Butler's Saints of the Third Millennium Paul Burns, 2001-01-01 Pope John Paul II has proclaimed an unprecedented number of new saints and blessed in the 25 years of his pontificate and shows few signs of slowing the process despite the criticism from at least one cardinal that the altars are getting a little crowded The proclamations have

been made in a large number of countries from which the new saints and blessed have come This reflects a deliberate policy of strengthening the faith of local churches against the threats from totalitarianism secularism Pentecostalism etc the Vatican tends to see most of the outside world as a threat There has also been a deliberate policy to seek more examples of holiness from outside the ranks of clergy and religious The twentieth century has been seen as the century of martyrs largely those of Nazism and Communism and they feature prominently those of nominally Catholic military regimes are less favoured The Introduction will make such points This volume proposes to cover a four year period in the Butler s style Blessed appearing in the 1995 2000 volumes who have since been canonized will have their entries updated and expanded as necessary new blessed will be featured with the information that is available which in the case of some Third World figures is not very much Entries will therefore range from around 3 000 words to 200 with an average of some 800 The number of entries will be approximately 80

The World is Out of Joint Immanuel Wallerstein, 2015-11-17 The dominant view in social science has been that the modern world shows a pattern of linear development in which all positive social trends rise albeit at an uncertain speed toward a relatively homogenized world In the post 1945 period some analysts contested this linear model arguing that the modern world was rather one of escalating polarization Their view was strengthened by the separate emergence within the natural sciences of complexity studies which suggested that natural systems inevitably moved away from equilibrium and at a certain point bifurcated radically This book based on a truly collaborative international research project evaluates the empirical evidence in this debate in order to 1 give an adequate portrayal of the historical realities of the world system 2 draw a nuanced assessment about this debate and 3 provide the basis on which we can not only envisage probable future trends but also draw conclusions about the policy and or political implications of past and future research The work of ten research clusters based on crucial topics of overlapping nodes of social activity provides a vantage point with which to assess the basic issue a clear picture emerges of world historical interpretations of continuing polarizations

Church but also changed the course of world history When he was elected pope in the fall of 1978 few people had ever heard of the charismatic Karol Wojtya But in a very short time he would ignite a revolution of conscience in his native Poland that would ultimately lead to the collapse of European communism and death of the Soviet Union What even fewer people knew was that the KGB the Polish Secret Police and the East German Stasi had been waging a dangerous decades long war against Wojtya and the Vatican itself Weigel with unprecedented access to many Soviet era documents chronicles John Paul's struggle against the dark forces of communism Moreover Weigel recounts the tumultuous last years of John Paul's life as he dealt with a crippling illness as well as the new world disorder and revelations about corruption within the Catholic Church Weigel's thought provoking biography of John Paul II concludes with a probing and passionate assessment of a man who lived his life as a witness to hope in service to the Christian ideals he embraced
