

WHY LONG-TERM CARE PLANNING IS IMPORTANT

IN 2019

the federal Administration for Community Living (ACL) reported the US population older than 65 was over 54 million – up from 39.6 million in 2009.

BY 2040

the elder population is expected to reach close to 81 million. There were 6.6 million persons aged 85 or older in 2019 and that number is expected to more than double to 14 million by 2040.

THE ACL PREDICTS

that someone turning 65 today has an almost 70% chance of needing some type of long-term care at some point during the remainder of their life.

3 IS THE AVERAGE NUMBER

of years a person will need any type of long-term care. People will typically use in-home care services for twice as long as they will in-facility care services.

MOST LONG-TERM CARE

is not covered by Medicare or private health insurance and is an additional expense for persons who can afford to pay. If income eligibility requirements are met, Medicaid can provide long-term care benefits.
