Management Of Brain Injured Children:

Management of Brain-injured Children Richard Appleton, Tony Baldwin, 1998 Management of brain injured children describes the epidemiology assessment and management of traumatic and non traumatic brain injuries in children Throughout the emphasis is upon providing a multidisciplinary and integrated team approach to understanding these problems Each chapter has been written by specialists who have regularly worked with brain injured children providing perspectives from neurologists psychologists a Hospital Play Specialist a Social Worker Speech and Language Therapist Headteacher physiotherapists and finally a parent s point of view The book focuses in detail on the acute medical and nursing needs of the children the types of problems and difficulties both they and their families encounter and discusses how the child can be ultimately be returned to the community Finally recommendations for the prevention of such injuries are discussed The book provides a comprehensive and easily accessible guide for any specialists regularly or occasionally required to deal with head injuries in children

Neuropsychological Management of Mild Traumatic Brain Injury Sarah A. Raskin, Catherine A. Mateer, 1999-11-11 Despite the importance of the problem strikingly little has been written about effective approaches to the treatment of individuals with mild to moderate brain injury This book is designed for neuropsychologists counseling and rehabilitation psychologists and other rehabilitation professionals who work with individuals who have sustained brain injuries of mild to moderate severity It provides a context for understanding and evaluating the common consequences of such injuries and offers both theoretical perspectives and practical suggestions for helping individuals to adjust to and compensate for residual difficulties Early chapters focus on different domains of cognitive functioning while later chapters describe clinical approaches to helping clients manage common emotional reactions such as depression irritability and anxiety While the book acknowledges and discusses the controversy about the origins of persistent symptoms following mild brain injury it does not focus on the controversy Rather it adopts a what works approach to dealing with individuals who have persistent symptoms and perceptions that contribute to disability and to emotional distress Many of these individuals benefit significantly from neuropsychological intervention Case examples throughout the book illustrate the adaptation of cognitive cognitive behavioral and traditional psychotherapeutic approaches to individuals with mild to moderate brain injury Self regulation and self management of both cognitive failures and emotional responses are described as appropriate and effective in this population

Psychological Management of Traumatic Brain Injuries in Children and Adolescents Ellen Lehr, 1990 This book addresses the holistic needs of children and adolescents with brain injuries and discusses psychosocial concerns school and home management issues and future directions it integrates existing research findings with extensive clinical experience providing insight as well as information to guide rehabilitation and it emphasizes intervention for both TBI and minor head injury
