Wolff-Michael Roth,2005-01-01 In a number of academic disciplines auto biography and auto ethnography have become central means of critiquing of the ways in which research represents individuals and their cultures Auto biography and auto ethnography are genres that blend ethnographic interests with life writing and they tell about a culture at the same time they tell about an individual life This book presents educational researchers in exemplary form the possibilities and constraints of both auto biography and auto ethnography as methods of doing educational research The contributors to this volume explore by means of examples auto biography and auto ethnography as means for critical analysis and as tool kit for the different stakeholders in education The four thematic sections deal with a different possible uses and constraints of the two methods b understanding teaching and teaching to learn c institutional critiques d experiences and trajectories as evidence of a sociology of everyday life The book was written to be used by upper undergraduate and graduate students taking courses in research design because of its practical approach it is highly suitable for those contexts where research methods courses do not exist The audience also includes professors who want to have a reference on design and methodology and those who have
