In Pursuit of Beauty Metropolitan Museum of Art (New York, N.Y.), 1986 This project is the first comprehensive study of a phenomenon that not only dominated the American arts of the 1870s and 1880s but also helped set the course of such later developments in the United States as the Arts and Crafts movement the indigenous interpretation of Art Nouveau and even the rise of modernism In fact the early history of the Metropolitan its founding its sponsorship of a school of industrial design and its display of decorative works is inextricably tied to the Aesthetic movement and its educational goals In Pursuit of Beauty Americans and the Aesthetic Movement comprised some 175 objects including furniture metalwork stained glass ceramics textiles wallpaper painting and sculpture Some of these had rarely been displayed others although familiar were being shown in new and even startling contexts The exhibition and catalogue are arranged thematically to illustrate both the major styles of a visually rich movement and the ideas that generated its diversity From publisher's description

Hagia Sophia, 1850-1950 Robert S. Nelson, 2004-07-14 Hagia Sophia the Church of Holy Wisdom sits majestically atop the plateau that commands the straits separating Europe and Asia Located near the acropolis of the ancient city of Byzantium this unparalleled structure has enjoyed an extensive and colorful history as it has successively been transformed into a cathedral mosque monument and museum In Hagia Sophia 1850-1950 Robert S Nelson explores its many lives Built from 532 to 537 as the Cathedral of Constantinople Hagia Sophia was little studied and seldom recognized as a great monument of world art until the nineteenth century and Nelson examines the causes and consequences of the building's newly elevated status during that time He chronicles the grand dome's modern history through a vibrant cast of characters emperors sultans critics poets archaeologists architects philanthropists and religious congregations some of whom spent years studying it others never visiting the building But as Nelson shows they all had a hand in the recreation of Hagia Sophia as a modern architectural icon By many means and for its own purposes the West has conceptually transformed Hagia Sophia into the international

symbol that it is today While other books have covered the architectural history of the structure this is the first study to address its status as a modern monument With his narrative of the building's rebirth Nelson captures its importance for the diverse communities that shape and find meaning in Hagia Sophia His book will resonate with cultural architectural and art historians as well as with those seeking to acquaint themselves with the modern life of an inspired and inspiring building

The Speaker, 1895 **Towards a Critique of Architecture's Contemporaneity** Gevork Hartoonian, 2023-02-14 Pursuing historical analogies between nineteenth century theories and the current practices captivated by digital reproducibility this book offers a critical take on architecture's contemporaneity through four essays tectonics materiality cladding and labor Fundamental to this proposition is the historicity of Gottfried Semper's theorization of architecture amidst the outpouring of new materials and construction techniques during the 1850s Starting with Semper's differentiation between theatricalization and the tectonic of theatricality this book examines thematic essential to architecture's self representation Even though the title of this book recalls the Semperian *Four Elements of Architecture* its argument encapsulates a unique historico theoretical project probing the tectonic of theatricality beyond Semper The invisible tie between technique and labor is the cord running through the four subjects covered in this book In exploring these subjects from the theoretical standpoint of Marxian dialectics this book's contribution is focused on but not limited to the topicality of labor today when its relationship with capital has been further obscured by the prevailing digitalization of commodity exchange value starting roughly in the 1990s Each essay examines Semper's theorization of architecture in contradistinction to the ways in which technology's mediation has dominated architecture's representation Burrowing through the invisible tie between technique and work asymptomatic of architecture's predicament in global capitalism *Towards a Critique of Architecture's Contemporaneity* advances the scope of architectural criticism beyond the exhausted formalism and architecture's turn to philosophy circa the 1980s and the present tendencies for presentism It will therefore be of interest to researchers and students of architectural history and theory
