Line Vali Hawkins Mitchell, 2004-11 Annotation Reasonable variations of human emotions are expected at the workplace People have feelings Emotions that accumulate collect force expand in volume and begin to spin are another matter entirely Spinning emotions can become as unmanageable as a tornado and in the workplace they can cause just as much damage in terms of human distress and economic disruption All people have emotions Normal people and abnormal people have emotions Emotions happen at home and at work So understanding how individuals or groups respond emotionally in a business situation is important in order to have a complete perspective of human beings in a business function Different people have different sets of emotions Some people let emotions roll off their back like water off a duck Other people swallow emotions and hold them in until they become toxic waste that needs a disposal site Some have small simple feelings and others have large complicated emotions Stresses of life tickle our emotions or act as fuses in a time bomb Stress triggers emotion Extreme stress complicates the wide range of varying emotional responses Work is a stressor Sometimes work is an extreme stressor Since everyone has emotion it is important to know what kinds of emotion are regular and what kinds are irregular abnormal or damaging within the business environment To build a strong well grounded value added set of references for professional discussions and planning for Emotional Continuity Management a manager needs to know at least the basics about human emotion Advanced knowledge is preferable Emotional Continuity Management planning for emotions that come from the stress caused by changes inside business from small adjustments to catastrophic upheavals requires knowing emotional and humanity based needs and functions of people and not just technology and performance data Emergency and Disaster Continuity planners sometimes posit the questions What if during a disaster your computer is working but no one shows up to use it What if no one is working the computer because they are terrified to show up to a worksite devastated by an earthquake or bombing and they stay home to care for their children The Emotional Continuity Manager asks What if no one is coming or no one is producing even if they are at the site because they are grieving or anticipating the next wave of danger What happens if employees are engaged in emotional combat with another employee through gossip innuendo or out and out verbal warfare And what if the entire company is in turmoil because we have an Emotional Terrorist who is just driving everyone bonkers The answer is that in terms of bottom line thinking productivity is productivity and if your employees are not available because their emotions are not calibrated to your industry standards then fiscal risks must be considered Human compassion needs are important And so is money Employees today face the possibility of biological nuclear incendiary chemical explosive or electronic catastrophe while potentially working in the same cubicle with someone ready to suicide over personal issues at home They face rumors of downsizing and outsourcing while watching for anthrax amidst rumors that co workers are having affairs An employee coughs someone jokes nervously about SARS or teases a co worker about their hamburger coming from a Mad Cow someone laughs someone worries and productivity can falter as minds are not on tasks Emotions run rampant in human lives and therefore at work sites High

demand emotions demonstrated by complicated workplace relationships time consuming divorce proceedings addiction behaviors violence illness and death are common issues at work sites which people either manage well or do not manage well Low demand emotions demonstrated by annoyances petty bickering competition prejudice bias minor power struggles health variables politics and daily grind feelings take up mental space as well as emotional space It is reasonable to assume that dramatic effects from a terrorist attack natural disaster disgruntled employee shooting or natural death at the work site would create emotional content That content can be something that develops evolves and resolves or gathers speed and force like a tornado to become a spinning energy event with a life of its own Even smaller events such as a fully involved gossip chain or a computer upgrade can lead to the voluntary or involuntary exit of valuable employees This can add energy to an emotional spin and translate into real risk features such as time loss recruitment nightmares disruptions in customer service additional management hours remediations and trainings consultation fees Employee Assistance Program EAP dollars spent Human Resources HR time spent administrative restructuring and expensive and daunting litigations Companies that prepare for the full range of emotions and therefore emotional risks from annoyance to catastrophe are better equipped to adjust to any emotionally charged event small or large It is never a question of if something will happen to disrupt the flow of productivity it is only a question of when and how large Emotions that ebb and flow are functional in the workplace A healthy system should be able to manage the ups and downs of emotions Emotions directly affect the continuity of production and services customer and vendor relations and essential infrastructure Unstable emotional infrastructure in the workplace disrupts business through such measurable costs as medical and mental health care employee retention and retraining costs time loss or legal fees Emotional Continuity Management is reasonably simple for managers when they are provided the justifiable concepts empirical evidence that the risks are real a set of correct tools and instructions in their use What has not been easy until recently has been convincing the powers that be that it is value added work to deal directly and procedurally with emotions in the workplace Businesses haven't seen emotions as part of the working technology and have done everything they can do to avoid the topic Now cutting edge companies are turning the corner Even technology continuity managers are talking about human resources benefits and scrambling to find ways to evaluate feelings and risks Yes times are changing Making a case for policy to manage emotions is now getting easier For all the pain and horror associated with the terrorist attacks of September 11 2001 employers are getting the message that no one is immune to crisis In today's heightened security environments the demands of managing complex workplace emotions have increased beyond the normal training supplied by in house Human Resources HR professionals and Employee Assistance Plans EAPs Many extremely well meaning HR and EAP providers just do not have a necessary training to manage the complicated strata of extreme emotional responses Emotions at work today go well beyond the former standards of HR and EAP training HR and EAP providers now must have advanced trauma management training to be prepared to support employees The days of easy emotional

management are over Life and work is much too complicated Significant emotions from small to extreme are no longer the sole domain of HR EAP or even emergency first responders and counselors Emotions are spinning in the very midst of your team project cubicle and company Emotions are not just at the scene of a disaster Emotions are present And because they are not controllable human emotions are not subject to being mandated Emotions are going to happen There are many times when emotions cannot be simply outsourced to an external provider of services There are many times that a manager will face an extreme emotional reaction Distressed people will require management regularly That s your job *Online Business Laws* Vincent Marwood, AI, 2025-04-03 *Online Business Laws* is an essential guide for entrepreneurs navigating the complexities of e commerce It offers crucial insights into areas like e commerce regulations digital contracts and intellectual property highlighting the unique challenges of the digital landscape Did you know that failing to comply with data privacy laws like GDPR can result in hefty fines or that using unoriginal content can lead to copyright infringement lawsuits This book emphasizes proactive legal compliance as a strategy for sustainable online business success The book uniquely blends legal precision with practical advice offering step by step guidance on implementing legal safeguards It progresses from fundamental principles such as consumer protection and online advertising regulations to more intricate topics like internet fraud prevention and the nuances of the Uniform Electronic Transactions Act Case studies illustrate real world consequences of neglecting legal compliance This approach ensures readers can immediately apply the knowledge to assess and improve their business practices *Network World* ,1999-12-06 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce **Network World** ,2000-02-28 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce **Network World** ,1999-08-23 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support everything from business critical applications to employee collaboration and electronic commerce Network World ,1999-11-15 For more than 20 years Network World has been the premier provider of information intelligence and insight for network and IT executives responsible for the digital nervous systems of large organizations Readers are responsible for designing implementing and managing the voice data and video systems their companies use to support
