Philpot, 2017-01-26 This book offers a comprehensive analysis of character focalization in ten contemporary realistic children's novels The author argues that character focalization defined as the location of fictional world perception in the mind of a character is a prominent textual structure in these novels He demonstrates how significant meanings are conveyed in a variety of forms related to characters personal and interpersonal experiences Through close analysis of each text moreover he exposes distinctive perceptual psychological and social psychological patterns in the opening chapters of each novel which are thereafter developed by the principles of continuation augmentation and reconfiguration This book will appeal to scholars teachers and students in the fields of narrative studies stylistics children's literature scholarship linguistics and education
