commercial tourist oriented economy The 37 square mile French Dutch Island with English speaking natives began its transformation into modernity with the electrification of the greater part of the island and the construction of the first terminal of the Princess Juliana International Airport during that year Many islanders left their gardens and grounds to work in the construction field in the stores and hotels which opened that year As the development increased numerous immigrants from the close neighboring islands came in search of work and waves of St Martiners who had migrated to then prosperous Caribbean islands returned to their homeland to fill the new positions in the first banks business administrations and governmental offices The festive gentle way of life of the natives harmoniously blended with the burgeoning new economy and greatly contributed to the success of the tourism industry which made St Martin one of the top Caribbean destinations Its attractiveness derived not only from the unique beauty of its combined pond and hill sceneries but also from the warm hospitality and friendliness of the natives

Education in St. Maarten from 1954 to 2000 Milton George,2016-02-29

This book narrates the development of education in St Maarten between 1954 and 2000 by tapping into the experience of the protagonists giving them a voice in the recording of their own history As such it lends a voice to postcolonial subjects who have often been bypassed or forgotten by most traditional historians and thus rendered voiceless The work is based on both written and oral history including interviews with important educational agents as well as former pupils and parents By doing this it describes the overall framework of education in St Maarten within the juridical space of the Kingdom of the Netherlands The first part of the book deals with the Dutch Antilles in general and with St Maarten in particular examining the effects of slavery and its consequences Both before and after the restructuration of the Kingdom of the Netherlands in 1954 education was essentially shaped by the different religious denominations on the island Over time St Maarten s schooling system developed from an almost non existing entity to a well structured one which closely resembled the educational framework in the Netherlands its former colonial ruler Part two reflects the respondents reactions to several issues concerning education in St Maarten It was only after local St Maarten students became teachers that topics about the island found their place in the curriculum Even though it took some time to integrate St Maarten in the curriculum the people did not and still do not have the feeling that education has let them down It is only now that they are beginning to question whether and to what extent schools were and are able to positively influence young people In the past they believed that schooling however foreign its curriculum may have been did actually help them to find a niche in the world After studying both written and oral sources the book concludes that the coat of arms of St Maarten is representative of its findings about education on this island Semper progrediens Always progressing Education in St Maarten has progressed without showing radical breaks
