union and Vietnam are extraordinarily durable even in the face of economic crisis large scale policy failure mass discontent and intense external pressure Few other modern autocracies have survived in the face of such extreme challenges Drawing on comparative historical analysis Steven Levitsky and Lucan Way argue that radical efforts to transform the social and geopolitical order trigger intense counterrevolutionary conflict which initially threatens regime survival but ultimately fosters the unity and state building that supports authoritarianism Although most revolutionary governments begin weak

they challenge powerful domestic and foreign actors often bringing about civil or external wars These counterrevolutionary wars pose a threat that can destroy new regimes as in the cases of Afghanistan and Cambodia Among regimes that survive however prolonged conflicts give rise to a cohesive ruling elite and a powerful and loyal coercive apparatus This leads to the downfall of rival organizations and alternative centers of power such as armies churches monarchies and landowners and helps to inoculate revolutionary regimes against elite defection military coups and mass protest three principal sources of authoritarian breakdown Looking at a range of revolutionary and nonrevolutionary regimes from across the globe *Revolution and Dictatorship* shows why governments that emerge from violent conflict endure Revolutionary Discourse in Mao's Republic David Ernest Apter, Tony Saich, 1994 This unique interpretation of the revolutionary process in China uses empirical evidence as well as concepts from contemporary cultural studies Apter and Saich base their analysis on recently available primary sources on party history accounts of the Long March and Yan an period and interviews with veterans and their relatives **Petticoat Policy** Padma K, 2024-07-10 Radiating strength and confidence she seems impervious to the stress and pressures of life Her problems appear insignificant even if they are the same issues that tear others to pieces No matter what life throws at her career setbacks failed romances family conflicts you name it they all roll off her like water off a duck's back But little do people know that's exactly the image she meticulously crafts for the world Behind her carefully constructed facade lies a heart burdened with a darkness she is determined to conceal Beneath the exterior of unshakeable resilience she carries silent battles and unseen scars harbouring a depth of pain she dares not reveal *Wealth and Power* Orville Schell, John Delury, 2013 Two leading experts on China evaluate its rise throughout the past one hundred fifty years sharing portraits of key intellectual and political leaders to explain how China transformed from a country under foreign assault to a world giant **China in and Beyond the Headlines** Timothy B. Weston, Lionel M. Jensen, 2012-06-28 In the third volume of this popular series leading experts provide fascinating and unexpected insights into critical issues in today's China They address such key topics as civil society consumerism environmental adversity ethnic tension the Internet legal reform new media and social networking nationalist tourism sex and popular culture as well the costs of urban gigantism to portray the complexity of life in contemporary China and how increasingly it speaks to the everyday experience of Americans **AI and the Bomb** James Johnson, 2023 This book provides a coherent innovative and multidisciplinary examination of the potential effects of AI technology on nuclear strategy and escalation risk Its findings have significant theoretical and policy ramifications as well as contributing to the literature on the impact of military force and technological change
