

SALINAS

A black and white photograph of ancient stone structures, likely part of a prehistoric or early historic site. The structures are made of rough-hewn stone blocks. One structure on the left has a series of rectangular openings or niches. Another structure in the center has a similar pattern. A third, taller structure on the right is partially visible. The foreground shows a rocky, uneven ground surface.

Salinas Archaeology History Prehistory:

Salinas David Grant Noble,1982 **From Prehistoric Villages to Cities** Jennifer Birch,2014-04-11 Archaeologists have focused a great deal of attention on explaining the evolution of village societies and the transition to a Neolithic way of life. Considerable interest has also concentrated on urbanism and the rise of the earliest cities. Between these two landmarks in human cultural development lies a critical stage in social and political evolution. Throughout world at various points in time people living in small dispersed village communities have come together into larger and more complex social formations. These community aggregates were essentially middle range situated between the earliest villages and emergent chiefdoms and states. This volume explores the social processes involved in the creation and maintenance of aggregated communities and how they brought about revolutionary transformations that affected virtually every aspect of a society and its culture. While there have been a number of studies that address coalescence from a regional perspective less is understood about how aggregated communities functioned internally. The key premise explored in this volume is that large scale long term cultural transformations were ultimately enacted in the context of daily practices interactions and what might be otherwise considered the mundane aspects of everyday life. How did these processes play out on the ground in diverse and historically contingent settings? What are the strategies and mechanisms that people adopt in order to facilitate living in larger social formations? What changes in social relations occur when people come together? This volume employs a broadly cross cultural approach to interrogating these questions employing case studies which span four continents and more than 10 000 years of human history.

Southwestern Pottery Allan Hayes,John Blom,Carol Hayes,2015-08-03 When this book first appeared in 1996 it was Pottery 101 a basic introduction to the subject. It served as an art book a history book and a reference book but also fun to read beautiful to look at and filled with good humor and good sense. After twenty years of faithful service it s been expanded and brought up to date with photographs of more than 1 600 pots from more than 1 600 years. It shows every pottery producing group in the Southwest complete with maps that show where each group lives. Now updated rewritten and re photographed it s a comprehensive study as well as a basic introduction to the art.

Cultural Resources Overview Joseph A. Tainter,Frances Levine,1987 **Hinterlands and Regional Dynamics in the Ancient Southwest** Alan P. Sullivan,James Bayman,2007-01-01 Hinterlands and Regional Dynamics in the Ancient Southwest is the first volume dedicated to understanding the nature of and changes in regional social autonomy political hegemony and organizational complexity across the entire prehistoric American Southwest. With geographic coverage extending from the Great Plains to the Colorado River and from Mesa Verde to the international border the volume s ten case studies synthesize research that enhances our understanding of the ancient Southwest s highly variable demographic land use and economic histories. For this volume hinterlands are those areas whose archaeological records do not disclose the ceramic architectural and network evidence that initially led to the establishment of the Hohokam Chaco and Casas Grandes regional systems. Employing a

variety of perspectives such as the cultural landscapes approach heterarchy and the common pool resource model as well as technical methods such as petrographic and stylistic attribute analyses the volume s contributors explore variation in hinterland identities subsistence ecology and sociopolitical organization as regional systems expanded and contracted between the 9th and 14th centuries AD The hinterlands of the prehistoric Southwest were home to a substantial number of people and were often used as resource catchments by the inhabitants of regional systems Importantly hinterlands also influenced developments of nearby regional systems under whose footprint they managed to retain considerable autonomy By considering the dynamics between hinterlands and regional systems the volume reveals unappreciated aspects of the ancient Southwest s peoples and their lives thereby deepening our awareness of the region s rich and complicated cultural past

Constructing Community Alison E. Rautman, 2014-11-27 In central New Mexico tourists admire the majestic ruins of old Spanish churches and historic pueblos at Abo Quarai and Gran Quivira in Salinas Pueblo Missions National Monument The less imposing remains of the earliest Indian farming settlements however have not attracted nearly as much notice from visitors or from professional archaeologists In *Constructing Community* Alison E Rautman synthesizes over twenty years of research about this little known period of early sedentary villages in the Salinas region Rautman tackles a very broad topic how archaeologists use material evidence to infer and imagine how people lived in the past how they coped with everyday decisions and tensions and how they created a sense of themselves and their place in the world Using several different lines of evidence she reconstructs what life was like for the Ancestral Pueblo people of Salinas and identifies some of the specific strategies that they used to develop and sustain their villages over time Examining evidence of each site s construction and developing spatial layout Rautman traces changes in community organization across the architectural transitions from pithouses to jacal structures to unit pueblos and finally to plaza oriented pueblos She finds that in contrast to some other areas of the American Southwest early villagers in Salinas repeatedly managed their built environment to emphasize the coherence and unity of the village as a whole In this way she argues people in early farming villages across the Salinas region actively constructed and sustained a sense of social community

