Japan's uphill journey in the last half century. He entered the University of Tokyo in 1963, received a B.S. in 1965 and an M.S. in 1967, and in 1970 a Ph.D. degree for his dissertation *A Study of Differential Games*. After obtaining his doctorate, he joined the Department of Control Engineering at Osaka University as a research associate, and in 1973 he was promoted to an associate professor. *Control, Optimization, and Mathematical Modeling of Complex Systems* Andrey Gorshenin, Mikhail

Posypkin, Vladimir Titarev, 2023. Complex systems have long been an integral part of modern life and can be encountered everywhere. Undertaking a comprehensive study of such systems is a challenging problem, one which is impossible to solve without the use of contemporary mathematical modeling techniques. Mathematical models form the basis for the optimal design and control of complex systems. The present reprint contains all the articles accepted and published in the Special Issue of Mathematics entitled *Control Optimization and Mathematical Modeling of Complex Systems*. This Special Issue is focused on recent theoretical and computational studies of complex systems modeling, control, and optimization. The topics addressed in this Special Issue cover a wide range of areas, including numerical simulation in physical, social, and life sciences; the modeling and analysis of complex systems based on mathematical methods and AI/ML approaches; control problems in robotics; design optimization of complex systems; modeling in economics and social sciences; stochastic models in physics and engineering; mathematical models in material science; and high performance computing for mathematical modeling. It is our hope that the scientific results presented in this reprint will serve as valuable sources of documentation and inspiration to those seeking to delve into complex systems modeling, control, and optimization and examine their wide-ranging applications.

*Modeling and Control of Complex Systems* Petros A. Ioannou, Andreas Pitsillides, 2007-12-26. There is an emerging interest in the area of modeling and control of complex systems for applications in many engineering and non-engineering fields, such as biology, transportation, robotics, information technology, and communications. This text provides a pioneering single source compilation of material from internationally renowned experts with different approaches to the applications of modeling and control of complex systems. Sections cover complex systems, biological systems, communication networks, sensor networks, and automation, autonomous vehicles, and robotics, transportation systems, and structures, and others. The authors highlight the most important areas of research, the latest advances, and possible future directions. *Handbook of Research on Modeling, Analysis, and Control of Complex Systems* Ahmad Taher Azar, Nashwa Ahmad Kamal, 2020-09. This book is

mainly focused on the recent achievements and applications in the field of control and analysis for complex systems, with a special emphasis on how to solve various control design and/or observer design problems for nonlinear systems, interconnected systems, and singular systems, and involves modeling non-ideal systems and applications, synchronization, and control for nonlinear systems, such as mechanical, electrical, electromechanical, mechatronic, and very complex systems.

Modelling and Optimization of Complex System G.I. Marchuk, Guriĭ Ivanovich Marchuk, 1979-07. These proceedings contain most of the papers presented at the IFIP TC 7 Working Conference on Modelling and Optimization of Complex

Systems held in Novosibirsk Russia on 3-9 July 1978. The program offered a broad view of optimization techniques currently in use and under investigation. The major emphasis was on recent advances in optimal control and mathematical programming and their application to modelling, identification and control of large systems in particular. Also included are recent applications in areas such as biological, environmental and socio-economic systems.
