Safeguarding Our Common Future Ingrid Leman Stefanovic, 2000-08-31 Utilizes Heidegger in rethinking common environmental paradigms

The Natural City Stephen B. Scharper, Ingrid Leman-Stefanovic, 2012-01-01 Urban and natural environments are often viewed as entirely separate entities human settlements as the domain of architects and planners and natural areas as untouched wilderness This dichotomy continues to drive decision making in subtle ways but with the mounting pressures of global climate change and declining biodiversity it is no longer viable New technologies are promising to provide renewable energy sources and greener designs but real change will require a deeper shift in values attitudes and perceptions A timely and important collection The Natural City explores how to integrate the natural environment into healthy urban centres from philosophical religious socio political and planning perspectives Recognizing the need to better link the humanities with public policy The Natural City offers unique insights for the development of an alternative vision of urban life

Towards 100% Renewable Energy Tanay Sidki Uyar, 2017-02-21 This volume collects papers presented at the International 100% Renewable Energy Conferences IRENEC from 2011 to 2015 Given the time span the chapters have been updated to ensure they are timely and pertinent These proceedings are the outcome of an international group of research scientists and experts contributing to energy solutions within their research development and implementation This book is aimed at researchers and decision makers who are working on problems and issues within energy efficiency Tables graphs and diagrams accompany the text promoting 100% renewable energy as the solution in solidarity with energy end use efficiency and renewable energy storage In this manner Towards 100% Renewable Energy offers leaders considering the transition from fossil problems to alternative solutions new food for thought and incentives for action

Cultural Sustainability and Regional Development Joost Dessein, Elena Battaglini, Lummina Horlings, 2015-08-13 Meeting the aims of sustainability is becoming increasingly difficult at the same time the call for culture is becoming more powerful This book explores the relationships between culture sustainability and regional change through the concept of territorialisation This new concept describes the dynamics and processes in the context of regional development driven by collective human agency that stretches beyond localities and marked off regional boundaries This book launches the concept of territorialisation by exploring how the natural environment and culture are constitutive of each other This concept allows us to study the characterisation of the natural assets of a place the means by which the natural environment and culture interact and how communities assign meaning to local assets add functions and ascribe rules of how to use space By highlighting the time space dimension in the use and consumption of resources territorialisation helps to frame the concept and grasp the meaning of sustainable regional development Drawing on an international range of case studies the book addresses both conceptual issues and practical applications of territorialisation in a range of contexts forms and scales The book will be of great interest to researchers and postgraduates in sustainable development environmental studies and

regional development and planning Local Governance in Transition Mary Louise McAllister, 2024-08-01 The early 2020s unleashed a perfect storm on governments worldwide. Logistical challenges never before anticipated left some communities flailing while others thrived. Epidemics, natural disasters, and economic collapses inspired innovation and creativity in many resourceful civic teams. In *Local Governance in Transition*, Mary Louise McAllister argues that communities wanting to thrive tomorrow must reimagine local governance today. She begins with an overview of how government evolved in Canada, then examines how interdisciplinary initiatives and policies can nudge cities toward a more sustainable future. From coast to coast, environmental change brings existential challenges for Canadian communities. Global awareness and collaboration are key in finding creative solutions for local governance and sustainability. *Local Governance in Transition* examines systems thinking, environmental studies, and the mechanics of government. Through the adoption of collaborative urban planning and policymaking and adaptive learning systems, those working in local governance can foster healthier, more resilient communities. This text is for students, leaders, civil servants, and anyone working toward sustainable cities.

Integral Ecology Sean Esbjörn-Hargens, Michael E. Zimmerman, 2009 Dozens of real-life applications and examples of this framework currently in use are examined, including three in-depth case studies: work with marine fisheries in Hawaii, strategies of eco-activists to protect Canada's Great Bear Rainforest, and a study of community development in El Salvador. In addition, eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness. Jacket

Integral Ecology Sean Esbjörn-Hargens, Ph.D., Michael E. Zimmerman, Ph.D., 2011-03-08 Today there is a bewildering diversity of views on ecology and the natural environment. With more than two hundred distinct and valuable perspectives on the natural world and with scientists, economists, ethicists, activists, philosophers, and others often taking completely different stances on the issues, how can we come to agreement to solve our toughest environmental problems? In response to this pressing need, *Integral Ecology* unites valuable insights from multiple perspectives into a comprehensive theoretical framework, one that can be put to use right now. The framework is based on Integral Theory as well as Ken Wilber's AQAL model and is the result of over a decade of research exploring the myriad perspectives on ecology available to us today and their respective methodologies. Dozens of real-life applications and examples of this framework currently in use are examined, including three in-depth case studies: work with marine fisheries in Hawaii, strategies of eco-activists to protect Canada's Great Bear Rainforest, and a study of community development in El Salvador. In addition, eighteen personal practices of transformation are provided for you to increase your own integral ecological awareness. *Integral Ecology* provides the most sophisticated application and extension of Integral Theory available today and, as such, it serves as a template for any truly integral effort.

