The International Sale of Goods 5e Michael Bridge,2024-02-08 The fifth edition of this leading authority continues to provide comprehensive analysis of the law and practice of sale of goods under English and international law It is an indispensable resource for practitioners scholars and postgraduate students

International Commercial Sales: The Sale of Goods on Shipment Terms Andrea Lista,2016-11-18 This book comprehensively examines the entire legal process of the international sale of goods beginning with the creation of the contract and continuing through to either the fulfilment of the sale or the termination of the contract Every day goods are globally traded between sellers and buyers in different countries and different jurisdictions The distances between the parties involved in such transactions and the relative risks related to that are a key issue in international commercial sales Sales of goods carried by sea thus differ quite drastically from domestic

sales the goods will be normally shipped at a port very distant from the buyer preventing his physical presence at the port of loading Further the goods will travel in the custody of a carrier a party normally quite independent from either trader Finally transactions concluded on shipment terms are normally irreversible in the sense that shipping the goods back to the seller represents an unlikely option for the buyer Traders around the world very frequently choose English law to govern their contracts with disputes to be resolved through London arbitration or litigation The basis of that law is to be found in the English Sale of Goods Act 1979 and the book consequently also includes an examination of the fundamental principles of that Act as well as considering use of the Vienna Convention on the International Sale of Goods This book will be an invaluable reference point for legal practitioners specialising in the sale of goods as well as postgraduate students and academic researchers working in sales of goods and the international trade sector

Bridge, 2007 This authoritative new edition addresses international sales of goods and covers contracts governed by English law and contracts governed by the United Nations Convention on the International Sale of Goods Contract issues are tackled in detail as well as property matters and most notably those issues arising out of the use of documents of title such as marine bills of lading In addition to the rights and duties of seller and buyer there is substantial material on bankers documentary letters of credit The book not only includes commentary on decided cases but also standard form contracts which represent evolving trade practice Readers gain a contextual understanding of the trading world in which international sales occur through a thorough and detailed case law analysis New to this edition is commentary on the Contracts Act as well as discussions on conflict of laws the construction of commercial contracts and e commerce The documentary letters of credit and the UN Convention on the International Sale of Goods are given extensive treatment in this

edition Transport Law in Australia John Livermore, 2023-08-20 John Livermore's succinct monograph provides a useful overview of Australian transport law as of July 2017. This is a readable and useful publication which provides a good summary of Australian transport law. Simon Baughen, Professor of Shipping Law, Swansea University, Artho Cyraith Llongau. Extract from full review of the 3rd edition in *Journal of International Maritime Law*, January 2020. Transport Law in Australia is a clear and well-researched resource covering all modes of transport. It should be the first port of call for logistic professionals, transport lawyers, and students when seeking to understand the legalities of transport in Australia. Russell Wiese, Director, CTG Law. This updated edition of *Transport Law in Australia* describes the main sources of transport law, jurisdiction, and courts, state immunity, and the legal role of transport intermediaries. The scope of the book is broad in that it encompasses maritime, road, rail, air, and multimodal transport law. Almost half the book is devoted to maritime and shipping law, which for an island nation with over 95% of its international trade carried by sea is as important as it is unsurprising. Whilst works of this nature have the potential to be a dry read, in this case the author has taken an approach which makes the book eminently readable and usable. The text is well supported by in-depth research and enhanced with comprehensive referencing, footnotes, tables of cases and statutes, as well as a selected bibliography. With Australian society and the economy vitally dependent on all modes of transport, this book will be a valuable addition for many in the transport community. This includes transport operators, shippers, and freight forwarders, transport regulators, and lawyers, as well as academics, researchers, and students engaged in the study of transport. The author's practical and masterful approach to the subject should go a long way to ensuring the success of *Transport Law in Australia*, as well as being a valuable addition to the body of literature on this important topic. Barrie Lewarn, Professor, Australian Maritime College, National Centre for Ports and Shipping, University of Tasmania. Review of the 2nd edition of *Transport Law in Australia*. Cases and Materials on the Carriage of Goods by Sea Anthony Rogers, Jason Chuah, Martin Dockray, 2019-10-23. *Cases and Materials on the Carriage of Goods by Sea*, fifth edition, offers tailored coverage of the most commonly taught topics on Carriage of Goods by Sea courses. Combining a collection of legislative materials, commentaries, scholarly articles, standard forms, and up-to-date English case law, it covers the major areas of chartering and bills of lading, as well as matters such as exclusion and limitation of liability. Significant innovations for this edition include coverage of blockchain technology and smart contracts in shipping, coverage of autonomous shipping, recent developments on the construction of commercial shipping contracts, recent developments on the transfer of rights and liabilities in the contract of carriage, tables and diagrams for ease of reading, discussion of some of the most important decisions by the senior courts of England and Wales, with the most up-to-date case law included, references to academic and professional literature for further reading and research, industry standard form clauses, reference to important foreign cases, emphasis on how it is that shipping law operates and is applied in commercial practice. A clear, student-friendly text design with a strong emphasis on research and problem-solving. This up-to-date collection of materials relating to the carriage of

goods by sea will be of value to students of law researchers and legal practitioners *Codification of Maritime Law* Zuzanna Pełowska-Dąbrowska, Justyna Nawrot, 2019-11-21 This book is the first of its kind to explore the problems inherent in the unification of maritime law Featuring contributions from leading experts at European maritime law research centres it considers international conventions current maritime practice standard forms and recently adopted or drafted national codifications of maritime law from the codification point of view The book is divided into four parts which represent different views on the main topic Part I gathers chapters dedicated to different aspects and methods of unification of maritime law on a global scale as well as several specific issues of maritime law from the regulatory point of view Part II of the book consists of those papers that centre around the issue of transport of goods Part III is dedicated to codifications of carriage of passengers cruise law and leisure navigation Finally Part IV addresses national codifications of maritime law *Codification of Maritime Law Challenges Possibilities and Experience* seeks to provide common ground for future unification of maritime law which makes the book useful both for private and public maritime lawyers and states maritime administrations worldwide
