Credit Cooperative Institutions in European Countries Simeon Karafolas, 2016-05-09. This book offers a comparative analysis of credit cooperative systems across 23 European countries. Cooperative banking has an important place in the financial, economic, and social life of most European countries, and while cooperative banks, credit mutuals, credit cooperatives, and credit unions share the spirit of cooperation and mutuality, they often have very different features, history, and development. The book examines the evolution and current model of each credit cooperative system, its importance for the national and local banking markets, as well as the impact of the financial crisis on cooperative banking, and also presents the sharp contrasts between these systems throughout the EU. It is of significant scientific and practical interest and enables policymakers, practitioners, and academics at European and national levels to deepen their understanding of the evolution of the system and its governance. **Agriculture Investment Sourcebook**

World Bank, 2005-04-08. Investing to promote agricultural growth and poverty reduction is a central pillar of the World Bank's current rural strategy. *Reaching the Rural Poor* 2003. This Sourcebook addresses how to implement the rural strategy by sharing information on investment options and identifying innovative approaches that will aid the design of future lending programs for agriculture. It provides generic good practices and many examples that demonstrate investment in agriculture can provide rewarding and sustainable returns to development efforts. It is divided into eleven self-contained modules. Each module contains three different types of subunits that can also be stand-alone documents: I. Module Overview, II. Agricultural Investment Notes, III. Innovative Activity Profiles. The stand-alone nature of the subunits allows flexibility and adaptability of the material. Selected readings and web links are also provided for readers who seek more in-depth information. The Sourcebook draws on a wide range of experiences from donor agencies, governments, institutions, and other groups active in agricultural development. It is an invaluable reference tool for policy makers, professionals, academics, and students, and anyone with an interest in agricultural investments. *IDB América*, 2000.

Remittances Samuel Munzele Maimbo, Dilip Ratha, 2005 Migrants have long faced unwarranted constraints to sending money to family members and relatives in their home countries among them costly fees and commissions inconvenient formal banking hours and inefficient domestic banking services that delay final payment to the beneficiaries Yet such remittances are perhaps the largest source of external finance in developing countries Officially recorded remittance flows to developing countries exceeded US 125 billion in 2004 making them the second largest source of development finance after foreign direct investment This book demonstrates that governments in developing countries increasingly recognize the importance of remittance flows and are quickly addressing these constraints

Financial Cooperatives and Local Development Silvio Goglio, Yiorgos Alexopoulos, 2013-05-02 This book examines the opportunities opened up for financial cooperatives by the recent financial crisis and explores the role of these institutions in promoting and sustaining local development The global financial crisis has not only shown the limits of the mainstream theory of markets and rational expectations but has also generated a great deal of disillusionment with the banking system and underlined the importance of a healthy society for the welfare of the individual Consequently new and innovative ways of providing finance are needed especially for strengthening the development of local societies
