## Looking At Sculpture:

**How to Look At Sculpture** David Finn, 1989-04 It is my hope that through this book I can share with readers the excitement I feel in looking at sculpture all over the world This is a general book on how to appreciate sculpture not a lesson on any particular period or school or artist      **Looking at Sculpture** Metropolitan Museum of Art (New York, N.Y.), 1981

Looking at Greek and Roman Sculpture in Stone Janet Burnett Grossman, 2003 What is an anthemion What is giallo antico marble Who was Praxiteles This richly illustrated book in the popular Looking At series presents definitions and descriptions of these and many other terms relating to Greek and Roman sculpture encountered in museum exhibitions and publications on ancient stone sculpture This is an indispensable guide to anyone looking for greater understanding of ancient sculpture and heightened enjoyment of the objects Book jacket      Garth Evans Sculpture Garth Evans, Michael

Brenson, 2013-03-25 Garth Evans is a sculptor as capable of evoking intimacy and simplicity as he is of dealing with the monumental and the timeless This complete survey of his unique career is long overdue and reveals a wealth of innovative and powerful work much of it previously unseen in print As narratives of British sculpture are reconsidered Evans is emerging as one of the most creative and influential artists to bridge the generation of Antony Caro and Philip King with that of Tony Cragg Richard Deacon Antony Gormley Alison Wilding and Bill Woodrow This investigation into Evans's hugely varied visually eventful and challenging practice explores connections across geographies and timeframes as well as contextualizing major changes and new departures in his work Garth Evans was born in Manchester in 1934 and settled in the USA at the midpoint of his career He has exhibited widely in Europe and America since the early 1960s and his work is represented in major public and private collections in Australia Brazil Portugal USA and UK including the Arts Council Collection Leeds City Art Galleries the British Museum the V A and Tate Evans has been the recipient of numerous awards as well as holding a number of distinguished teaching positions Since 1988 he has taught at the Studio School in New York City where he is head of sculpture      Paintings and Sculptures: Where Do We Look First? Magali Seille, Zoi Kapoula, 2023-05-16

The book presents three studies in which eye tracking data were collected at the Musée des Beaux Arts in Rouen in June and July 2013 Overall the results of those three studies highlight the knowledge gained from the analysis of the very first saccade in a museum context when people look at paintings and statues The first study analyzes how viewers orient their first saccade on paintings This study shows that in a museum the first saccade is attracted toward the center of paintings This attraction toward the paintings center is found in all the subjects groups that we have studied Noteworthy this effect is significantly less pronounced in individuals who never visit museums It is among amateurs who often visit museums that the center attracts the most the first saccade Among experts painters or art history teachers and to a lesser extent among amateurs the pictorial composition largely determines the orientation of the first saccade We indeed found that as soon as the first saccade experts orient their gaze toward the main subject This phenomenon seems to be explained by the fact that

experts immediately orient their gaze here measured as the first saccade toward the paintings location conveying the most meaning It can either be the center or a peripheral area depending on whether the paintings most meaningful subject is located centrally or peripherally The second study shows that the center does not attract the first saccade in 5 year old children This behavior appears later in 8 to 10 year old children However noticeably the 8 10 year old children orient significantly less frequently their first saccade toward the paintings center as adults do and this is also true when one considers non expert adult viewers The results of the third study focus on statues and reveal a very different oculomotor behavior Indeed rather than looking at the center statues viewers exhibit a clear tendency to saccade first at the statues contours This stands in contrast with the behavior that we observe with paintings Our study concludes that statues trigger a specific oculomotor behavior The latter appears to be mostly driven by the physical presence that stone bodies incarnate The movement and the climax of this movement that sculptors manage to convey thus turn out to attract the gaze in a unique fashion The book concludes that the first saccade is a powerful indicator of the oculomotor behavior that greatly improves our comprehension of the unique relationship between a viewer and artworks

The Oxford Handbook of Roman Sculpture Elise A Friedland, Melanie Grunow Sobocinski, Elaine Gazda, 2015-01-02 The study of Roman sculpture has been an essential part of the disciplines of Art History and Classics since the eighteenth century Famous works like the Laoco n the Arch of Titus and the colossal portrait of Constantine are familiar to millions Again and again scholars have returned to sculpture to answer questions about Roman art society and history Indeed the field of Roman sculptural studies encompasses not only the full chronological range of the Roman world but also its expansive geography and a variety of artistic media formats sizes and functions Exciting new theories methods and approaches have transformed the specialized literature on the subject in recent decades Rather than creating another chronological catalogue of representative examples from various periods genres and settings The Oxford Handbook of Roman Sculpture synthesizes current best practices for studying this central medium of Roman art situating it within the larger fields of Art History Classical Archaeology and Roman Studies This comprehensive volume fills the gap between introductory textbooks and highly focused professional literature The Oxford Handbook of Roman Sculpture

Gaietto,2019-12-16 The idea of this catalog came after an auspicious placement of these sculptures in museums of prehistoric archaeology in those regions of Italy where the sculptures were found Their division into 12 types that were produced progressively over two million years is of use to scholars it allows us to visually interpret the evolution of the human species as represented in the sculptures as well as types of stone processing the sculptures meaning as religious objects and lastly the evolution in stylistic deformation that is artistic fashion Looking at Sculpture Baltimore Museum of Art,2007 **Year**
