*The House in Vienna* Colin Everard,2013-12-01 What happened next would remain imprinted in their memories for the rest of their lives Quite suddenly each became conscious of the noise of vibration As their eyes came to rest on Maria s glass on the table in front of where she was sitting each quickly realised that it was vibrating against the glass of the table Then Paul said Look at the wall Daddy it has a big diagonal crack Philip Mason a civil aviation expert takes early retirement and buys a cattle farm in the Highlands of Kenya at the time of Kenya s independence in 1965 He and his beautiful fun loving Austrian wife Maria love one another their cattle farm and their idyllic surroundings But fate deals them a cruel hand their house catches fire and everything is lost Rather than attempting to rebuild their lives in Kenya they move to Austria No one in the world could have imagined the traumatic adventure about to engulf the couple Having bought a dream apartment in a beautiful 200 year old mansion right in the middle of Vienna s First District they live there happily for ten years Then one day their house suddenly starts vibrating Due to maintenance neglect areas of construction weakness become evident and the house is moving Will it collapse Can something be done to save it And what about the occupants of the nine apartments in the house What about their characters Are they reasonable and constructive are they uncaringly apathetic are they tricky even consumed by greed And what is their reaction when one of them is murdered In short what lies behind their facade of decency As we progress through the remarkably unusual story of *The House in Vienna* we learn a lot about the history culture and architecture of Vienna as well as of several parts of Austria There are also excursions to Communist Viet Nam and the former USSR The book will appeal to fans of literary historical thriller and expat fiction

with confidence     Disaster Management and Human Health Risk V C.A. Brebbia, Wessex Institute, UK, 2017-09-07 The contents of this book consist of papers presented at the 5th International Conference on Disaster Management and Human Health Reducing Risk Improving Outcomes part of a series of conferences convened to assess the potential risk from various disasters and discuss ways to prevent or alleviate damage These latest developments contained in this volume have been contributed by academics and experts on public health security and disaster management in order to exchange knowledge and experience on the way to handle the increasing risk of natural and human made disasters As the human population has continued to concentrate in urban areas the number of people and the value of property affected by both natural and man produced disasters has also grown Earthquakes floods hurricanes cyclones tornadoes and forest fires have all taken their toll as have man made catastrophes such as industrial spillages and terrorist attacks The included paper cover various subject areas including Disaster analysis Disaster monitoring and mitigation Emergency preparedness Risk mitigation Risk and security Resilience Socio economic issues Health risk Human factors Multi hazard risk assessment Case studies Learning from disasters and man made disasters     **The Custom House Murder** Mike Hollow, 2020-12-10 First Published as Enemy Action September 1940 With London having endured the Blitz for nearly a month people are calling for vengeance but once again the night heralds more destruction In Custom House anxious residents dutifully head to the nearest public air raid shelter as the warning siren wails When dawn brings the all clear people disperse but one man remains he is dead stabbed through the heart Detective Inspector John Jago discovers that the victim was a pacifist But why then was he carrying a loaded revolver in his pocket     *Living with Long Island's South Shore* Larry McCormick, 1984 The south shore of Long Island one of New York's greatest recreational assets is receding at the rate of up to six feet per year In many cases efforts to halt this erosion actually have increased it Buildings once thought safely constructed back from high tidemarks today protrude far into the water Even more the number of homes and facilities built too close to the sea's edge has dramatically increased making the south shore probably less ready to withstand a major storm than at the time of the cataclysmic hurricane of 1938 Thus the question of what to do now to overcome and avoid these hazards takes on real urgency Pointing to past mistakes many Long Islanders insist that only by acting in an informed reasonable way can safe and environmentally sound development be possible for everyone     **Living with the Georgia Shore** Tonya D. Clayton, 1992 The wide sandy beaches quiet maritime forests and vast Spartina marshes of the natural Georgia coast create a most spectacular albeit gentle Southern beauty Casual visitors and longtime residents alike have been charmed by this special place Living with the Georgia Shore provides an essential reference and guide for residents visitors developers planners and all who are concerned with the conditions and future of Georgia's coastal zone Recounting the human and natural history of the islands the authors look in particular at the phenomenon of coastal erosion and the implications of various responses to this process In Georgia as elsewhere in the United States the future of the shore is in doubt as recreational and residential development demands

increase This book provides guidelines for living with the shore as opposed to simply living on it The former requires planning and a wise choice of property or house site The latter ignores the potential hazards unique to coastal life and may make inadequate allowance for the dramatic changes that can occur on any sandy ocean shore Living with the Georgia Shore includes an introduction to each of the Georgia isles an overview of federal and state coastal land use regulations pointers on buying and building at the shore a hurricane preparation checklist a history of recent hurricanes in Georgia an extensive annotated bibliography and a guide to government agencies and private groups involved in issues of coastal development

**Review** Oak Ridge National Laboratory,1987     Labour Co-partnership ,1906     **The Last Neighborhood Cops** Fritz Umbach,2011-01-05 In recent years community policing has transformed American law enforcement by promising to build trust between citizens and officers Today three quarters of American police departments claim to embrace the strategy But decades before the phrase was coined the New York City Housing Authority Police Department HAPD had pioneered community based crime fighting strategies The Last Neighborhood Cops reveals the forgotten history of the residents and cops who forged community policing in the public housing complexes of New York City during the second half of the twentieth century Through a combination of poignant storytelling and historical analysis Fritz Umbach draws on buried and confidential police records and voices of retired officers and older residents to help explore the rise and fall of the HAPD s community based strategy while questioning its tactical effectiveness The result is a unique perspective on contemporary debates of community policing and historical developments chronicling the influence of poor and working class populations on public policy making
