Adekoya, Chima Mordi, Hakeem Adeniyi Ajonbadi, 2023-08-28 Environmental sustainability has become increasingly important because of irreversible climate change widespread environmental pollution and dwindling resource availability over time. Organisations have recently come under more pressure due to increasing economic, political and societal concerns to address environmental issues and improve their environmental performance. The authors draw on various types of research: conceptual, theoretical and empirical, and incorporate contextual issues such as technology, politics, culture and economics to supplement the reader's insights into the current state of green HRM practices across the globe.
