## **Salt White Gold Of The Ancient Maya:**

The Ancient Maya Heather Irene McKillop, 2003      SALT: WHITE GOLD of the ANCIENT MAYA Heather McKillop, 2008-11

McKillop has completed a remarkable task in bringing out significant new data concerning ancient Maya salt making. The implications of environmental exploitation, technological development and economic possibilities provide the opportunity to revisit these issues on more solid ground. Fred Valdez Jr, University of Texas Austin, Long, accepted ideas about Late Classic activities and the role of coastal communities in supporting Late Classic society. Even the society of Tikal and the Peten will now have to change as the result of McKillop's findings. Elizabeth Graham, University College London.

In *Salt White Gold of the Ancient Maya*, Heather McKillop reports the discovery, excavation and interpretation of Late Classic Maya salt works on the coast of Belize, transforming our knowledge of the Maya salt trade and craft specialization while providing new insights on sea level rise in the Late Holocene as well. Salt, basic to human existence, was scarce in the tropical rainforests of Belize and Guatemala where the Classic Maya civilization thrived between A.D. 300 and 900. The prevailing interpretation has been that salt was imported from the north coast of the Yucatan. However, the underwater discovery and excavation of salt works in Punta Yucacos Lagoon demonstrate that the Maya produced salt by boiling brine in pots over fires at specialized workshops on the Belizean coast. The Punta Yucacos salt works are clear evidence that craft specialization took place in a non-domestic setting and that production occurred away from the economic and political power of the urban Maya rulers, thus providing new clues to the Maya economy and sea trade. McKillop also presents new data on sea level rise in the Late Holocene that extend geologists and geographers' sea level curves from earlier eras. Likewise, she enters the environmental versus cultural debate over the Classic Maya collapse by evaluating the factors that led to the abandonment of the Punta Yucacos salt works at the end of the Classic Period, synonymous with the abandonment of inland Maya cities.

Heather McKillop is associate professor of anthropology at Louisiana State University.      *Salt in the Earth* Mualla Cengiz, Savas Karabulut, 2020-03-25

Salt is a predominant compound for humankind and the earth preserves an important source of this element of life. This book reviews this multi-disciplinary issue in which geoscientists, historians, agriculturalists, medical doctors and general scientists have been interested in its nature. The authors have provided contributions on the origin and history of salt intrusion with freshwater effect, its usability as a material and its role in life. The safety of groundwater resources should be a priority for humanity. Contribution on this important topic is provided by geophysical investigations to characterize saltwater intrusions in aquifers. This book also presents a general overview on salt intake and its role in food and human health. Methods of salt recovery and surface salination as well as its usage in the environment will provide new aspects in earth science.

**The Ancient Maya** Heather McKillop, 2004-08-19

Thanks to powerful innovations in archaeology and other types of historical research, we now have a picture of everyday life in the Mayan empire that turns the long-accepted conventional wisdom on its head. Ranging from the end of the Ice Age to the flourishing of Mayan culture in the

first millennium to the Spanish conquest in the 16th century The Ancient Maya takes a fresh look at a culture that has long held the public's imagination Originally thought to be peaceful and spiritual the Mayans are now also known to have been worldly bureaucratic and violent Debates and unanswered questions linger Mayan expert Heather McKillop shows our current understanding of the Maya explaining how interpretations of dirt archaeology hieroglyphic inscriptions and pictorial pottery are used to reconstruct the lives of royalty artisans priests and common folk She also describes the innovative focus on the interplay of the people with their environments that has helped further unravel the mystery of the Mayans rise and fall

Maya Salt Works Heather McKillop, 2019-05-01 This book includes evaluation of the economics of salt production and trade from analyses of the spatial patterning of wooden buildings and associated artifacts that were mapped on the sea floor at the Paynes Creek Salt Works The book describes the discovery and mapping of the wooden architecture as well as the associated pottery and other artifacts on the surface and embedded in the sea floor during a systematic search for salt production in a large salt water lagoon system Punta Ycacos Lagoon in southern Belize

**Social Identities in the Classic Maya Northern Lowlands** Traci Ardren, 2015-04-15 Social Identities in the Classic Maya Northern Lowlands plumbs the archaeological record for what it can reveal about the creation of personal and communal identities in the Maya world Using new primary data from her excavations at the sites of Yaxuna Chunchucmil and Xuenkal and new analysis of data from Dzibilchaltun in Yucatan Mexico Traci Ardren presents a series of case studies in how social identities were created shared and manipulated among the lowland Maya Ardren argues that the interacting factors of gender age familial and community memories and the experience of living in an urban setting were some of the key aspects of Maya identities She demonstrates that domestic and civic spaces were shaped by gender specific behaviors to communicate and reinforce gendered ideals Ardren discusses how child burials disclose a sustained pattern of reverence for the potential of childhood and the power of certain children to mediate ancestral power She shows how small shrines built a century after Yaxuna was largely abandoned indicate that its remaining residents used memory to reenvision their city during a time of cultural reinvention And Ardren explains how Chunchucmil's physical layout of houses plazas and surrounding environment denotes that its occupants shared an urban identity centered in the movement of trade goods and economic exchange Viewing this evidence through the lens of the social imaginary and other recent social theory Ardren demonstrates that material culture and its circulations are an integral part of the discourse about social identity and group membership

Cultures of Commodity Branding Andrew Bevan, David Wengrow, 2016-06-16 Commodity branding did not emerge with contemporary global capitalism In fact the authors of this volume show that the cultural history of branding stretches back to the beginnings of urban life in the ancient Near East and Egypt and can be found in various permutations in places as diverse as the Bronze Age Mediterranean and Early Modern Europe What the contributions in this volume also vividly document both in past social contexts and recent ones as diverse as the kingdoms of Cameroon Socialist Hungary or online eBay auctions is the need to understand branded

commodities as part of a broader continuum with techniques of gift giving ritual and sacrifice Bringing together the work of cultural anthropologists and archaeologists this volume obliges specialists in marketing and economics to reassess the relationship between branding and capitalism as well as adding an important new concept to the work of economic anthropologists and archaeologists

**Maya Christians and Their Churches in Sixteenth-Century Belize** Elizabeth Graham, 2020-03-17 It is widely held that Christianity came to Belize as an extension of the conquest of Yucatan and that adherence to Christian belief and practice was abandoned in the absence of enduring Spanish authority An alternative view comes from the excavations of Maya churches at Tipu and Lamanai which show that the dead were buried in Christian churchyards long after the churches themselves fell into disuse and pre Columbian ritual objects were cached in Christian sacred spaces both during and after Spanish occupation Excavations also reveal that the architectural style of these early churches is Franciscan in inspiration but nonetheless the product of continuing community efforts at construction and repair A conclusion difficult to ignore is that the Maya of Tipu and Lamanai considered themselves Christians with or without Spanish presence Viewing historical and archaeological data through the lens of her personal experience of Roman Catholicism and informed by feminist approaches Elizabeth Graham assesses the concept of religion the significance of doctrine the empowerment of the individual and the process of conversion by examining the meanings attributed to ideas objects and images by the Maya by Iberian Christians and by archaeologists Graham s provocative study also makes the case that the impact of Christianity in Belize was a phenomenon that uniquely shaped the development of the modern nation A volume in the series Maya Studies edited by Diane Z Chase and Arlen F Chase
