Contribuciones a un debate Claudio Stern, 2012 El embarazo en la adolescencia es considerado como un riesgo para la salud materna e infantil así como un factor que contribuye al desmesurado crecimiento de la población a la deserción escolar y a la perpetuación de la pobreza al coartar las posibilidades de desarrollo familiar Sus causas se atribuyen principalmente a la sexualidad precoz y a la falta de información y de acceso a los métodos anticonceptivos Esta publicación pone en cuestión los supuestos antes mencionados destacando dos factores realmente subyacentes a esta problemática la pobreza y la desigualdad que dejan pocas oportunidades alternativas de desarrollo a una gran cantidad de nuestros jóvenes y la falta de una verdadera educación para el ejercicio de la sexualidad que les permita enfrentarse con responsabilidad a este aspecto tan central para su vida *Concepciones y percepciones sobre los derechos sexuales y reproductivos en la adolescencia* , 2007 **Salud**
