Rise Of Great Britain And Russia 1688 1725:

The Great Powers and Global Struggle, 1490-1990 Karen A. Rasler, William R. Thompson, 2021-10-21 In *The Great Powers and Global Struggle* Karen A Rasler and William R Thompson focus on two themes the rise and fall as well as the relative decline of major world powers over the past five hundred years and the way in which these processes have set the stage for the outbreak of global war Their interdisciplinary approach encompasses political science economics sociology geography and history The most significant wars occur when regional leaders historically in Western Europe challenge global leaders By studying the wars of Napoleon Louis XIV Phillip II and the Italian Indian Ocean wars of the sixteenth century through World Wars I and II to the present the authors challenge the long held idea that prosperity leads to over consumption and underinvestment and thus decline a theory traceable to ancient times that remains the principal explanation for global decline today Arguments about global structural change and its implications abound but rarely is the abstract translated into concrete historical terms with emphases on specific actors and empirical documentation Rasler and Thompson reinterpret the past five hundred years of major power warfare and provide extensive tests of the eighteen generalizations critical to their argument They conclude that those who argue that global war and repositioning are no longer a concern among the major powers lack critical understanding of the behavior that contributes to such conflict

The New Cambridge Modern History: Volume 6, The Rise of Great Britain and Russia, 1688-1715/25 J. S.

Bromley, 1970-07-02 The rise of Great Britain and Russia is the focus of this particular volume of *The New Cambridge Modern History*

The Revolution of Peter the Great James Cracraft, 2006-03-15 Russians learned how to build and sail warships train supply and command a modern army operate a new style bureaucracy conduct diplomacy on a par with the other European states apply modern science and conceptualize the new governing system

The Fiscal-Military State in Eighteenth-Century Europe Christopher Storrs, 2016-03-03 In recent decades historians of early modern Europe and above all those who study the eighteenth century have elaborated the concept of what has been called the fiscal military state This is a state whose international effectiveness was founded upon the development of large armed forces whose performance and supply necessitated both further administrative development and the provision of large sums the raising of which involved unprecedented levels of taxation and borrowing by governments The present collection of essays by leading authorities in their individual fields all of whom have published widely on their chosen topic explores the subject of the fiscal military state by focusing on its leading exemplars in eighteenth century Europe Austria Britain France Prussia and Russia It also includes a chapter on the Savoyard state the kingdom of Sardinia a lesser power whose career illuminates by comparison developments elsewhere In addition and rather unusually a further chapter considers the fiscal military state in a broader comparative international context in the arena of international relations Each chapter provides a summary of the state of

knowledge regarding the fiscal military state debate insofar as it relates to the state under consideration As well as contributing to that debate they take matters further by systematically analysing the sources of wealth and income and the way these were tapped and the broader impact that this attempt to extract resources had on society and the state both in the short and longer term The differing patterns and the variety of models of fiscal military state makes for ease of comparison across Europe making the volume an invaluable resource to both students and researchers alike

War and Peace in the Baltic, 1560-1790 Stewart P. Oakley, 2005-06-28 First published in 1993 Routledge is an imprint of Taylor Francis an informa company

Empire and Military Revolution in Eastern Europe Brian Davies, 2011-06-16 In terms of resource mobilization and devastation the wars between Russia the Crimean Khanate and the Ottoman Empire were some of the largest of the 18th century and had enormous consequences for the balance of power in Eastern Europe Brian Davies examines how these conflicts characterized the course of Russian military development in response to Ottoman and Crimean Tatar threats and to determine under what circumstances and in what ways Russian military power experienced a revolution awarding it clear preponderance over the Ottoman Crimean system A central part of Davies argument is that identifying and explaining a Military Revolution must involve examining the role of factors not purely military One must look not only at new military technology new force and command structure new tactical thinking and new recruitment and military finance practices but also consider the impact of larger demographic economic and sociopolitical changes

War in the Modern Great Power System Jack S. Levy, 2021-09-15 The apparently accelerating arms race between the United States and the Soviet Union and the precarious political conditions existing in many parts of the world have given rise to new anxiety about the possibility of military confrontation between the superpowers Despite the fateful nature of the risk we have little knowledge as Jack S Levy has pointed out of the conditions processes and events which might combine to generate such a calamity No empirically confirmed theory of the causes of war exists and the hypotheses often contradictory that have been proposed remain untested As a step toward the formulation of a theory of the causes of war that can be tested against historical experience Levy has developed a unique data base that will serve as an invaluable resource for students of international conflict in coming years War in the Modern Great Power System provides a much needed perspective on the major wars of the past In this thorough and systematic study Levy carefully defines the Great Power concept and identifies the Great Powers and their international wars since the late fifteenth century The resulting compilation of war data is unique because of its five century span and its focus on a well defined set of Great Powers Turning to a quantitative analysis of the characteristics patterns and trends in war Levy demonstrates that although wars between the Great Powers have become increasingly serious in every respect but duration over the last five hundred years their frequency has diminished He rejects the popular view that the twentieth century has been the most warlike on record and he demonstrates that it instead constitutes a return to the historical norm after the exceptionally peaceful nineteenth century Applying his data to the

question whether war is contagious he finds that the likelihood of war is indeed highest when another war is under way but that this contagious effect disappears after the first war is over Contrary to the popular war weariness theory he finds no evidence that war generates an aversion to subsequent war This study extending the scientific analysis of war back over five centuries of international history constitutes a major contribution to our knowledge of international conflict **Racial**

Geometries of the Black Atlantic, Asian Pacific and American Theatre Shannon Steen, 2016-04-30 An exciting new work on how black and Asian racial structures were woven together within US theatrical practices in the run up to the Second World War Steen uses this history to model how we might use performance histories to more carefully assess how racial formation occurs on the boundaries between racial groups in an international context
