Meeting The Infrastructure Challenge In Latin America And The Caribbean:

Meeting the Infrastructure Challenge in Latin America and the Caribbean, 1995 The countries of Latin America and the Caribbean LAC stand at a point of transition During the 1980s in the face of the unavoidable need to correct macroeconomic imbalances economic growth largely came to a halt some of the poor became poorer and not only new investment but even routine maintenance of economic infrastructure was often neglected or deferred This report suggests a number of ideas to help countries address their infrastructure challenges including a variety of models for structuring the participation of domestic and international private capital The report also states the World Bank's commitment to serve as a proactive catalyst for mobilizing private capital for improved infrastructure service provision in LAC The World Bank will intensify efforts toward policy and regulatory reform and contribute financial resources or provide guarantees to help strengthen infrastructure in LAC

The Many Faces Of Science Leslie Stevenson, Henry Byerly, 1995-04-09 The development of modern science and its increasing impact on our life and culture is one of the great stories of our time Coming to understand that story and coming to terms with the institution of modern science should be an important part of the education of every student In *The Many Faces of Science* Leslie Stevenson and Henry Byerly masterfully and painlessly provide the basic information and the philosophical reflection students need to gain such understanding Making good use of case study methods the authors introduce us to dozens of figures from the history of science highlighting both heroes and villains Providing an elementary sketch of the development of science through the lives of its practitioners Stevenson and Byerly bring the story alive through the examination of the often mixed motives of scientists as well as the conflicting values people bring to science and to their perceptions of its impact on society They also explore the relationship between scientific practice and political and economic power Brief accessible and rich in anecdotes personal asides and keen insight *The Many Faces of Science* is the ideal interdisciplinary introduction for nonscientists in courses on science studies science and society and science and human values It will also prove useful as supplementary reading in courses on science in philosophy sociology and political science

Rethinking Infrastructure in Latin America and the Caribbean Marianne Fay, Luis Alberto Andres, Charles Fox, Ulf Narloch, Michael Slawson, 2017-08-02 Latin America and the Caribbean LAC does not have the infrastructure it needs or deserves given its income Many argue that the solution is to spend more by contrast this report has one main message Latin America can dramatically narrow its infrastructure service gap by spending efficiently on the right things This report asks three questions what should LAC countries goals be How can these goals be achieved as cost effectively as possible And who should pay to reach these goals In doing so we drop the infrastructure gap notion favoring an approach built on identifying the service gap Benchmarking Latin America in this way reveals clear strengths and weaknesses Access to water and electricity is good with the potential for the region's electricity sector to drive competitive advantage by contrast transport and sanitation should be key focus areas for further development The report also identifies

and analyses some of the emerging challenges for the region climate change increased demand and urbanization that will put increasing pressure on infrastructure and policy makers alike Improving the region s infrastructure performance in the context of tight fiscal space will require spending better on well identified priorities Unlike most infrastructure diagnostics this report argues that much of what is needed lies outside the infrastructure sector in the form of broader government issues from competition policy to budgeting rules that no longer solely focus on controlling cash expenditures We also find that traditional recommendations continue to apply regarding independent well performing regulators and better corporate governance and highlight the critical importance of cost recovery where feasible and desirable as the basis for future commercial finance of infrastructure services Latin America has the means and potential to do better and it can do so by spending more efficiently on the right things

Decentralization of Education Ketleen Florestal, Robb Cooper, 1997-01-01 In practice most education systems have both centralized and decentralized elements Planners involved in a decentralizing reform must identify which components of the system are more appropriately managed at the central level and which at the local level This book is intended to inform education policymakers planners and practitioners about international experience in the legal aspects of decentralizing basic education It also provides a basic understanding of how laws and regulations can be used for education reform For purposes of the discussion decentralization is used to describe efforts to transfer decision making power in basic education from the administrative center of a country to authorities closer to users The term is also used in a more technical sense to describe one of the many forms this type of reform can take and in this sense it is contrasted with deconcentration and devolution as educational reforms The first section examines the general legal aspects of decentralization and the second looks more closely at decentralization laws and regulations The third section is in effect a checklist of items that should be included in decentralization laws and the fourth section provides a road map to help the planner prepare and implement the laws required for reform Although an effort has been made to keep the discussion general enough for use in many countries the

analysis is based on the legal systems of the Western world or those that they inspired Contains 35 references SLD

