The Mechanical Behavior of Salt - Understanding of THMC Processes in Salt Manfred Wallner, Karl-Heinz Lux, Wolfgang Minkley, H. Reginald Hardy, Jr., 2017-12-14 A unique opportunity to review the latest progress in an expanding area of interest the Mechanical Behaviour of Salt These Proceedings include over fifty papers and summaries describing the latest findings in ongoing studies from a number of research groups For the 2007 conference there was a particular focus on the understanding of thermal mechanical hydraulic and chemical coupled processes THMC Such processes are of specific interest when

considering advanced problems in waste disposal storage and mining The book includes a number of themes laboratory and in situ investigations modelling e.g. derivation of constitutive equations numerical computations and prediction of long term behaviour THMC processes in mining projects storage and permanent disposal case studies geology mining and storage applications and abandonment The International Conferences on the Mechanical Behaviour of Salt have a long tradition being initiated in 1981 at The Pennsylvania State University USA The present conference the sixth of the series took place in Hannover Germany in May 2007 The conference brought together mining engineers researchers and university professors interested in the mechanical behaviour of salt mostly from Europe and beyond *Parliamentary Papers* Great Britain. P. De Wilde, S. Hernández, C. A. Brebbia, 2014-06-09 The use of novel materials and new structural concepts nowadays is not restricted to highly technical areas like aerospace aeronautical applications or the automotive industry but affects all engineering fields including those such as civil engineering and architecture Addressing issues involving advanced types of structures particularly those based on new concepts or new materials and their system design contributions highlight the latest developments in design optimisation manufacturing and experimentation Also included are contributions on new software numerical methods and different optimisation techniques Optimisation problems of interest involve those related to size shape and topology of structures and materials Most high performance structures require the development of a generation of new materials which can more easily resist a range of external stimuli or react in a non conventional manner Particular emphasis is placed on intelligent structures and materials as well as the application of computational methods for their modelling control and management Optimisation techniques have much to offer to those involved in the design of new industrial products The formulation of optimum design has evolved from the time it was purely an academic topic able now to satisfy the requirements of real life prototypes The development of new algorithms and the appearance of powerful commercial computer codes with easy to use graphical interfaces have created a fertile field for the incorporation of optimisation in the design process in all engineering disciplines This proceedings volume is the first from a new edition of the High Performance Design of Structures and Materials and the Optimum Design of Structures conferences which follows the success of a number of meetings that originated in 1989 Topics covered include Composite materials Material characterisation Experiments and numerical analysis Steel structures High performance concretes Natural fibre composites Transformable structures Lightweight structures Timber structures Environmentally friendly and sustainable structures Emerging structural applications Optimisation in civil engineering Evolutionary methods in optimisation Shape and topology optimisation Aerospace structures Structural optimisation Biomechanics application Material optimisation Life cost optimisation