Extinction or Survival? S. K. Adam, 2015-12-03 How could an urban American Indian tribe having survived relentless earlier governmental attempts to declare its culture extinct be once again on the verge of extinction The Tigua of Ysleta del Sur Pueblo dwell in the outskirts of El Paso Texas where the infamous Jack Abramoff was in the news for helping to close their highly successful casino This casino had created jobs and funded health care for the tribe and now the Tigua are once more taking action to preserve their economy membership and culture This highly publicised casino story is set against the remarkably rich history of the Tigua including earlier attempts by national and state governments to steal the tribe's land and destroy its legal status Anthropologist S K Adam explores how questions of identity can be linked to cultural survival Had the Tigua somehow survived 300 years of persecution and urban encroachment or as alleged by the government were they really just Mexicanised Indians acting fraudulently Adam examines how terms such as indigeneity identity authenticity culture change and perseverance are understood and defined by the US government He analyses how issues of power law discourse genocide and self determination affect the relationship between the United States and its indigenous populations past and present

Alternative Leadership Strategies in the Prehispanic Southwest Barbara J. Mills, 2015-09-01 In considerations of societal change the application of classic evolutionary schemes to prehistoric southwestern peoples has always been problematic for scholars Because recent theoretical developments point toward more variation in the scale hierarchy and degree of centralization of complex societies this book takes a fresh look at southwestern prehistory with these new ideas in mind This is the first book length work to apply new theories of social organization and leadership strategies to the prehispanic Southwest It examines leadership strategies in a number of archaeological contexts from Chaco Canyon to Casas Grandes from Hohokam to Zuni to show striking differences in the way that leadership was constructed across the region These case studies provide ample evidence for alternative models of leadership in middle range societies By illustrating complementary approaches in the study of political organization they offer new insight into power and inequality They also provide important models of how today's archaeologists are linking data to theory providing a basis for comparative analysis with other regions

 the lush semitropical forests of the southeastern United States and the Caribbean Basin No less remarkable is the record of

 living today *Tracing Archaeology's Past* Andrew L. Christenson,1989 In 17 critical essays the first book to address the
 historiography of archaeology evaluates how and why the history of archaeology is written The emphasis in the first section
 is on how archaeologists use historical knowledge of their discipline For example it can help them to understand the origin of
 current archaeological ideas to learn from past errors and to apply past research to current questions It can even be
 integrated into the new liberal arts curricula in an attempt to instruct students in critical thinking The second section
 considers the sociopolitical context within which past archaeologists lived and worked and the contexts within which
 historians of archaeology write The topics treated include the rise of capitalism and colonialism and the rise of modern
 archaeology the political contexts and changing form of the history of Mesoamerican archaeology the decline to obscurity of
 once prominent archaeologists and the institutional and ideological fossilization of American classical archaeology The final
 section focuses on researching and presenting the history of archaeology The authors discuss past archaeologists in light of
 their institutional affiliations the use of historic methods to interpret past archaeological notes and collections and the means
 of presenting the history of archaeology on videotape The final paper offers a plan for documenting the many records diaries
 fieldnotes correspondence unpublished reports in public and private hands that contain the history of archaeology
Expressing New Mexico Felipe Gonzales,2007-10-25 The culture of the Nuevomexicanos forged by Spanish speaking
 residents of New Mexico over the course of many centuries is known for its richness and diversity Expressing New Mexico
 contributes to a present day renaissance of research on Nuevomexicano culture by assembling eleven original and
 noteworthy essays They are grouped under two broad headings expressing culture and expressing place Expressing culture
 derives from the notion of expressive culture referring to fine art productions such as music painting sculpture drawing

dance drama and film but it is expanded here to include folklore religious ritual community commemoration ethnopolitical identity and the pragmatics of ritualized response to the difficult problems of everyday life Intertwined with the concept of expressive culture is that of place in relation to New Mexico itself Place is addressed directly by four of the authors in this anthology and is present in some way and in varying degrees among the rest Place figures prominently in Nuevomexicano character contributors argue They assert that Nuevomexicanos and Nuevomexicanas construct and develop a sense of self that is shaped by the geography and culture of the state as well as by their heritage Many of the articles deal with recent events or with recent reverberations of important historical events which imbues the collection with a sense of immediacy Rituals traditions community commemorations self concepts and historical revisionism all play key roles Contributors include both prominent and emerging scholars united by their interest in and fascination with the distinctiveness of Nuevomexicano culture
