H. Andrewes,2003 A fully illustrated edition of the international best seller Longitude The Illustrated Longitude recounts in words and images the epic quest to solve the greatest scientific problem of the eighteenth and three prior centuries determining how a captain could pinpoint his ship s location at sea All too often throughout the ages of exploration voyages ended in disaster when crew and

cargo were either lost at sea or destroyed upon the rocks of an unexpected landfall. Thousands of lives and the fortunes of nations hung on a resolution to the longitude problem. To encourage a solution governments established prizes for anyone whose method or device proved successful. The largest reward of 20 000 truly a king's ransom was offered by Britain's Parliament in 1714. The scientific establishment from Galileo to Sir Isaac Newton had been certain that a celestial answer would be found and invested untold effort in this pursuit. By contrast John Harrison imagined and built the unimaginable a clock that told perfect time at sea known today as the chronometer. Harrison's trials and tribulations during his forty year quest to win the prize are the culmination of this remarkable story. *The Illustrated Longitude* brings a new and important dimension to Dava Sobel's celebrated story. It contains the entire original narrative of *Longitude* redesigned to accompany 183 images chosen by William Andrewes from portraits of every important figure in the story to maps and diagrams scientific instruments and John Harrison's remarkable sea clocks themselves. Andrewes's elegant captions and sidebars on scientific and historical events tell their own story of longitude paralleling and illuminating Sobel's memorable tale.

Practical Fluency Max Brand, Gayle Brand, 2006 All teachers know helping students become fluent in reading and writing involves more than measuring reading rates. They link all this work to the most current research on fluency taking readers into the daily routines of their classrooms. Readers will be reassured by the many suggestions for integrating fluency into existing reading and writing workshop routines. *Longitude* Dava Sobel, 2007 Sobel presents the dramatic human story of an epic scientific quest and of John Harrison's 40 year obsession with building the perfect timekeeper known today as the chronometer.
