Meet The Candidate Videos Analyzing Presidential Primary Campaign Videocassettes:

Meet the Candidate Videos John Parmelee, 2003-03-30 Parmelee shows how presidential primary campaign videocassettes serve many functions for candidates on their road to the White House. These videocassettes, which include images and issues often based on polling data and focus groups, are sent out before the primaries to battleground states to establish an initial image of the candidate. A variety of methods are used to explore the videocassettes of the Democratic and Republican presidential candidates: Gary Bauer, Bill Bradley, George W. Bush, Steve Forbes, Al Gore, and John McCain, who released presidential primary meet the candidate videos during the 2000 race. Frame analysis, quantitative content analysis, and in-depth interviews with the producers of these videos were employed to provide answers to Parmelee's main research question: What function do candidate videos serve in presidential primary campaigns? Findings indicate that these videos, which can run from 5 to 20 minutes in length, serve a clear educational function to explain the candidate's stand on key policy issues. The videos, which are mailed to voters, journalists, and potential donors and shown to Democratic and GOP faithful at party functions, also serve as fundraisers, surrogate speakers, and inoculators. But while the videos share some common functions, each campaign targets its video to a slightly different audience based on the campaign's overall strategy. Of particular interest to scholars, students, and other researchers involved with American presidential politics and political communications.

Encyclopedia of Political Communication Lynda Lee Kaid, Christina Holtz-Bacha, 2008 Political communication began with the earliest studies of democratic discourse by Aristotle and Plato. However, modern political communication relies on an interdisciplinary base which draws on concepts from communication, political science, journalism, sociology, psychology, history, rhetoric, and others. This two-volume resource considers political communication from a broad interdisciplinary perspective encompassing the many different roles that communication plays in political processes in the United States and around the world. The *Encyclopedia of Political Communication* discusses the major theoretical approaches to the field, including direct and limited effects theories, agenda setting theories, sociological theories, framing and priming theories, and other past and present conceptualizations. With nearly 600 entries, this resource pays considerable attention to important political messages such as political speeches, televised political advertising, political posters, and print advertising; televised political debates; and Internet sites. The audiences for political communications are also central, necessitating concentration on citizen reactions to political messages, how the general public and voters in democratic systems respond to political messages, and the effects of all types of media and message types.

Key Features Encompasses several channels of political communication, including interpersonal and public communication, radio, television, newspapers, and the World Wide Web. Provides news media coverage and journalistic analysis of politics, political issues, political figures, and political institutions. Concentrates on the field of political communication since the middle of the 20th century. Emphasizes political communication from the point of view of the United States, but there is substantial and important research and scholarship on