Convergent Knowing Simon Appolloni, 2018-11-16 Global environmental destruction, growing inequality, and the persistent poverty afflicting the majority of humans on the planet challenge Christian theorists, theologians, and ethicists in their pursuit of an ethical vision that is both environmentally sustainable and just for all of creation. Too often

their visions which start with traditional understandings of the Christian faith prevalent approaches to science or current ethical models are inadequate In *Convergent Knowing* Simon Appolloni proposes a new framework for ethical deliberation in which the epistemological lines between religion and science are somewhat blurred This framework opens up avenues to explore new paradigms for Christianity science and liberation while addressing interrelated questions not always manifest within the religion science and ethics debates what kind of ethics what kind of science and what kind of Christianity do we need today and tomorrow when the liberation of countless subjects of creation is at stake Exploring and analyzing the work of Rosemary Radford Ruether Leonardo Boff Diarmuid O Murchu and Thomas Berry four Christian ethical thinkers who have borrowed from the natural sciences to unite a liberationist agenda with an environmental ethic *Convergent Knowing* assists Christian thinkers struggling to integrate science environment liberation and their faith

Natural Resources and Sustainable Development Kathy Wilson Peacock, 2008 From the Publisher *Natural Resources and Sustainable Development* is part of the Global Issues series which is designed to be a first stop resource for research on the key challenges facing the world today Each volume contains three sections beginning with an introduction that clearly defines the issue followed by detailed case studies of the issue s impact in the United States and several other countries or

regions The second section draws together significant U S and international primary source documents and the third section gathers useful research tools such as brief biographies facts and figures an annotated bibliography and more A foreword written by an expert in the field complements each volume A chronology glossary and index provide additional help There are more than 6 billion people living on Earth today and the United Nations predicts this number will surge to 9.1 billion by the year 2050 However the natural resources needed to sustain the world's population including freshwater arable land and fossil fuels are dwindling In order to achieve sustainable development the stress exerted on the environment by the world's population will have to be controlled through reduced rates of consumption Natural Resources and Sustainable Development explores the impact that overconsumption has had on natural resources in the United States China India Germany and Brazil It analyzes strategies that governments can use to reduce energy consumption and discusses the ongoing efforts to find alternative sources

Perspectives on Public Policy in Societal-Environmental Crises Adam Izdebski, John

Haldon, Piotr Filipkowski, 2022-07-14 This is an open access book Histories we tell never emerge in a vacuum and history as an academic discipline that studies the past is highly sensitive to the concerns of the present and the heated debates that can divide entire societies But does the study of the past also have something to teach us about the future Can history help us in coping with the planetary crisis we are now facing By analyzing historical societies as complex adaptive systems we contribute to contemporary thinking about societal environmental interactions in policy and planning and consider how environmental and climatic changes whether sudden high impact events or more subtle gradual changes impacted human responses in the past We ask how societal perceptions of such changes affect behavioral patterns and explanatory rationalities in premodernity and whether a better historical understanding of these relationships can inform our response to contemporary problems of similar nature and magnitude such as adapting to climate change

Building the Ecological City R R White, 2002-02-22 If the modern city is a monument to anything it is a monument to man's inefficiency Our cities are plagued by problems of congestion waste and pollution that deplete natural resources damage the environment and reduce the quality of life of citizens The irony is as this fascinating new study shows that it doesn't have to be like this Building the ecological city describes the problems we face and puts forward solutions to the question how can we build cities that provide an acceptable standard of living for their inhabitants without depleting the ecosystems and biogeochemical cycles on which they depend The book suggests and examines the concept of urban metabolism in which the city is characterized as a set of interlinked systems of physical flows linking air land and water A series of chapters looks at the production and management of waste energy use and air emissions water supply and management urban land use and air quality issues Within the broader context of climate change the book then considers a range of practical strategies for restoring the health of urban ecosystems from the restoration of brownfield land to productive use through to improving air quality and making better use of water resources Building the ecological city is a major contribution to better urban management and planning

