*Expert Systems and Artificial Intelligence in Decision Support Systems* Henk G. Sol, Cees A.Th. Takkenberg, Pieter F. de Vries Robbé, 2013-11-11 In 1985 it was 20 years since Nobel Laureate Herbert A Simon published THE SHAPE OF AUTOMATION For Men and Management This short but important and still topical book dwells on three subjects The Long Range Economic Effects of Automation Will the Corporation be Managed by Machines The New Science of Management Decision In contrast with George Orwell who was a critic of contemporary political systems rather than a prophet Simon portrays a far more rosy picture of our brave new world Simon's work breathes optimism First computer technology looking back it is doubtful whether even the professor expected the hardware development we have witnessed Secondly our ability to tame the beast there is now not much reason for complacency and satisfaction Offices and factories can by no means be called automated at most semi automated Thirdly the organizational and social implications of these rapid technological developments referring to what he then called The Computer and the new decision making techniques Concerning this last point there is little need to emphasize that had been less practical application in organizations than the often impressive theoretical developments would lead one to believe In Europe this situation is even more acute than in the USA and Japan The ESPRIT programme of the ECC and many similar national programs intend to bridge the gap

*Bridging the Socio-technical Gap in Decision Support Systems* Ana Respício, 2010 The socio technical gap is the great divide between social activities such as coordination which researchers and practitioners aim to support and those that are actually supported by technology As the social interaction takes place through technology it is changed and mediated by the technology This gap between the two dimensions is being challenged by new and innovative approaches such as cognitive ergonomics and Web 2 0 3 0 Research in Decision Making DM theory and Decision Support Systems DSS shows that this gap is due in part to technical limitations and in part to the complexity of the contexts where decision support must be provided Thus DSS researchers face important questions concerned with the encapsulation of complex social aspects of managerial decision making as well as with the representation of key human

cognitive mechanisms such as intuition and insight within computational systems This book presents the latest innovations and advances in decision support theory and practice with a special focus on bridging the socio technical gap These achievements will be of interest to all those involved in decision making activities and research The book covers a wide range of topics including Understanding DM Design of DSS Web 2 0 Systems in Decision Support Business Intelligence and Data Warehousing Applications of Multi Criteria Decision Analysis Intelligent DM Context in DM Knowledge Management ERP Systems Decision Support for Policy Making Decision Making in Emergency Scenarios Decision Support in Commerce and Decision Support for Production Planning *Building Model Driven Decision Support Systems with Dicodess* Alexandre Gachet,2004

**Fusing Decision Support Systems Into the Fabric of the Context** A. Respício,F. Burstein,2012-06-13 The field of Information Systems has been shifting from an immersion view which relies on the immersion of information technology IT as part of the business environment to a fusion view in which IT is fused within the business environment forming a unified fabric that integrates work and personal life as well as personal and public information In the context of this fusion view decision support systems should achieve a total alignment with the context and the personal preferences of users The advantage of such a view is an opportunity of seamless integration between enterprise environments and decision support system components Thus researchers and practitioners have to address the challenges of dealing with this shift in viewpoint and its consequences for decision making and decision support systems theories and applications This book presents the latest innovations and advances in decision support systems with a special focus on the fusion view These achievements will be of interest to all those involved and interested in decision making practice and research as well as more generally in the fusion view of modern information systems The book covers a wide range of topical themes including a fusion view of business intelligence and data warehousing applications of multi criteria decision analysis intelligent models and technologies for decision making knowledge management decision support approaches and models for emergency management and medical and other specific domains **Cognition-Driven Decision Support for Business Intelligence**

Li Niu,Jie Lu,Guangquan Zhang,2009-09-14 Cognition driven decision support system DSS has been recognized as a paradigm in the research and development of business intelligence BI Cognitive decision support aims to help managers in their decision making from human cognitive aspects such as thinking sensing understanding and predicting and fully reuse their experience Among these cognitive aspects decision makers situation awareness SA and mental models are considered to be two important prerequisites for decision making particularly in ill structured and dynamic decision situations with uncertainties time pressure and high personal stake In today s business domain decision making is becoming increasingly complex To make a successful decision managers SA about their business environments becomes a critical factor This book presents theoretical models as well practical techniques of cognitiondriven DSS It first introduces some important concepts of cognition orientation in decision making process and some techniques in related research areas including DSS data

warehouse and BI offering readers a preliminary for moving forward in this book It then proposes a cognition driven decision process CDDP model which incorporates SA and experience mental models as its central components The goal of the CDDP model is to facilitate cognitive decision support to managers on the basis of BI systems It also presents relevant techniques developed to support the implementation of the CDDP model in a BI environment Key issues addressed of a typical business decision cycle in the CDDP model include natural language interface for a manager s SA input extraction of SA semantics construction of data warehouse queries based on the manger s SA and experience situation information retrieval from data warehouse how the manager perceives situation information and update SA how the manager s SA leads to a final decision Finally a cognition driven DSS FACETS and two illustrative applications of this system are discussed