Measham, Richard Heaver, 1996 The 1995 conference continued the tradition of holding a roundtable discussion related to the subject of the forthcoming annual World Development Report in this case economies in transition The conference addressed four themes redistribution with growth demographic change and development aid and development and fiscal decentralization Among the articles included in the 1995 proceedings are Argentina s Miracle From Hyperinflation to Sustained Growth Domingo F Cavallo and Guillermo Mondino Inequality Poverty and Growth Where Do We Stand Albert Fishlow Government Provision and Regulation of Economic Support in Old Age Peter Diamond Is Growth in Developing Countries Beneficial to Industrial Countries Richard N Cooper Fiscal Federalism and Decentralization A Review of Some Efficiency and Macroeconomic Aspects Vito Tanzi *Decentralization of Education* Cathy Gaynor, 1998-01-01 This book is based on a review of the literature on decentralization and teacher management The focus is on basic formal education mainly the primary and junior secondary levels of schooling and on presenting a rationale for decentralizing teacher management The book presents three models of decentralized teacher management explores the different functions

of teacher management and how these functions are handled in centralized and decentralized systems examines the design of decentralization reforms in various countries and discusses the political feasibility and legal implications of decentralizing teacher management Since reliable data on decentralizing teacher management are limited the changes that are described changes that will affect the quality of teaching or learning are tentative Although recommendations for planners and policymakers are included the book emphasizes the viability of the approaches taken so far and the available evidence regarding their efficacy Contains 70 references RJM

The Quiet Revolution Tim Campbell, 2003-04-20 As if by unseen signal toward the end of the 1980s many Latin American governments suddenly transferred money and decision making power to local municipalities At the same time national authorities allowed local governments to choose their leaders in free and open elections The resulting revolution has been profound in its reach and stunning in the silent shift of power from central to local authorities The Quiet Revolution traces the growth and effects of decentralization and democratization in Latin America throughout the 1980s and 1990s Based on first hand accounts from mayors local officials and neighborhood leaders Tim Campbell focuses on those cities and towns that made the most of their new intergovernmental arrangements He further argues that the reforms which are vital to long term sustainable growth in the region are in danger of being smothered by current policy responses from national and international institutions Campbell s research conducted over a ten year span counters conventional wisdom about the role of development banks in the process of state reform and offers timely insights into similar events taking place in other parts of the world

New Forms of Procurement Marcus C. Jefferies, Steve Rowlinson, 2016-04-14 The last three decades have seen the evolution of Public Private Partnerships PPPs and Relationship Contracting RC as alternative procurement approaches to traditional methods of delivering public infrastructure The potential for growth in these new forms of procurement has led to an on going debate on the nature of requirements particularly in terms of policy development encouraging private investment and value for money A key argument for Governments to procure projects using PPPs and RC is that the process delivers better value for all the stakeholders

including the community and asset end users This wide ranging study of such crucial procurement issues includes international historical context collaboration and risk management with a focus on sustainable procurement approaches The international significance of PPPs and RC procurement is reinforced with case study examples from the UK Europe North America South Africa and the Asia Pacific It features cutting edge research from around the world on subjects such as Reviews and reflection of the PPP approach Project Alliancing Implementation of RC in developing countries Changes in procurement policy Value for money collaboration and stakeholder involvement Growth and emergence of PPPs in Asia Risk management Including contributions from some of the world s most prominent academics and practitioners in this field it is a crucial guide to the strategic choices governments now face for the provision of infrastructure between using public or private mechanisms or a combination of the two

Dams and Development Sanjeev Khagram, 2018-08-06 Big dams built for irrigation power water supply and other purposes were among the most potent symbols of economic development for much of the twentieth century Of late they have become a lightning rod for challenges to this vision of development as something planned by elites with scant regard for environmental and social consequences especially for the populations that are displaced as their homelands are flooded In this book Sanjeev Khagram traces changes in our ideas of what constitutes appropriate development through the shifting transnational dynamics of big dam construction Khagram tells the story of a growing but contentious world society that features novel and increasingly efficacious norms of appropriate behavior in such areas as human rights and environmental protection The transnational coalitions and networks led by nongovernmental groups that espouse such norms may seem weak in comparison with states corporations and such international agencies as the World Bank Yet they became progressively more effective at altering the policies and practices of these historically more powerful actors and organizations from the 1970s on Khagram develops these claims in a detailed ethnographic account of the transnational struggles around the Narmada River Valley Dam Projects in central India a huge complex of thirty large and more than three thousand small dams He offers further substantiation through a comparative historical analysis of the political economy of big dam projects in India Brazil South Africa and China as well as by examining the changing behavior of international agencies and global companies The author concludes with a discussion of the World Commission on Dams an innovative attempt in the late 1990s to generate new norms among conflicting stakeholders
