Management Of Toxic Substances In Our Ecosystems Taming The Medusa:

Management of Toxic Substances in Our Ecosystems Barney W. Cornaby, 1981 **Energy Research Abstracts**, 1982
Selected Water Resources Abstracts, 1988 **Current Catalog** National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965-70 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), 1982 **Hazardous Waste Sites** Michael R. Greenberg, 2017-09-05 Mutual distrust defines the relationship between those who are the sources of hazardous wastes and those who oversee their activities A lack of credibility argue the authors is a formidable if not the biggest obstacle to properly managing hazardous waste in the United States Nowhere is the credibility gap wider than where there are hazardous waste management facilities or where sites have been proposed The purpose of this book is to provide comprehensive perspectives on hazardous waste sites in the United States The sources of hazardous waste are described along with the scientific and legal climates that allowed wastes to be discarded with little attention to impacts Evidence is weighed for and against public health as well as environmental economic and social damages at abandoned sites Political processes and analytical techniques are suggested and illustrated for those who are involved in the siting of new facilities A strategy for hazardous waste management is offered together with approaches to substantially reduce the difficulties faced by local planners and site managers who face a hostile public A historical legacy of mismanagement fueled by exaggeration of impacts and by a lack of information characterizes hazardous waste management in the United States This book will be important to planners environmental scientists and public health officials In order to assure accessibility for the casual reader the authors keep the explanation of mathematical methods and technologies in this area to a minimum **Transboundary Resources Law** Albert Utton, 2019-06-04 Originally published in 1987 this is a collection of articles on Transboundary Resources Law From the preface Migratory transboundary resources by their nature of being divided by political boundaries raise unusual challenges to their prudent use and development and the avoidance of disputes over their use One only has to recall examples s **Protection of River Basins, Lakes and Estuaries, Fifteen Years of Cooperation Toward Solving Environmental Problems in the USSR and USA** Robert C. Ryans, 1988 **A History of Radioecology** Patrick C. Kangas, 2022-12-26 This book presents a history of radioecology from World War II through to the critical years of the Cold War finishing with a discussion of recent developments and future implications for the field Drawing on a vast array of primary sources the book reviews synthesizes and discusses the implications of the ecological research supported by the Atomic Energy Commission AEC of the United States government from World War II to the early 1970s This was a critical period in the history of ecology characterized by a transition from the older largely descriptive studies of communities of plants and animals to the modern form of the science involving functional studies of energy flow and mineral cycling in ecosystems This transition was in large part due to the development of radioecology which was a by product of the Cold War and the need to understand and predict the consequences of a nuclear war that was

planned but has never occurred The book draws on important case studies such as the Pacific Proving Grounds the Nevada Test Site El Verde in Puerto Rico the Brookhaven National Laboratory and recent events such as the nuclear disasters at Chernobyl and Fukushima By revisiting studies and archived information from the Cold War era this book offers lessons from the history of radioecology to provide background and perspective for understanding possible present day impacts from issues of radiation risks associated with nuclear power generation and waste disposal Post Cold War developments in radioecology will be also reviewed and contrasted with the AEC supported ecology research for further perspectives This book will be of great interest to students and scholars of radioecology environmental pollution environmental technology bioscience and environmental history

Trace Elements in Terrestrial Plants Roberto Bargagli,1998 With its unique collection of case studies this book provides detailed coverage of metal biomonitoring and bioremediation in terrestrial ecosystems using higher plants lichens mosses and fungi Emphasis is placed on application rather than theory It gives an exhaustive account of the most reliable procedures for sampling sample preparation analytical determinations and interpretation of data Using an ecophysiological approach metal uptake by plants and metal transfer along terrestrial food chains are examined