for both citizens and the environment and is an invaluable sourcebook for urban and national planners architects and environmental agencies Authoritative review of the environmental impact of modern cities Seeks to identify a viable model for urban living in relation to all the resources land air and water upon which cities depend but currently tend to deplete or destroy Essential reading for urban planners architects local and national government officers environmental agencies worldwide and students of ecology and environmental sciences Sustainable Industrial Landscape Plan and Design Long Zhou,2020-09-09 This book applies the Total Human Ecosystem as a guiding concept in coastal urban communities to achieve a mutually beneficial relationship between industrial parks and their surrounding wetlands The early 21st century has been shaped by a need for economic recovery and by climate change Consequently new development models that promote both economic growth and environmental preservation are urgently needed In turn the book puts forward an innovative proposal to achieve the shift from a hard path to a soft path through landscape architectural interventions one that will help industrial factories and their surrounding wetlands coevolve toward sustainability Through the incorporation of science and design the proposal for the Total Human Ecosystem on Blakeley Island integrates industry with its surrounding environment The design scenarios for this new living system are based on scientific principles of landscape ecology that take into account both the human and nonhuman environments as components of the land mosaic Sustainability is not a final status that is achieved once and for all it is an ongoing challenge As a case study this proposal outlines the urgently needed reconciliation between industrial parks and their surrounding natural ecosystems and promotes the evolution of both components toward sustainability **Aquaculture Health Management** Frederick S.B. Kibenge,Mark D. Powell,2020-06-13 Aquaculture Health Management Design and Operation Approaches is an essential reference for the diverse aquaculture community With the steadily increasing importance of healthy fish production and the expansion of the animal aquaculture industry to new geographic areas new microbial and parasitic species with pathogenic potential continue to emerge The book covers the broad spectrum of fish and shellfish health the functional roles of pathogen emergence and the impacts of nutrition and preventative medicine such as pre and probiotics as well as chemical treatments relevant legislation and more This reference takes a comprehensive approach to understanding overall fish health management making it valuable to aquaculturists practitioners in aquatic animal health veterinarians and all those in industry government or academia who are interested in aquaculture and fisheries and their sustainable futures Presents the biosecurity measures used to prevent the spread of disease Discusses fish immunology to help readers understand preventive medicine for a healthy fish production Examines the latest scientific methods and technologies to maximize efficiencies for healthy fish production for farming Includes the most commonly researched fish crustaceans and mollusks in aquaculture *Cultural Sustainability and the Nature-Culture Interface* Inger Birkeland,Rob Burton,Constanza Parra,Katriina Siivonen,2018-03-14 As contemporary socio ecological challenges such as climate change and biodiversity preservation have become more important the three pillars concept has

increasingly been used in planning and policy circles as a framework for analysis and action. However the issue of how culture influences sustainability is still an underexplored theme. Understanding how culture can act as a resource to promote sustainability rather than a barrier is the key to the development of cultural sustainability. This book explores the interfaces between nature and culture through the perspective of cultural sustainability. A cultural perspective on environmental sustainability enables a renewal of sustainability discourse and practices across rural and urban landscapes, natural and cultural systems stressing heterogeneity and complexity. The book focuses on the nature-culture interface conceptualised as a place where experiences, practices, policies, ideas and knowledge meet, are negotiated, discussed and resolved. Rather than looking for lost unities or an imaginary view of harmonious relationships between humans and nature based in the past, it explores cases of interfaces that are context sensitive and which consciously convey the problems of scale and time. While calling attention to a cultural or culturalised view of the sustainability debate, this book questions the radical nature-culture dualism dominating positive modern thinking as well as its underlying view of nature as pre-given and independent from human life.

Nature and Experience Bryan Bannon, 2016-05-18. What do we mean when we speak about and advocate for nature? Do inanimate beings possess agency and if so, what is its structure? What role does metaphor play in our understanding of and relation to the environment? How does nature contribute to human well-being? By bringing the concerns and methods of phenomenology to bear on questions such as these, this book seeks to redefine how environmental issues are perceived and discussed and demonstrates the relevance of phenomenological inquiry to a broader audience in environmental studies. The book examines what phenomenology must be like to address the practical and philosophical issues that emerge within environmental philosophy, what practical contributions phenomenology might make to environmental studies and policy-making more generally, and the nature of our human relationship with the environment and the best way for us to engage with it.
