Liner Conferences in Competition Law Hongyan Liu, 2009-09-24 A liner conference as a self regulation organisational form of liner shipping companies constitutes a typical hard core cartel with significant anti competitive effect One of the main three trade routes of liner shipping traffic is the Europe Asia Trade on the two ends of which both the European Community EC and the People s Republic of China PRC play important roles in the international liner shipping market However the competition regimes on liner conferences in both jurisdictions are not equivalent From a comparative point of view this book reviews the historical development of maritime policy and regulatory legislation in the EC and the PRC catches insight into the system of regulation regime and individual provisions in substantive and procedural meaning and finally provides a wide ranging perspective on the future competition regulation in respect of the latest developments in both jurisdictions

Handbook of International Trade and Transportation Bruce A. Blonigen, Wesley W. Wilson, 2018-01-26 International trade has grown rapidly over the past half century accommodated by the transportation industry through concomitant growth and technological change But while the connection between transport and trade flows is clear the academic literature often looks at these two issues separately This Handbook is unique in pulling together the key insights of each field while highlighting what we know about their intersection and ideas for future research in this relatively unexamined but growing area of study

Maritime Logistics Value in Knowledge Management Eon-Seong Lee, Dong-Wook Song, 2014-08-21 Knowledge management has been widely applied to various industries as a good strategy to help improve firms performance As globalisation accelerates and international trade increases more and more maritime transport operations have become one of the vitalest industries to receive large attention from international managers This is because the managers have perceived that the maritime transport system is an integrated entity within the global logistics and supply chain and it should be therefore managed in the most efficient and effective ways possible as an organic body within a global logistics system Taking this approach this book

examines how maritime transport operators such as shipping companies port terminal operators and freight forwarders could successfully play a role within the global logistics flow wherein they are embedded by improving their logistic value i e maritime logistics value As per the objective the current book suggests a knowledge management based solution It attempts to systematically investigate what types of knowledge are needed in the maritime logistics industry how maritime operators could effectively acquire the knowledge and whether the acquired knowledge would help maritime operators enhance maritime logistics value This book provides not only comprehensive understandings of knowledge management strategy but also its practical application to the maritime logistics industry This would therefore be a useful guidebook for the managers academics and undergraduate postgraduate students in the field of maritime transport and global logistics to help them to gain comprehensive knowledge of the application of knowledge management strategy to the industry
