The Research Imagination Paul S. Gray, John B. Williamson, David A. Karp, John R. Dalphin, 2007-08-13 The idea that science is a blueprint for research and imagination gives research its life and purpose inspired this comprehensive

explanation of research methodology The authors decades of experience have revealed that research is a craft requiring judgment and creativity not simply memorization and application of the rules of science Whether one is conducting an intimate one on one interview or a large scale examination of an entire society human imagination and scientific principles of inquiry go hand in hand To that end this book emphasizes scientific method but also acknowledges its critics It covers a wide variety of data collection techniques but presents them as reinforcing rather than competing with one another thus striking a balance between qualitative and quantitative methods It is designed for students and instructors who want a comprehensive treatment of a variety of research techniques with special emphasis on qualitative approaches **Red Flags and Lace**

Coiffes Charles R. Menzies, 2011-01-01 Small scale family fishing enterprises manage to persist despite a range of difficult economic and ecological changes and disruptions **Red Flags and Lace** Coiffes is an ethnography that explores how and why family based fishing enterprises continue in the face of what seem to be overwhelming odds Using historical ethnography as a lens through which to understand how the fishers and their families of the Bigouden region in France have situated themselves over time Charles R Menzies argues that local identity plays an important role as global capitalist pressures force these fishing communities to reorganize or disappear entirely Throughout the book touches on key concepts such as identity culture globalization kinship work the environment and the economy Publisher's description [New Books on Women and Feminism](#), 1996 *Who's Who of Canadian Women, 1999-2000* Gillian Holmes, 1999-06-01 Who's Who of Canadian Women

Nason Cambon, 2008 **Indigenous Research Knowledges and Their Place in the Academy** Bindi Bennett, Kelly Menzel, 2025-07-24 This book privileges Indigenous ways of knowing being and doing in research and serves as a voice in taking on some of the more marginal topics within methodologies It is significant in that it is written by indigenous scholars themselves The contributors shed light for example on Queer Black bodies and place Indigenous women as central in reimagining fair academic practice others return to their foundational texts to reflect on the growth of Indigenous Standpoint Theory This book sees Indigenous Peoples as holding greater significance within research objectives and institutional practices and reimagines a research world embracing storytelling as foundational to academia It is intended for students and early researchers particularly Indigenous researchers whilst also serving as an invaluable textbook for non Indigenous people

as it aids in explaining and outlining Indigenous research and is a valuable tool in the classroom and with research students. It demonstrates that Indigenous research approaches can sit beside and be equal to Western research especially when engaging with the ethics process and for PhD students. This book is invaluable for non Indigenous allies and researchers globally to further explain and outline Aboriginal Australian Indigenous research.

Asthma in the Workplace, Fourth Edition Jean-Luc Malo, Moira Chan-Yeung, David I. Bernstein, 2013-05-10 Occupational factors are responsible for a large percentage of cases of asthma in adults of working age. Any irritant generated at high concentrations can cause occupational asthma and early diagnosis is critical because cure is still possible at this stage. This latest edition of *Asthma in the Workplace* reflects the rapid pace of discovery and research in workplace asthma that has taken place in recent years. This Fourth Edition retains the international flavor of prior editions with contributions from editors and contributors from around the world. Several chapters commence with clinical histories and workplace scenarios relevant to the focus of the chapter making it particularly germane for primary care providers to develop skills in early recognition of the disease. Topics discussed include Definitions, historical background, epidemiology, genetics, pathophysiology and animal models, Guidelines for assessing the worker and the workplace and proposed guidelines for management including compensation aspects, Medicolegal aspects, prevention and surveillance. Detailed information about specific agents including a variety of high and low molecular weight agents. Other types of work related asthma conditions such as irritant induced asthma, eosinophilic bronchitis and occupational rhinitis. This new edition has been significantly restructured and places a greater emphasis on the clinical aspects of management and treatment. This heightened focus on practical considerations makes it a truly comprehensive hands on resource for practitioners and researchers in this fast moving field.
