A Legacy of Innovation Ethan G. Sribnick, 2013-04-08. From La Follette to Faubus, from Rockefeller to Reagan, U.S. governors have addressed some of the most contentious policy questions of the twentieth century. In doing so, they not only responded to dramatic changes in the political landscape; they shaped that landscape. The influence of governors has been felt both within the states and across the nation. It is telling that four of the last five U.S. Presidents were former state governors. *A Legacy of Innovation: Governors and Public Policy* examines the changing role of the state governor during the American Century. In this volume, top political scientists, historians, and journalists track the evolution of gubernatorial leadership as it has dealt with critical issues including conservation, transportation, civil rights, education, globalization, and health care. As the most visible state officials, twentieth-century governors often found themselves at the center of America's conflicting political tendencies. *A Legacy of Innovation* describes how they negotiated the tensions between increasing democratization and the desire for expert control, the rise of interest groups and demise of political parties, the pull of regionalism against growing nationalism, and the rising demand for public services in a society that fears centralized government. In their responses to these conflicts, governors helped shape the

institutions of modern American government As state governments face new policy challenges in the twenty first century A Legacy of Innovation will serve as a valuable source of information for political scientists and policy makers alike

Handbook of Clinical Behavior Therapy with the Elderly Client Patricia A. Wisocki, 2013-11-21 Although we speak of the elderly as if there were one body of people with common characteristics older adults are more heterogeneous than any other population People over the age of 65 are also the fastest growing segment of the population in the United States currently numbering 25 million The majority of older adults reside in their communities a small fraction of them are cared for in institutions Most may expect to experience some kind of physical impairment Approximately a quarter of the population may expect to suffer a mental health impairment While traditional therapies have not been especially effective for older adults behavior therapy has shown exceptional promise as a treatment modality This book presents a comprehensive explication of the relatively new field of behavioral gerontology It was written for the clinician interested in the interaction of medical environmental and psychological variables and their effects on treatment of elderly clients and for the researcher who will be looking to extend knowledge about interventions with this population It will be useful for the graduate student in clinical psychology as well as the experienced clinician who will want to include the elderly in his or her therapeutic population

Autonomy and Long-term Care George J. Agich, 1993 The realities and misconceptions of long term care and the challenges it presents for the ethics of autonomy are analyzed in this perceptive work While defending the concept of autonomy the author argues that the standard view of autonomy as non interference and independence has only a limited applicability for long term care He explains that autonomy should be understood as a comprehensiveness that defines the overall course of a person's life rather than as a way of responding to an isolated situation Agich distinguishes actual and ideal autonomy and argues that actual autonomy is better revealed in the everyday experiences of long term care than in dramatic conflict ridden paradigm situations such as decisions to institutionalize to initiate aggressive treatments or to withhold or to withdraw life sustaining treatments Through a phenomenological analysis of long term care he develops an ethical framework for it by showing how autonomy is actually manifest in certain structural features of the social world of long term care Throughout this timely work the rich sociological and anthropological literature on aging and long term care is referenced and the practical ethical questions of promoting and enhancing the exercise of autonomy are addressed

Gray Panthers Roger Sanjek, 2012-02-28 In 1970 a sixty five year old Philadelphian named Maggie Kuhn began vocally opposing the notion of mandatory retirement Taking inspiration from the civil rights and anti Vietnam War movements Kuhn and her cohorts created an activist organization that quickly gained momentum as the Gray Panthers After receiving national publicity for her efforts she even appeared on the Tonight Show with Johnny Carson she gained thousands of supporters young and old Their cause expanded to include universal health care nursing home reform affordable and accessible housing defense of Social Security and elimination of nuclear weapons Gray Panthers traces the roots of Maggie Kuhn's social justice

agenda to her years as a YWCA and Presbyterian Church staff member. It tells the nearly forty year story of the intergenerational grassroots movement that Kuhn founded and its scores of local groups. During the 1980s more than one hundred chapters were tackling local and national issues. By the 1990s the ranks of older members were thinning and most young members had departed many to pursue careers in public service. But despite its challenges including Kuhn's death in 1995 the movement continues today. Roger Sanjek examines Gray Panther activism over four decades. Here the inner workings and dynamics of the movement emerge: the development of network leadership, local projects and tactics conflict with the national office and the intergenerational political ties that made the group unique among contemporary activist groups. Part ethnography, part history, part memoir, *Gray Panthers* draws on archives and interviews as well as the author's thirty years of personal involvement. With the impending retirement of the baby boomers, Sanjek's book will surely inform the debates and discussions to follow on retirement, health care and many other aspects of aging in a society that has long valued youth above all.
