Innovative Management of Atrial Fibrillation

David Schwartzman,Marco Zenati,2008-04-15 Atrial fibrillation is underdiagnosed and preventative strategies are
underutilized The disease is estimated to rise to an epidemic level increasing by over 50% by the end of the decade occurring
commonly in the setting of otherwise healthy aging Innovative Management of Atrial Fibrillation provides a forum for a full
discussion on this topical matter Distinguished experts from both electrophysiology and cardiac surgery place their work in
the context of future development examining the short comings of current pharmacological treatments This results in a
unique comprehensive review for cardiologists cardiac surgeons and anyone who wishes to gain a complete perspective on
the fast paced field of atrial fibrillation Material ranges from atrial pathophysiology to advanced minimally invasive surgical
ablation and cutting edge palliative and curative therapeutic options The book also includes the examination of innovative
management strategies and the next generation of therapies giving an essential insight into the emerging potential of gene

provides students and practitioners with a clear concise and user friendly manual on ear acupuncture It reduces the need for
memorization by presenting a method of ear acupuncture that is in keeping with the underpinnings of traditional Chinese
medicine The book can be independently studied and easily used to treat *Cognitive Behavioural Prevention of Suicide in
Psychosis* Nicholas Tarrier,Patricia Gooding,Daniel Pratt,2013 This practical and informative text lays out the product of a
number of years of clinical research into suicide behaviour and its prevention While the focus is on non affective psychosis
and the schizophrenia spectrum disorders the mechanisms underlying suicide behaviour in this group may well underlie or at
least influence suicide behaviour in other disorders The authors describe methods of assessment through individual
formulation and a cognitive behavioural intervention through case studies to reduce the risk of suicide This book argues that
Suicide behaviour lies on a cognitive behavioural continuum from ideation through intention to action Mechanisms based on
biased information processing systems the development of suicide schema and appraisal styles are likely to be fruitful in
explaining suicidal thoughts and behaviours A psychological theory of suicide behaviour is needed in order to develop a
mechanism of suicide and to understand the components of suicidal thoughts and behaviours Suicide risk can be reduced

through the use of the intervention methods described within the text Cognitive Behavioural Prevention of Suicide in Psychosis evaluates practical applications of contemporary research on this topic and will therefore be of interest to practitioners post graduates in training and researchers studying suicide and or psychosis

Mechanisms Underpinning the Link between Emotion, Physical Health and Longevity Andrew H. Kemp,2017-09-13

The 1990 s was designated as the decade of the brain and now common mental disorders are described as brain disorders Yet intense research interest on the brain has largely side lined the body as a passive observer disconnecting mental from physical health and contributing to further societal stigma on the nature of psychiatric illness and mental distress The biopsychosocial pathway to premature mortality or longevity is a complex one involving a host of closely intertwined mechanisms and moderating factors some of which are investigated in this special issue All the articles published here provide new insights into the pathways linking emotion physical health and longevity highlighting the tight linkage between mind brain and body
